

2014-3

Grade

1

実用英語技能検定

主催：公益財団法人 日本英語検定協会

後援：文部科学省

1 級

2015 年 1 月 25 日(日) 実施

■ 試験時間

筆記試験 (100分)

リスニングテスト (約35分)

■ 注意事項

1. 試験開始まで、この問題冊子を開いてはいけません。
2. 解答は、解答用紙（マークシート）に記入してください。
筆記 1 2 3 ・リスニングの解答欄は解答用紙のA面（表面）、筆記 4 の解答欄は、解答用紙のB面（裏面）にあります。解答用紙以外に記入した解答は、すべて無効となります。問題冊子にはメモをしてもかまいませんが、後で解答用紙に解答を書き写す時間はありません。
3. 問題内容に関する質問は一切受けつけません。
4. 不正行為をした場合は、答案は無効となります。
5. 他の受験者に迷惑をかける行為を禁じます。
6. リスニングテストの準備時間、およびリスニングテスト中に教室外へ出た場合は、その後教室に戻りテストを受けることはできません。
7. 携帯電話・PHS・電子音などの出る時計・その他試験を妨げる音の出る機器などの電源は必ず切って机の上に置き、絶対に使用しないでください。着信音・バイブ音等を発生させた場合は、失格とすることがあります。
8. 多機能付時計は時計としてのみ使用してください。
9. 試験終了後、問題冊子は持ち帰ってください。
10. 採点結果等については、一切異議申し立てはできません。
11. この試験問題の複製（コピー）を禁じます。また、この試験問題の一部または全部を協会の許可なく他に伝えたり、漏えい（インターネット上に掲載することを含みます）することを禁じます。

1

To complete each item, choose the best word or phrase from among the four choices. Then, on your answer sheet, find the number of the question and mark your answer.

- (1) When a girl ran out in front of Phil's car, he did not have time to stop but managed to () to avoid hitting her.
1 appease **2** crave **3** swerve **4** denounce
- (2) Samantha's remarks at her father's funeral surprised those in attendance. They had expected her to deliver a () that praised his virtues.
1 prophecy **2** genealogy **3** progeny **4** eulogy
- (3) Although Melvin had supported the ruling party for years, he was so frustrated by the recent corruption scandals that he switched his () to the main opposition party.
1 dissonance **2** temperance **3** severance **4** allegiance
- (4) In the hope of increasing sales of his new album, the singer held a free open-air concert as a publicity ().
1 stunt **2** mob **3** nick **4** dud
- (5) **A:** Why did you ignore me on campus yesterday, Gillian? You just walked right past me.
B: Did I? Sorry. When I'm listening to music on my MP3 player, I'm completely () to my surroundings.
1 oblivious **2** laborious **3** fastidious **4** ostentatious
- (6) Since Gus is now three months () in paying rent, his landlord has ordered him to move out by the end of the month.
1 prodigious **2** delinquent **3** vacuous **4** cognizant
- (7) Inspectors found conditions at the prison (). There were rats everywhere, the toilets were dirty, and prisoners were only given one small meal a day.
1 appalling **2** illustrious **3** pedantic **4** impeccable
- (8) The diplomat's birthday banquet was a grand occasion. Everyone was dressed in formal (), and VIPs attended from around the country.
1 decor **2** attire **3** stigma **4** gimmick
- (9) In () to the clients visiting from Paris, the chairman of the company delivered part of his welcome speech in French.
1 prowess **2** conjecture **3** remnant **4** deference

