

2018-3

Grade Pre-1

実用英語技能検定

主催：公益財団法人 日本英語検定協会

後援：文部科学省

準 1 級

2019 年 1 月 27 日 (日) 実施

■ 試験時間

筆記試験 (90分)

リスニングテスト (約29分)

■ 注意事項

1. 合図があるまでシールを破いてはいけません。ミシン目に沿って丁寧に破いてください。問題冊子が破れても交換できません。
2. 試験開始まで、この問題冊子を開いてはいけません。
3. 解答は、解答用紙 (マークシート) に記入してください。筆記 ① ② ③ ・リスニングの解答欄は解答用紙の A 面 (表面)、筆記 ④ の解答欄は、解答用紙の B 面 (裏面) にあります。解答用紙以外に記入した解答は、すべて無効となります。問題冊子にはメモをしてもかまいませんが、後で解答用紙に解答を書き写す時間はありません。
4. 問題内容に関する質問は一切受けつけません。
5. 不正行為をした場合は、答案は無効となります。
6. 他の受験者に迷惑をかける行為を禁じます。
7. リスニングテストの準備時間、およびリスニングテスト中に教室外へ出た場合は、その後教室に戻りテストを受けることはできません。
8. 携帯電話などは必ず電源を切ってカバンにしまい、絶対に使用しないでください。
9. 電子機器 (ウェアラブル端末を含む) の使用を禁じます。
10. 携帯電話などの着信音・バイブ音、その他試験を妨げる音を発生させた場合は、失格とすることがあります。
11. 試験終了後、問題冊子は持ち帰ってください。
12. 採点結果等については、一切異議申し立てはできません。
13. この試験問題の複製 (コピー) を禁じます。また、この試験問題の一部または全部を協会の許可なく他に伝えたり、漏えい (インターネット上に掲載することを含みます) することを禁じます。

問題冊子の開け方

英検ウェブサイト上での合否結果閲覧について

英検協会が運営する「英ナビ!」サイトと連携した新しい合否閲覧サービスをご案内します。従来のサービスより快適に合否結果を閲覧いただけます。

一次試験の合否結果閲覧は 2/12(火) 12:00 から開始 となります。合否結果の公開時間は級別に異なります。

なお、新サービスをご利用いただくためには「英ナビ!」への会員登録が必要です。英検対策に役立つサービスを提供している「英ナビ!」を是非ご利用ください。

(<https://www.ei-navi.jp>)

【本会場で受験の方】

合否結果閲覧には、英検 ID とパスワードが必要です。

◆英検 ID は本人確認票に記載されています。

◆パスワードは本人確認票に記載されています。ネット申込の方は、申込時に使用したパスワードです。

※本人確認票は二次試験でも使用します。試験後も大切に保管してください。

筆記用具などを使って開けてください

1

To complete each item, choose the best word or phrase from among the four choices. Then, on your answer sheet, find the number of the question and mark your answer.

- (1) The house was so old that the walls had begun to (). When someone was almost hit by a falling brick, the owner decided the house would have to be taken down.
1 sharpen **2** crumble **3** vibrate **4** stimulate
- (2) In the 1800s, European () went to Africa to convert people to Christianity. Upon returning home, many of them wrote accounts of their experiences.
1 janitors **2** stewards **3** tailors **4** missionaries
- (3) **A:** I need some of that medicine, please.
B: Sorry, but I can't sell this to you unless you have a () from your doctor.
1 prescription **2** detection **3** sensation **4** dimension
- (4) Anyone who is () to become an Olympic athlete knows that it takes a tremendous amount of effort to achieve this dream.
1 striving **2** distributing **3** surrendering **4** discouraging
- (5) The company president said that due to the severe drop in sales, he felt () to cut the number of staff.
1 publicized **2** amended **3** devised **4** compelled
- (6) A fire broke out on Kruger Street last night. It took firefighters almost 12 hours, but they eventually managed to get the () under control.
1 clamp **2** drizzle **3** comet **4** blaze
- (7) Because of a late delivery of raw materials, the factory's workers were () for several days, causing production to fall behind schedule.
1 idle **2** corrupt **3** petty **4** cordial
- (8) **A:** Did Jim come to your birthday party?
B: No, he didn't. And what's more, he didn't even have the () to let me know that he wasn't coming. I'm really angry with him about it.
1 tension **2** limitation **3** decency **4** accuracy
- (9) After inspecting the old dam, engineers reported that urgent measures to () it were needed. Without them, the dam could collapse.
1 refund **2** relay **3** reinforce **4** reserve