- (10) The managing director warned new employees that any leaking of confidential information would have serious ().
 1 catalysts 2 condolences 3 repercussions 4 fissures
- (11) The government announced a project designed to () the economically depressed inner city by creating new jobs and a more attractive urban landscape.
 1 regenerate 2 recriminate 3 twitch 4 ambush
- (12) The day after a fire destroyed her home, Myrna returned to () what she could of her belongings. Unfortunately, most things had been burned beyond recognition.
 1 sanctify 2 scoff 3 salvage 4 surmount
- (13) Steve is (). No matter how bad things may sometimes be at the office, he always manages to remain cheerful and enthusiastic.
 1 insubordinate 2 irrefutable 3 introspective 4 irrepressible
- (14) *A:* Mark, what do you think of the new Italian restaurant on Leonard Street?
B: I've only been there once. The lasagna was great, but I can't () for the rest of the menu.
 1 resuscitate 2 vouch 3 rendezvous 4 squirm
- (15) Many people find tablet computers a useful () to their desktops, but not a completely adequate replacement.
 1 penchant 2 adjunct 3 pittance 4 implant
- (16) Octavio is extremely scared of flying. His friends try to () his fear by telling him it is the safest way to travel, but he insists he will never get in an airplane.
 1 annex 2 consecrate 3 allay 4 vacillate
- (17) When an () between two motorists who had crashed into each other began to turn violent, a passerby stepped in to calm them down.
 1 altercation 2 oration 3 abomination 4 infatuation
- (18) *A:* I don't think Judy likes me anymore. I'm sure she's going to end our relationship.
B: That's just a () of your imagination. She always says such nice things about you.
 1 tirade 2 siphon 3 figment 4 lesion

- (19) Our history professor gives us a lot of () when we write research papers, such as allowing us to choose our own topics.
1 marrow 2 frenzy 3 poise 4 latitude
- (20) Hoping to () support for his education policies, the governor began making a series of visits to local schools.
1 pester 2 garner 3 beguile 4 extricate
- (21) Dressed in a pink suit and floppy green hat, the clown looked extremely () in a room full of business executives.
1 propitious 2 gullible 3 conspicuous 4 bountiful
- (22) After the coach's talk, the members of the volleyball team were so () that they played their best game of the season.
1 eased off 2 keyed up 3 staked out 4 harped on
- (23) After Mike lost his job, he had to () his retirement savings to pay his bills. He was relieved when he got a new job and could start saving again.
1 dip into 2 revel in 3 knock back 4 cut across
- (24) From the first round of the fight, the boxers () each other with all their energy. By the end, they were both nearly too tired to stand.
1 went at 2 pushed for 3 swore by 4 pried out
- (25) When the young executive got his first bonus, he () his apartment with some new furniture and expensive wallpaper.
1 squared off 2 held to 3 stubbed out 4 did up

Read each passage and choose the best word or phrase from among the four choices for each blank. Then, on your answer sheet, find the number of the question and mark your answer.

Photography and Privacy in Hungary

Following legislation passed in March 2014, anyone photographing another person in Hungary without obtaining prior consent is in violation of the law. Before taking a picture of people relaxing in a park, for example, the individual taking the photograph must now be granted permission by all of those people. The new law does not apply, however, to photos of public figures or of crowds at public events. The Hungarian officials who introduced the legislation say it (26). Efforts to protect the personal rights of individuals prompted the introduction of a statute in the country's civil code in 1959 requiring photographers to obtain consent from subjects before publication of a photo; the law, however, did not bar them from taking the pictures in the first place.

Under the current legislation, any person who accidentally stumbles into a photo could, theoretically, sue for damages. Because of this, some people worry the Hungarian legal system will be overwhelmed with lawsuits against both professional and amateur photographers. In addition, opponents claim the law sets unreasonable limits on freedom of expression and insist it will impede photojournalists from (27). Photo editor Marton Magocsi argues that "having to ask for permission beforehand is quite unrealistic in any reportage situation." Documenting fast-breaking events, like riots or military actions, would become very difficult, as it would be impossible to get permission before taking a time-sensitive shot. Even a few lawsuits instigated by citizens could make reporters extremely hesitant to photograph such situations.

Some people see the new law as the beginning of a shift to a system of government in which public servants are (28). Photojournalist Akos Stiller says the law "puts a huge distance between the state and the citizen," as it will now be illegal to film or photograph the actions of law enforcement officials, who do not fall under the banner of "public actors." Although it remains to be seen how, and to what end, the government decides to implement the legislation, some commentators feel that if it is used to shield those with power from prosecution for abuse or brutality, democracy in Hungary could be in peril.

- (26) 1 helps professionals do their jobs
 2 will not be strictly enforced
 3 expands upon an existing regulation
 4 does not go far enough
- (27) 1 sharing the credit for news stories
 2 protesting their employers' policies
 3 being able to file lawsuits
 4 covering the news accurately
- (28) 1 not held accountable for their actions
 2 prevented from exercising their power
 3 associated with the military
 4 required to perform more tasks

Zero Tolerance for Crime

Under Mayor Rudy Giuliani, New York City experienced a dramatic plunge in crime rates in the late 1990s. Many attribute this achievement to the mayor's "zero tolerance" approach to law enforcement. Giuliani's policies were influenced by the "broken windows" theory of criminal behavior advanced by criminologists James Q. Wilson and George Kelling in the 1980s, which advocated moving away from the traditional policy of (29). Strictly enforcing laws against offenses such as trespassing and vandalism, Wilson and Kelling argued, creates a sense of public order that deters criminals from committing major offenses.

University of California, Berkeley law professor Franklin Zimring has a different perspective. He argues that the city's (30) formed the cornerstone of its success. Rather than pursuing perpetrators of low-level offenses across the board, police aggressively targeted individuals they suspected of more serious violations, using minor crimes as a pretext for making arrests. In particular, they focused on "hot spots"—places with consistently high crime rates. Wilson and Kelling, in contrast, dismissed the worst areas of cities as being beyond improvement, advocating instead the concentration of resources in neighborhoods not completely given over to violence and crime. But, as Zimring points out, New York experienced a staggering 82 percent drop in homicides, and such marginally safe neighborhoods "aren't where the homicides are."

One tactic that emerged from New York's anticrime strategy has (31) in recent years. "Stop-and-frisk," which was adopted and expanded by Giuliani's successor, Michael Bloomberg, allows police officers to stop anyone on the street and search them for weapons or illegal substances. Though such searches are ostensibly based on credible suspicion, civil rights groups claim the practice unfairly targets minorities, violating their right to equal protection under the law. Of the more than 4 million citizens stopped by police since 2002, around 90 percent have been black or Latino, even though the city's population is nearly half white. In 2013, a federal judge ruled stop-and-frisk unconstitutional. Although the ruling is under appeal, the current mayor, Bill de Blasio, has himself vowed to reform the racial-profiling aspect of what he has deemed a "broken and misused" policy.

- | | | |
|------|---|--|
| (29) | 1 mainly pursuing serious crimes
3 targeting repeat offenders | 2 investigating numerous suspects
4 relying heavily on eyewitnesses |
| (30) | 1 partial adoption of the approach
3 expansion of the police force | 2 relaxed attitude toward crime
4 publication of crime statistics |
| (31) | 1 largely been forgotten
3 proven the most effective | 2 come under attack
4 gained support elsewhere |

Read each passage and choose the best answer from among the four choices for each question. Then, on your answer sheet, find the number of the question and mark your answer.

Rhodesia's Long Road to Independence

The early 1960s saw numerous African countries gain independence, as colonizing European nations began to cede control to local governments. The British colony of Rhodesia (present-day Zimbabwe) had been largely self-governing, with minimal guidance or interference from Britain, since 1926. Despite making up only around 5 percent of the population, white Rhodesians held virtually all the political and economic power; the constitutional voting requirements, based on education, income, and property, effectively disempowered most blacks. The British government made its offer of independence to Rhodesia contingent upon a shift to black majority rule, causing consternation among the country's white minority. Accustomed to a hands-off relationship, Rhodesia's government had anticipated being able to negotiate independence while maintaining the status quo. Its leader, Ian Smith, who became Rhodesia's prime minister in 1964, staunchly opposed even a gradual shift toward black majority rule. Defying Britain's mandate, Smith held a referendum in which 90 percent of voters indicated their desire to become independent while maintaining the existing constitution. Based on this, Smith issued a unilateral declaration of Rhodesian independence in November 1965—the first openly rebellious move by a British colony since the American colonies' declaration of independence in 1776.