- (10) The presidential candidate won a () victory, receiving over 80 percent of the votes. It was clear that the country was in favor of his proposed policy changes.
 1 decisive 2 grouchy 3 parasitic 4 spherical
- (11) It snowed for two hours this morning, but the snow did not () at all. The children are disappointed there is no snow to play in.
 1 starve 2 accumulate 3 testify 4 litter
- (12) Dr. Smith told the patient his tooth had () so badly she would have to pull it. She warned him to start taking better care of his teeth.
 1 hovered 2 bragged 3 decayed 4 conspired
- (13) The young violinist shows promise but needs to () her technique. Her teacher feels that, with more practice, she could one day perform professionally.
 1 refine 2 amuse 3 shred 4 accompany
- (14) The flowers in Naoko's garden are particularly (). They can often be smelled from all the way across the street.
 1 transparent 2 sterile 3 crunchy 4 fragrant
- (15) When the boy admitted to spreading () rumors about his teacher, the principal made him write a letter to apologize for what he had done.
 1 heroic 2 malicious 3 soaked 4 delighted
- (16) Victor has begun to feel () of his long commute to work. He says he will look for an apartment closer to his office.
 1 weary 2 verified 3 cheery 4 rash
- (17) A recent environmental concern is the () decrease in the world's wild bee population. This huge loss could seriously affect plants' ability to reproduce.
 1 drastic 2 nosy 3 secretive 4 impaired
- (18) Police found the stolen jewelry in a hidden () built inside the trunk of the suspected thief's car.
 1 oath 2 foe 3 symptom 4 compartment

- (19) After the carpenter hit his thumb with the hammer by mistake, it began to (). Eventually, the thumb was almost twice its normal size.
1 liquefy **2** swell **3** lounge **4** brace
- (20) Gregor installed solar panels on his house's roof. They usually generate more electricity than he uses, and he can sell this () to the electric company.
1 banner **2** seal **3** assumption **4** surplus
- (21) A lack of rain in California has put a () on the state's ability to supply enough water to everyone. Officials have begun restricting people's water usage.
1 torch **2** bribe **3** strain **4** gem
- (22) Maurica's husband is a bad driver, but she never tells him so because she does not want to () any trouble. She knows he would get angry if she said anything.
1 stir up **2** count on **3** shut out **4** lock in
- (23) *A:* Do you think the owner will accept our offer to buy the house?
B: I don't know. I guess it () whether he receives a better offer from someone else.
1 gets away with **2** comes down to
3 keeps up on **4** stands up to
- (24) As Sam sat on the tropical beach, all of the stress from his job seemed to (), and he was able to relax and enjoy his vacation.
1 fall away **2** cut in **3** fire up **4** try out
- (25) *A:* Alexandra, did you () for the encore at the concert last night? I had to leave a bit early.
B: I did, Ben. The group performed three more songs, which was great!
1 stick around **2** step down **3** play up **4** take off

Read each passage and choose the best word or phrase from among the four choices for each blank. Then, on your answer sheet, find the number of the question and mark your answer.

REDD+

First introduced in 2005, REDD+ (Reducing Emissions from Deforestation and Forest Degradation) is a UN-supported, performance-based payment system designed to reduce greenhouse gas emissions. The plan involves paying developing countries not to cut down trees. Additional financial incentives are provided to plant trees in areas that have been logged or where there were no trees before. (26), countries receive funding of various amounts based on how much they can reduce overall deforestation.

REDD+ has enjoyed some success in reducing logging. Brazil, for example, cut logging by 70 percent, while China, thanks to a combination of various programs, has seen forest areas increase by an average of 3 million hectares a year since 2000. REDD+ seems to have had less success in African nations, where deforestation is reported to be on the rise. However, progress (27). Information about forest resources in Africa is often unreliable, and the deforestation rate across the continent is thought to be exaggerated, with the real figure possibly being half of what is reported.

Critics say REDD+ emphasizes (28). Because of REDD+, countries may start logging healthy, mature forests and replacing them with plantations of fast-growing eucalyptus trees. This makes economic sense since the countries are paid based on the number of trees planted. However, new plantations are less effective than mature forests at absorbing CO₂, so there is a net loss in terms of environmental value. The priority, therefore, should be protecting existing high-value forests instead of replacing them with trees that are less efficient at reducing greenhouse gases.

(26) 1 Nevertheless 2 By contrast 3 Surprisingly 4 In short

(27) 1 has led to conflict between countries
2 has caused financial losses
3 could reduce some countries' territory
4 can be difficult to measure

(28) 1 quantity over quality
2 long-term goals over immediate ones
3 forests over their inhabitants
4 natural resources over economic growth

Summer Jobs

It has long been a tradition for American high school students to spend their summer vacation working. As well as being a chance to earn money, the summer job has generally been regarded as an important step in the growing up process because it teaches responsibility and interpersonal skills. (**29**), changes in both young people's attitudes and the labor market have strongly impacted the number of teens employed during the summer. Today, approximately one-third of teens have summer jobs—a figure that is roughly half what it was just four decades ago.

Parents once encouraged their children to take summer jobs to gain basic skills that would serve them later in the working world. However, many students today (**30**). The Bureau of Labor Statistics found that in the last 20 years, the number of 16-to-19-year-olds enrolled in summer school has tripled. As college degrees have become essential for career success and tuition fees continue to rise, many students have realized that taking advanced classes during the summer to win scholarships can be more beneficial than working at a minimum-wage job.

Another factor behind the decreasing popularity of summer jobs may be (**31**). Recently, many teenagers have been choosing to do unpaid internships during the summer. As older adults are remaining in the workforce longer than ever, many young graduates have been losing out to these more experienced applicants even for entry-level positions. Consequently, the chance to acquire career-specific skills has become more appealing. With the US economy strengthening, however, the traditional summer job could begin to make a comeback.

-
- | | | |
|-------------|---|-----------------------|
| (29) | 1 In other words | 2 Despite this |
| | 3 For example | 4 Otherwise |
| (30) | 1 are making more money at summer jobs | |
| | 2 have started working at a younger age | |
| | 3 are more concerned about education | |
| | 4 make a serious error | |
| (31) | 1 worsening academic performance | |
| | 2 growth in the economy | |
| | 3 a decrease in employment opportunities | |
| | 4 shifts in moral values | |

Read each passage and choose the best answer from among the four choices for each question. Then, on your answer sheet, find the number of the question and mark your answer.

Stranded Whales

In January and February 2016, more than two dozen male sperm whales were found washed up on European beaches around the North Sea. These whales had entered shallow waters with sand or mud on the bottom, which prevented them from using sonar clicks to navigate. They became trapped in these shallow areas, and without enough water to support their tremendous weight, their lungs collapsed and the whales died of respiratory failure. It was initially thought the whales had entered the areas in pursuit of squid, a favorite prey food, or that they might have swallowed fatal quantities of plastic. However, these theories were quickly disproved.

After further research, an alternative explanation emerged. Whales use both sonar and Earth's magnetic field to navigate. In December 2015, when sperm whales were migrating south from the Norwegian Sea, the aurora borealis was visible. These bright lights in the northern sky are caused by storms that occur on the sun, and they are a sign that these storms are strongly interfering with Earth's magnetic field. Such storms can confuse migratory animals such as birds, and probably also caused whales relying on the magnetic field to become disoriented and enter shallow waters.

All the stranded whales were young males. In general, female sperm whales and their babies remain in waters around the equator. Males, on the other hand, migrate in what are known as "bachelor groups" once they become independent between the ages of 10 and 15. Older, experienced males are more solitary and travel alone, leaving the inexperienced males to fend for themselves. Scientists believe the young males were relying on magnetic sensing and did not realize they had strayed from their migration route. In contrast, more experienced whales would have known to use other navigation methods, such as sonar clicks, to reorient themselves before it was too late.

(32)

What happened to the whales that were found on North Sea beaches?

- 1** The large amounts of sand and mud in the waters they swam into entered their lungs and affected their breathing.
- 2** The squid they were hunting led them to unfamiliar territory, where they consumed harmful plastic waste.
- 3** They swam into shallow areas where their heavy weight resulted in their being unable to breathe.
- 4** They consumed a type of animal that happened to be toxic, making them too ill to swim to deeper waters.

(33)

What is true of the aurora borealis in the context of the passage?