Though British prime minister Harold Wilson considered using military force in response to Rhodesia's unilateral declaration, he ultimately took this option off the table. Historian Paul Moorcraft believes this was a mistake. While Smith was confident Britain would not use its military against “its own,” Rhodesia would have stood little chance against a full-scale British attack. According to Moorcraft, by renouncing this option early on, Wilson “threw away his best cards.” With United Nations backing, Britain opted instead for diplomatic and economic sanctions, but these failed to destabilize the Rhodesian economy. Clandestine trade and support by sympathetic countries such as South Africa and Portugal—one of Africa's last remaining colonizers—gave Rhodesia continued access to key resources. Furthermore, Rhodesia's black-opposition leadership was weak and divided, and even when they began a guerrilla campaign against minority rule—one that would amount to a 15-year civil war—the Rhodesian government forces managed to remain in control.

Nevertheless, without diplomatic recognition, Rhodesia had no prospect of raising the capital needed for long-term sustainability, and its economy was weakened by a rise in oil prices in 1973. Another blow came a year later, when Portugal relinquished its hold on its African colonies. This left Rhodesia with two neighbors, Angola and Mozambique, who, with black majorities in power, were hostile to Rhodesia's government. Rhodesia became even more isolated when South Africa, under pressure from the United States, withdrew its support. From the mid-1970s, the sanctions began to inflict real hardship. Meanwhile, Smith's government faced an increasingly unified and militant black opposition. As the fighting continued, more and more whites began to flee. Minority rule had become untenable, and a peace settlement, laying the foundations for black majority rule, was brokered in London in 1979. The first free elections, held in 1980, swept the black opposition to power. Smith's refusal to yield ground early on ultimately brought his government little gain and cost tens of thousands of lives.

(32)

What key factor led to Ian Smith's decision to declare unilateral independence?

- 1 He learned that the British had been negotiating directly with Rhodesia's black-majority leaders to bring about the conclusion of British colonial rule.
- 2 He feared Rhodesia's black majority would demand repayment of their assets from the government if they were allowed to vote.
- 3 The overwhelming majority of white Rhodesians opposed the British government's insistence that the black majority be given political power.
- 4 The British government's offer of independence included political reforms that neither Smith's party nor the black majority could agree to.

(33)

In saying that Harold Wilson "threw away his best cards," Paul Moorcraft implies that

- 1 by the time Wilson convinced the United Nations that military force would be the best way to make Smith reconsider his position, it was too late.
- 2 regardless of whether or not Wilson decided to use military force, the threat of it would have provided Britain with a powerful bargaining tool.
- 3 by choosing to impose sanctions, Britain lost the support of African countries that could have helped it negotiate with Rhodesia and other colonies.
- 4 the prospect of economic sanctions caused division among black-opposition leaders, seriously weakening them at the start of their guerrilla campaign.

(34)

What conclusion does the author of the passage draw about Rhodesia's transition to majority rule?

- 1 The harm that diplomatic isolation did to the economy made it hard for black-majority leaders to gain the resources necessary to fight the government.
- 2 Once Portugal finally withdrew from its African colonies, the United States was able to take a more active role in encouraging democracy in Rhodesia.
- 3 Both Smith's government and the country as a whole would have been better off if Smith had accepted the conditions set by Britain from the outset.
- 4 Military aid from neighboring countries for Rhodesia's black opposition turned out to be the deciding factor in the shift to representative democracy.

Space Elevator

For aerospace engineers, 35,786 kilometers above Earth is a critical altitude. This is the point of geostationary Earth orbit (GEO), the height above the equator at which the velocity of an object orbiting Earth is equal to the velocity of Earth's rotation. At this altitude, an object will stay in a fixed position above Earth. Russian scientist Konstantin Tsiolkovsky was the first to theorize, in the late nineteenth century, that a tower reaching to GEO could be used to launch spacecraft into orbit or deliver cargo or astronauts into space without using rocket engines. Earth's physical laws, of course, dictate that such an immense tower could not hold up under the compression of its own weight. In 1960, Russian engineer Yuri Artsutanov suggested that a way around this would be to deploy a tensile structure downward toward Earth—a kind of “sky hook.” He proposed extending a cable from a satellite in GEO and anchoring it near Earth's equator. Another cable would be extended from the satellite in the opposite direction—toward outer space—with a counterweight at the end. This would create a stable structure along which vehicles could be elevated into orbit. The tension on these cables, however, could exceed 100,000 kilograms per meter—too much even for a material as strong as diamond to bear.