- 1** It was so much brighter than usual that many sea animals became distracted by the lights and were unable to orient themselves.
- 2** It was a result of the same phenomenon that had likely caused the whales to become confused and navigate incorrectly.
- 3** Its presence over the Norwegian Sea caused many birds to fly toward the North Sea, which led the whales to follow.
- 4** Its appearance farther south than usual weakened the whales' ability to use sonar clicks to confirm the depth of the waters.

(34)

If the whales had been older, they would have

- 1** realized that they had traveled off course and tried to find their way again using a different method.
- 2** been less independent and therefore swum back toward the equator to return to the females.
- 3** known to follow the lead of the females, which generally travel more and have better navigation skills.
- 4** been unable to use sonar clicks to request help from other whales that were nearby.

Forecasting the Big Blow

Unlike many extreme weather events, such as hurricanes and severe snowstorms, geological phenomena such as earthquakes and volcanic eruptions are difficult to predict. In recent years, however, a number of tools have been developed to help scientists make correct judgments of the risk of these events. Modern methods of analysis that use real-time satellite data to continuously revise computer models have greatly improved scientists' understanding of geological activity. Additionally, scientists now use satellite data to measure slight changes in the landscape around volcanoes. Earth's crust can rise a millimeter at a time as it is pushed up by the pressure of the hot liquid rock, or magma, below. Though this cannot be perceived by visual observation on the ground, satellite cameras far above can determine whether a volcano's surface is rising—an indicator of a possible eruption.

Scientists are particularly concerned about caldera volcanoes. These are large formations created by ancient volcanoes that collapsed inward after erupting. Calderas sit above pools of magma that can erupt with little warning. Because the rich soil around such volcanoes tends to attract dense human settlement, eruptions can be especially deadly. Calderas are not cone-shaped like typical volcanoes, so the possibility of an eruption often simply does not occur to people. Moreover, their fairly flat shape poses an additional risk: unlike with cone-shaped volcanoes, which generally erupt from the top of the cone, there is no way to tell from where on the surface of a caldera volcano the magma will escape, and it may even come out of multiple spots.

Campi Flegrei, west of the Italian city of Naples, is a caldera volcano that scientists are examining closely, as more than 700,000 people live within its “danger zone.” In recent years, patterns of land rise there have been similar to those that occurred before caldera eruptions in other parts of the world, indicating that the crust may be near the breaking point. The Italian government has raised alert levels but has hesitated to take further steps such as evacuating residents. Experts cannot say with certainty whether Campi Flegrei will erupt soon, or likewise give any timeline for a future eruption. Residents of the area, having experienced numerous false alarms, do not want to evacuate when an eruption is far from certain. Furthermore, property values have fallen when past warnings were issued, allowing real estate investors to buy land at bargain rates. This has made some residents suspicious of the motive behind emergency warnings.

(35)

What is one example of a recent advance in predicting volcanic eruptions?

- 1** Computer analysis of real-time data has proved more useful than satellite measurements.
- 2** Satellite data showing changes in the level of Earth's crust can indicate volcanic activity.
- 3** Computer models allow scientists to calculate the temperature of magma in a given location.
- 4** Satellite data gathered during extreme weather events can be useful in predicting the size of eruptions.

(36)

In the second paragraph, what does the author of the passage say about caldera volcanoes?

- 1** Their relatively flat shape can lead people to overlook the fact that they could erupt.
- 2** They are more likely than typical volcanoes to show obvious warning signs before they erupt.
- 3** Their shape makes it clear to scientists that they are not particularly active and are therefore safe to study.
- 4** The fact that they are poorly suited for human habitation means they are ideal places to carry out research.

(37)

What is suggested about Campi Flegrei?

- 1** The government will only declare a state of emergency if there is evidence of land rise occurring.
- 2** Because so much focus is put on the possibility of an eruption, local residents are quick to react to emergency warnings.
- 3** The government is concerned that scientists have not considered all the possible factors that could lead to an eruption.
- 4** Even though the volcano has been showing signs it could erupt, it may be difficult to convince local residents of the actual danger.

Debating a Teaching Approach

In recent decades, teachers wanting to break away from traditional classroom methodologies have altered their teaching approach to conform to the “learning styles” of their students. The idea is that students learn better when they are taught in a way that corresponds with their preferred style. For example, “visual learners” can comprehend information more easily when they are presented with diagrams or illustrations, whereas other students may learn more easily through listening, or by working with their hands.

The practice of categorizing students by learning style has caught on: 96 percent of teachers surveyed recently said they believed in the idea. It is not difficult to see why such a system would be attractive to teachers seeking to better meet their students’ needs. The theory has also been embraced by parents whose children are struggling in school—the idea that their child may perform poorly on written tests because they are actually “picture smart” or “music smart” is appealing. As the learning-styles theory has grown in popularity, dozens of supposed styles have been identified, and an entire industry has grown up around the idea, with conferences being held across the world and libraries offering materials intended to help educators teach different types of learners.

One would think that a method with such a significant influence on classroom approaches would have extensive research behind it. However, there is little solid proof that teaching to a student’s strengths is an effective practice. In fact, researchers have found major flaws in methods used to quantify learning styles. The idea is based on the classification of people into specific types of learners, but studies have found very little evidence that people actually fall into distinct groupings in this way. “I think as a purely reflective exercise, just to get you thinking about your study habits, [learning styles] might have a benefit,” says Polly Husmann, an assistant professor at Indiana University School of Medicine. “But the way we’ve been categorizing these learning styles doesn’t seem to hold up.”

While students often express and demonstrate preferences for specific methods, studies show that what actually helps them learn better is for the educator to ensure the teaching approach suits the material being taught. University of Virginia professor Daniel Willingham says, “People’s alleged learning styles don’t count for anything in accounting for task performance, but the effect of a strategy on a task is huge.” Learning a new language, for example, is easier when the material is reviewed verbally, but math concepts such as geometry are better suited to visual methods. In addition, all students can benefit from lessons that combine different approaches to make material easier to understand. For example, a math teacher can encourage students to listen, read, and draw diagrams to solve problems. The current focus on matching teaching methods to specific types of learners has taken such a hold, however, that Willingham believes the only way to counter it is to revise the textbooks on educational theory. Only when the theory of learning styles is no longer presented as a valid educational approach will it disappear from the classroom.

- (38) The author of the passage mentions “visual learners” in the first paragraph to
- 1 help explain the theory that including visual study materials in every subject taught at school is beneficial for all students.
 - 2 offer an example that shows why presenting students with too many visual aids can weaken their listening and verbal skills.
 - 3 illustrate the concept that each student has a favored method of acquiring new information and learns better in response to it.
 - 4 show that most students want educators to keep utilizing traditional methods of teaching certain subjects.
-
- (39) What is one reason some parents support the learning-styles theory?
- 1 It implies that their child may possess special skills or abilities that are not reflected in their performance on written tests.
 - 2 It encourages their child to apply a range of different approaches when solving problems outside of the classroom.
 - 3 It allows them to take part in their child’s school life even if they themselves have an academic history of performing poorly on tests.
 - 4 It has been shown to noticeably improve a child’s ability in subjects such as art or music.
-
- (40) According to researchers, the learning-styles theory
- 1 has been misused by teachers, who have failed to use it to separate students into groups based on their study habits.
 - 2 could be improved by expanding the definitions of individual learning styles to include a wider variety of learners.
 - 3 has been adopted by instructors in spite of a lack of evidence that shows such styles actually exist.
 - 4 gained popularity only after data showed that its application by teachers results in increased academic achievement by students.
-
- (41) What point is supported by Daniel Willingham’s statement?
- 1 The match between the material being taught and the teaching approach matters more than teaching to students’ preferred learning styles.
 - 2 If the idea of learning styles continues to gain acceptance, there will likely be major changes to textbooks on educational theory.
 - 3 The connection between textbooks on educational theory and actual methods used by teachers is not clear enough.
 - 4 Mathematics is one area where teachers should make the effort to change their teaching style based on students’ preferences.

4

English Composition

- Write an essay on the given TOPIC.
- Use TWO of the POINTS below to support your answer.
- Structure: introduction, main body, and conclusion
- Suggested length: 120–150 words
- Write your essay in the space provided on Side B of your answer sheet.
Any writing outside the space will not be graded.

TOPIC

Agree or disagree: Japanese companies should hire more foreign workers

POINTS

- *Aging population*
- *Costs*
- *Cultural differences*
- *Globalization*

MEMO

Listening Test

There are three parts to this listening test.