The discovery of carbon nanotubes (CNTs) in 1991 brought Artsutanov's concept of a “space elevator” into the realm of possibility. Nanotubes are tiny, hollow structures with walls that are a single atom thick. The chemical bonds that hold CNTs together are uniquely strong, making them able—in theory, at least—to withstand the extreme tensile forces a space elevator would exert. The longest CNTs made so far are less than a meter long, however, so to reach the necessary lengths, they would have to be bound together, perhaps with a polymer material. And while CNTs can withstand vast temperature fluctuations, they would be subject to erosion in Earth's upper atmosphere, necessitating a protective coating. Nicola Pugno of the Polytechnic University of Turin points out that a single missing atom in a CNT can reduce its strength by 30 percent. Statistically, he says, “a defect-free cable is unrealistic.” Other researchers say the frictional forces between close-packed long nanotubes would compensate for the inevitable flaws.

Technical hurdles aside, there is the question of whether a space elevator's political sustainability could be ensured. Because the project's timeline would span decades, the debate would need to be framed in a way that allowed it to survive multiple political administrations. In the United States, for instance, this has been accomplished for past space programs by presenting them as exciting technological achievements for the nation. Analyst John Gardner believes a change of course would be in order for a space elevator. He says the project should be framed as a means of securing energy supplies, boosting intelligence-gathering capabilities, and defending against national security threats. This would present a favorable angle for public debate, while also gaining the long-term commitment of governmental agencies, private-sector investors, and foreign allies to support the endeavor to completion.

(35)

What is true of Yuri Artsutanov's idea?

- 1** It would allow cargo to be transported beyond Earth's atmosphere on a tower without utilizing the point of geostationary Earth orbit.
- 2** It involves the construction of a sufficiently strong and stable base to support the compressive force that would be exerted by a space elevator.
- 3** It modifies Konstantin Tsiolkovsky's proposal by replacing the tower with a structure held in place by a counterweight in space.
- 4** It would enable engineers to build a space elevator by using rocket engines to help counterbalance the compressive force of such a structure.

(36)

Why did the discovery of carbon nanotubes renew the possibility of a workable space elevator?

- 1** They have proven to maintain their structural stability even in circumstances where they are stretched over extremely long distances.
- 2** If they are packed together densely enough, they can bear the harsh conditions in Earth's upper atmosphere without being damaged.
- 3** Their small diameter allows them to be arranged closely together without being affected by forces of friction.
- 4** They are more difficult to pull apart than other materials due to the incredibly strong bonds between their atoms.

(37)

What is the main point John Gardner makes?

- 1** As a space elevator project would require ongoing support, it would have to be proposed in broadly appealing terms that could withstand public debate.
- 2** Both politicians and voters are too concerned with energy and national security issues to seriously consider a long-term space elevator project.
- 3** Stakeholders in the project would have to include both private and public organizations, making it difficult to prioritize the space elevator's goals.
- 4** The fact that collaboration with other governments is necessary means a space elevator could not be presented as a national achievement.

The Weimar Republic and the Kapp Putsch

In the wake of its defeat in World War I, Germany underwent an abrupt political shift. The country went from an imperial monarchy under Emperor Wilhelm II to the Weimar Republic, a democratic government led by a moderate political majority. For its 15 years of existence, however, the republic was under pressure from extremists on both the right and the left.

The former included upper-class nationalists and other conservatives who had supported the monarchy, as well as a number of upper-echelon military personnel, most notably the leaders of the Freikorps—elite volunteer militia units known for their brutality and antirepublican stance. The forces on the left included trade unionists, socialists, communists, and others who felt the changes ushered in by the Weimar Republic, such as labor reform, national health insurance, and a regulated-wage agreement, were too modest,

and wanted a full communist revolution. The Kapp Putsch, a short-lived coup that occurred in 1920, demonstrated the instability these opposing forces could wreak on the Weimar government.

Germany's surrender to Allied forces in November 1918 was followed by the German Revolution of 1918–1919, which saw the abdication of Emperor Wilhelm II and the establishment of the Weimar government. Although government leaders were reluctant, they were essentially forced by the Allied powers to sign the Treaty of Versailles, which went into effect in 1920. Among other stipulations, the treaty required Germany to assume full responsibility for the war and pay massive financial reparations, reduced its territory by more than 13 percent, and demanded it scale back its military from 600,000 to 100,000 soldiers. While the civilian population, exhausted by war and famine, welcomed the cessation of fighting on

any terms, right-wing soldiers and politicians were incensed by what they saw as an overly hasty capitulation, particularly regarding the reduction of fighting forces.