Part 1	Dialogues: 1 question each	Multiple-choice
Part 2	Passages: 2 questions each	Multiple-choice
Part 3	Real-Life: 1 question each	Multiple-choice

※ Listen carefully to the instructions.

Part 1

- No. 1**
- 1** He is looking for a new apartment.
 - 2** He is saving money for medical school.
 - 3** He does not want to get further into debt.
 - 4** He cannot afford to pay his rent.
- No. 2**
- 1** Their children have grown up and moved out.
 - 2** Their home is too far from their workplaces.
 - 3** They need money for their children's education.
 - 4** They can make a profit due to the booming market.
- No. 3**
- 1** Visit Jun's house to see his daughter.
 - 2** Look at pictures of Jun's daughter.
 - 3** Take some pictures of her children.
 - 4** Work on her own website.
- No. 4**
- 1** Jennifer is too young to date.
 - 2** Jennifer's boyfriend is too old.
 - 3** Jennifer is irresponsible.
 - 4** Jennifer needs more friends.

- No. 5**
- 1** Her appointment has been canceled.
 - 2** Armand White is out of the office today.
 - 3** There are no positions available.
 - 4** She can leave her résumé with him.
- No. 6**
- 1** The construction will finish later than expected.
 - 2** The scenic route will also become busy.
 - 3** Her journey to work will take longer.
 - 4** Her commuting costs will increase.
- No. 7**
- 1** To discuss a sales presentation.
 - 2** To change the contract details.
 - 3** To reschedule an appointment.
 - 4** To invite her to a conference.
- No. 8**
- 1** Show the woman how to make a transfer.
 - 2** Direct the woman to another branch.
 - 3** Take the woman to an available clerk.
 - 4** Keep the woman's place in the line.

Listening Test

- No. 9**
- 1** She does not have much experience.
 - 2** She may find it too stressful.
 - 3** It will be difficult to find childcare.
 - 4** There are not many suitable jobs available.
- No. 10**
- 1** The woman should not be too concerned.
 - 2** The woman should try to get more vitamin D.
 - 3** The woman should do more exercise.
 - 4** The woman should consult a doctor.
- No. 11**
- 1** Get a job instead of an internship.
 - 2** Look for an internship with a flexible schedule.
 - 3** Postpone the internship until his research is finished.
 - 4** Find an internship that will broaden his knowledge.
- No. 12**
- 1** Raheem spends too much money on bowling.
 - 2** Raheem should not have lent Alex money.
 - 3** Alex should borrow from a friend with more money.
 - 4** Alex should not go to the club tonight.

Part 2

(A) *No. 13*

- 1** He often began his races slowly.
- 2** He was a difficult horse to control.
- 3** He usually finished in either first or last place.
- 4** He was the first Triple Crown winner.

No. 14

- 1** He had been injured in his final race.
- 2** He had died from a rare heart disease.
- 3** His death could have been prevented.
- 4** His heart was much larger than normal.

(B) *No. 15*

- 1** It had many wealthy engineering students.
- 2** It became the largest college in New Jersey.
- 3** It was struggling financially.
- 4** It closed down temporarily.

No. 16

- 1** He thought his money would have more impact there.
- 2** He studied there before he became rich.
- 3** He believed Harvard and Yale were overrated.
- 4** He had been unable to attend college himself.

Listening Test

(C) **No. 17**

- 1** They treated them for injuries.
- 2** They helped them regain weight.
- 3** They looked for physical changes.
- 4** They trained them for further missions.

No. 18

- 1** Their organs could cope well with weightlessness.
- 2** Their behavior was suited to space travel.
- 3** They could fit easily in a space capsule.
- 4** They were capable of learning tasks quickly.

(D) **No. 19**

- 1** They are motivating people to stay fit.
- 2** They have helped young actors gain popularity.
- 3** They can make people feel better about themselves.
- 4** They have led to increased sales of smartphones.

No. 20

- 1** People sometimes put themselves in danger to take selfies.
- 2** People often harm wild animals while taking selfies.
- 3** Selfies encourage people to spend too much time online.
- 4** Selfies can lead to online bullying.

- (E)** **No. 21**
- 1** It is better for the natural environment.
 - 2** It is usually faster than driving.
 - 3** They wanted to change to a healthier lifestyle.
 - 4** They receive financial support from the city.

- No. 22**
- 1** It has repaired old cycle lanes.
 - 2** It has created cycle lanes with no traffic signals.
 - 3** It has removed the speed limit for bicycles.
 - 4** It has adjusted the timing of its traffic signals.

-
- (F)** **No. 23**
- 1** Help employees stay awake while working.
 - 2** Prevent employees from visiting social media sites.
 - 3** Tell employees when to take breaks.
 - 4** Track employees' computer activity.

- No. 24**
- 1** Doing easy work during a break can be beneficial.
 - 2** It is good to chat with coworkers during a break.
 - 3** Taking breaks too often can make people tired.
 - 4** It is better to finish a difficult task before resting.

Listening Test

Part 3

(G) No. 25

Situation: You are a professor who will take a group of students on a one-month study trip to the UK. An administrator at your university tells you the following.

Question: What should you do for the Chinese student in your group?

- 1** Apply for the visa on his behalf.
- 2** E-mail his flight details to the embassy.
- 3** Give him an official letter for the embassy.
- 4** Help him make his flight arrangements.

(H) No. 26

Situation: A do-it-yourself bookshelf kit you bought recently is missing some screw holes. You want to keep the bookshelf and do not want to pay more money. You call the store.

Question: What should you do?

- 1** Wait for a new unit to be available.
- 2** Get holes put in at the store.
- 3** Make sure you have the receipt.
- 4** Send the whole bookshelf back to the store.

(I) No. 27 *Situation:* You are at a comic-book convention. You want to attend the panel discussion. You are a vegetarian. You hear the following announcement.

Question: Where should you get your lunch?

- 1 Mary Jane's.
- 2 The Mediterranean restaurant.
- 3 The Indian food stand.
- 4 The first-floor café.

(J) No. 28 *Situation:* Your car is leaking oil. The problem began after you had your oil changed. When you call ATC Auto Repairs, the shop manager tells you the following.

Question: What should you do first?

- 1 Drive back to the shop.
- 2 Check your oil level.
- 3 Tighten the oil-tank plug.
- 4 Ask a mechanic to come to your house.

(K) No. 29 *Situation:* You are a foreigner living in the United States. You hire a tax expert to help file your taxes, and he gives you the following advice.

Question: What should you do to complete your taxes?

- 1 Provide a copy of your new visa.
- 2 Complete an application for Medicare.
- 3 Report your rental income from Japan.
- 4 Obtain the required bank document.

■一次試験の結果について■

1) 英検ウェブサイトでの解答速報 (<http://www.eiken.or.jp>)

* 解答速報 1月28日 13:00以降

2) 結果通知方法

◆個人申込みの場合

一次個人成績表に可否結果を記載して、2月19日までに送付します（合格の場合は、一次個人成績表の右上部分が二次受験票になります）。未着の場合は2月19日以降に英検サービスセンター03(3266)8311（平日9:30～17:00）までお問い合わせください（お問い合わせの際には個人番号もお知らせください）。

◆団体申込みの場合

一次個人成績表は2月19日までに申込責任者あてに送付します（個人あてには送付しません）。

■二次試験について（一次試験合格者のみ）■

1) 試験日 A日程：2月24日（日） B日程：3月3日（日）

- 二次試験の受験日は、A日程・B日程のうち、申込方法・希望受験地等に基づき協会が指定します。試験日・受験会場・集合時間は二次受験票（一次個人成績表の右上部分）で通知します。これを切り離して受験会場にお持ちください。
- いかなる場合も二次受験票で指定された試験日・受験会場・集合時間での受験となり、変更はできません。
- 日程区分については、英検ウェブサイトの【二次試験のA／B日程の区分けについて】をご確認ください。
- ダブル受験（隣接した2つの級を一緒に受験）の場合、それぞれの級について二次受験票に記載の日程での受験となり、級により異なる日程での受験となる場合があります。
- 年齢は申込時に申請した生年月日に基づいて算出します。（一次試験の答案に異なる生年月日を記入されても反映されません）。
- 申込情報に不備がある場合、協会が指定した日時での受験となり、【二次試験のA／B日程の区分けについて】のとおり日程とならない場合があります。
- 一部特別会場（海外・離島等）、障がい者特別措置にて二次試験を受験する場合についてはA日程とします。

2) 受験地（希望の受験地を選べます）

- 下記の二次試験受験地番号表をみて、希望の受験地番号を解答用紙（準会場で受験している場合は志願票）の所定欄に記入・マークしてください。