In spite of this opposition, the Weimar government began moving to comply with the requirements, announcing the dissolution of military units, including the Freikorps, by the treaty's deadline of March 31, 1920. General Walther von Lüttwitz, the army's highest-ranking commander, refused orders to disband the Freikorps' two most powerful units. The ensuing standoff allowed Wolfgang Kapp, a nationalist civil servant and staunch opponent of democracy, to set in motion a long-planned coup.

Backed by Freikorps troops, Lüttwitz and Kapp, along with other right-wing politicians, declared their intent to abolish the republic and establish a nationalist, authoritarian regime. When ordered by political leaders to de-

(38)

In the period following the end of World War I in Germany,

- 1 there was fighting within the ranks of the Freikorps over a treaty that reduced the number of commanders in Freikorps units.
- 2 the leaders of the Freikorps were forced to step down from their positions for making excessive demands on behalf of their troops.
- 3 opponents of democracy within the government accused left-wing politicians of plotting with the military to stage a coup.
- 4 certain groups of conservatives opposed the government because it had yielded to demands made by foreign powers.

(39)

What was one factor that contributed to the failure of the Kapp Putsch?

- 1 A majority of the soldiers and commanders in the military were sympathetic to the democratic government and refused to support the coup.
- 2 Weimar government leaders managed to regroup in Stuttgart after leaving Berlin, which enabled them to launch a counterattack with loyal army units.
- 3 There was enough public support for the Weimar Republic to prevent the country from functioning while the leaders of the coup were in control.
- 4 Wolfgang Kapp and Walther von Lüttwitz became involved in a struggle for power, which weakened their position and exposed them to attack.

fend the Weimar government against the opposition, other army officers refused to fire on their fellow troops. This allowed Kapp and Lüttwitz to seize power unopposed, and in short order, Kapp declared himself chancellor and appointed Lüttwitz as the chief of the military.

The leaders of the ousted government fled Berlin for the city of Stuttgart, but not before calling upon German workers to hold a nationwide general strike. In a show of support for democracy, 12 million members of the working class rallied to their defense. With so many refusing to work, the country was quickly paralyzed, making it impossible for the nationalists to govern. Within four days, the coup had collapsed, and the legitimate government returned to Berlin. In subsequent negotiations, the reinstated Weimar government allowed Kapp and Lüttwitz to resign voluntarily and offered amnesty for everyone who

had sided with them.

Outside Berlin, the strike led to other conflicts. In the south, the local military, which supported Kapp and Lüttwitz, overthrew the local government and installed a right-wing administration that later harbored several Kapp Putsch conspirators. In the Ruhr region in the west, a coalition of left-wing workers' parties calling itself the "Red Ruhr Army" decided to ally against conservative forces.

The Red Ruhr Army took control of most of the region, continuing to fight even after the newly returned Weimar government in Berlin called for an end to the strike. Fearing a loss of political control, the Weimar government ordered several military units to suppress the insurgency—including, ironically, some that had been involved in the Kapp Putsch. The soldiers complied with brutal force, and mass executions and prison sentences followed. More

than 1,000 Ruhr rebels were slaughtered, while the military's losses barely amounted to half that number.

At first glance, the failure of the Kapp Putsch appeared to be a triumph for the Weimar Republic. The success of the strike proved that a majority of German citizens supported democracy. However, the contrast between the treatment of those involved in the right-wing coup and the Ruhr rebels caused many on the left to distrust the new government. Further, several nationalists who managed to retain senior military and government positions continued to make trouble for the democratic regime. A more accurate analysis of the coup would view it as an early indicator of the turbulent years that led the Weimar Republic to give way to a dictatorship, making way for the ascent of the Nazi Party and, eventually, World War II.

(40)

After the conclusion of the general strike, events in the Ruhr region

- 1 resulted in such forceful suppression of rebels that other groups in opposition to the government declared they would cease their activities.
- 2 resulted in the Red Ruhr Army gaining such broad control that the Weimar government was forced to permit the region to be self-governing.
- 3 led to intense competition for power among right-wing officials who had sought refuge there when the coup began.
- 4 led the Weimar government to utilize the assistance of military units that had previously been fighting against it.

(41)

What is implied about the effects of the Kapp Putsch?

- 1 Although the outcome seemed to show the Weimar Republic's popularity, the government eventually lost support because of actions it took after the coup.
- 2 Civilians who had once distrusted the Weimar Republic began to support it after witnessing the extent of the threat posed by the Ruhr rebels.
- 3 As the Weimar Republic lost the backing of both left-wing and nationalist Germans, the military began to have difficulty attracting recruits.
- 4 Without the resulting support for the Weimar Republic's political authority, the ascent of the Nazi Party would likely have occurred even earlier.

4

English Composition

- Write an essay on the given TOPIC covering three of the POINTS below.
- Structure: Three or more paragraphs, including an introduction and conclusion
- Length: Around 200 words
- Write your essay in the space provided on Side B of your answer sheet.
Any writing outside the space will not be graded.

TOPIC

Has urbanization had a positive effect on Japanese society?

POINTS

- *Convenience*
- *Economic effects*
- *Health*
- *Human relations*
- *The environment*
- *Traditional culture*

MEMO

Listening Test

There are four parts to this listening test.

Part 1	Dialogues: 1 question each	Multiple-choice
Part 2	Passages: 2 questions each	Multiple-choice
Part 3	Real-Life: 1 question each	Multiple-choice
Part 4	Interview: 2 questions	Multiple-choice

※ Listen carefully to the instructions.

Part 1

- No. 1**
- 1** She will talk to her boss about hiring someone.
 - 2** Her new assistant is underperforming.
 - 3** She can do nothing about the situation.
 - 4** Her request for a transfer was refused.
- No. 2**
- 1** She thinks her dog is ill.
 - 2** She thinks Dr. Skoberg is too busy.
 - 3** She thinks her vet may be mistaken.
 - 4** She thinks her vet should run more tests.
- No. 3**
- 1** The inventor's complaint is not justified.
 - 2** The inventor has already received too much money.
 - 3** Companies should take better care of able employees.
 - 4** The man's invention is of little value.
- No. 4**
- 1** Start swimming at the pool.
 - 2** Join the new sports club.
 - 3** Jog in the neighborhood.
 - 4** Try to change her diet.

- No. 5**
- 1** Work on improving the company's reputation.
 - 2** Do some financial calculations.
 - 3** Arrange a meeting with the company.
 - 4** Look at a potential customer's proposal.
- No. 6**
- 1** Give the concert tickets to the Marshalls.
 - 2** Go ahead with their scheduled dinner.
 - 3** Find out who is performing at the concert.
 - 4** Rearrange the time of their dinner.
- No. 7**
- 1** He was recently promoted at work.
 - 2** He has turned his life around.
 - 3** He has decided to return to college.
 - 4** He had an argument with his boss.
- No. 8**
- 1** The chairman asked Jane to visit L.A.
 - 2** Peter's boss decided to cancel the contract.
 - 3** The client changed its decision.
 - 4** Jane made some changes to the contract.
- No. 9**
- 1** Get the sales staff to support the proposed discount.
 - 2** Ask management to change their sales quotas.
 - 3** Wait for economic conditions to improve.
 - 4** Try to get the new lineup introduced early.
- No. 10**
- 1** Have work done on his home.
 - 2** Find a smaller place to live.
 - 3** Go to see a retirement home.
 - 4** Live with his son's family.

Listening Test

Part 2

(A) *No. 11*

- 1** To bypass the factories and warehouses.
- 2** To accommodate higher levels of urban traffic.
- 3** To reduce cargo transportation costs.
- 4** To test a new approach to urban development.

No. 12

- 1** It does not address the fundamental problem.
- 2** It does not do what its makers claim.
- 3** It has proved unpopular in the Vatican.
- 4** It is difficult to dispose of.

(B) *No. 13*

- 1** Rainbow trout use a mineral to help them find their way.
