1 次の (1) から (20) までの () に入れるのに最も適切なものを 1, 2, 3, 4 の中から一つ選び、その番号を解答用紙の所定欄にマークしなさい。

- (1) Larry likes outdoor sports, but his sister is the complete (). She stays in her room most of the time and reads books.

1 logic 2 opposite 3 exchange 4 identity

- (2) A: You'd better dress warmly today. It's pretty ().

B: I know. I'm going to take my hat and gloves with me.

1 sweaty 2 moist 3 humid 4 chilly

- (3) A: Sally, were you able to get a part-time job at that new coffee shop?

B: No, it looks like they decided to () someone else.

1 settle 2 hire 3 retire 4 rent

- (4) Kevin and Nancy planted flowers along the () that led to the front door of their house.

1 cave 2 string 3 path 4 post

- (5) A: Jim looks really unhappy today.

B: Yeah, I'm worried about him. He says he's fine, but there's () something wrong.

1 obviously 2 automatically

3 proudly 4 rudely

- (6) Although I wanted to () the length of my stay in America, I had to go back to Japan. I'd run out of money.

1 widen 2 spread 3 extend 4 cancel

(7) A: I didn't see you at the party last Friday. Why weren't you there?

B: I had every () of going, but I fell ill at the last moment.

1 intention 2 occupation 3 conclusion 4 hesitation

(8) Jack was so determined to succeed in his company that he () most of his free time to his work.

1 revealed 2 sacrificed 3 instructed 4 implied

(9) A: Mom, how can I take a picture of this flower without getting my shadow in it?

B: Try standing on the other side of the flower and taking the picture from that ().

1 reaction 2 favor 3 secret 4 angle

(10) The violin teacher () the importance of practicing daily. He told the students that their skills would not improve without regular practice.

1 emphasized 2 accomplished

3 compromised 4 postponed

(11) A good presentation should be short and (). Including too much information just makes people bored.

1 along the way 2 to the point

3 out the door 4 in the distance

(12) A: I haven't seen Arnold today. Is he sick again?

B: No one knows () because he hasn't called the office yet.

1 on duty 2 above all 3 in public 4 for sure

(13) When Jenny was in college, her parents gave her some money each month. But it wasn't enough to live (), so she had to get a part-time job.

1 on 2 at 3 in 4 as

- 2 次の英文がそれぞれ完成した文章になるように、その文意にそって (21) から (25) までの 1 から 5 を並べ替えなさい。そして 2 番目と 4 番目にくる最も適切なもの一つずつを選び、その番号を解答用紙の所定欄にマークしなさい。ただし、() の中では文頭にくる語も小文字で示してあります。

(21) A: We need to discuss a few more things, but shall we take a lunch break first?

B: To be honest, () everything done. We can have lunch after we finish.

- 1 meeting 2 I'd 3 and get
4 continue the 5 rather

(22) A: Peggy, can you recommend a good Italian restaurant?

B: Yeah. Luigi's Food Garden () town. You should definitely go there.

- 1 in 2 far the 3 has by
4 food 5 best Italian

(23) A: Bob promised to help me with my presentation, but he's not here yet.

B: Don't worry. (). I'm sure he'll be here soon.

- 1 Bob 2 on 3 can
4 you 5 count

(24) Soccer is a game that is played between two teams of eleven players. (), and each period is 45 minutes long.

- 1 of 2 periods 3 two
4 consists 5 it

(25) The police are trying to find the man who robbed Central Bank this morning. () bank in a blue car. The police hope that anyone with information will contact them.

- 1 seen 2 from 3 he was last
4 driving away 5 the

3 次の英文 [A], [B] を読み、その文意にそって (26) から (33) までの () に入れるのに最も適切なものを 1, 2, 3, 4 の中から一つ選び、その番号を解答用紙の所定欄にマークしなさい。

[A]

Surfing for Cash

Every day, so much information is added to the Internet that no individual could hope to read it all. (26), a new kind of site, known as a “social-news site,” is becoming popular in the United States. Social-news sites save people time by providing an easy way to find the most interesting new information on the Internet. This information is discovered and reported by people who surf the Internet. When someone finds an interesting news article, for example, they simply record its Web address and add a title and a summary of the contents. Then they post this as a message to the social-news site. Other users read the messages and stories and vote for the most interesting ones.

Most of the people who contribute to social-news sites do it as a hobby. They enjoy telling other people about good sites and competing to win the most votes. Part of the skill of being a good contributor is being able to recognize which sites and stories will (27) to other people. The contributors find their stories by surfing the Internet at great speed, looking for unusual and interesting information. It is also important to be able to think of a title or summary that will catch people’s attention.

In 2006, one of the sites, called Netscape, decided to start paying some of its contributors. The owner, Jason Calacanis, (28) that certain contributors often posted the most popular and interesting stories. He offered to pay these expert surfers \$1,000 a month if they agreed to post at least 150 stories to his site. One of these expert surfers was a college student named Corey Spring. Spring had been searching for good sites and posting them to Netscape as a hobby for some time, and his contributions (29) received a high number of votes. Calacanis believed that Spring would attract many new visitors to the site. At the same time, Spring was happy because he was being paid to do something he did anyway — surf the Internet.

(26) 1 First of all
3 As a result

2 By mistake
4 On average

(27) 1 refer
3 remove

(29) 1 regularly
3 hardly

2 correctly
4 politely

[B]

Watching What You Use

Like other governments around the world, the British government is trying hard to find ways to stop global warming. As part of its efforts, it has recently promised to cut the amount of carbon dioxide released in Britain to 40 percent of the 1990 level by the year 2050. The government believes that one way to achieve this target is by (**30**) people to use less energy in their homes. In order to do this, it has announced that every household in the country will soon be offered a free device to show them exactly how much electricity they are using at any time of the day.

At present, electric companies put meters into homes in order to calculate how much electricity their customers have used each month. These meters are usually hidden away in cupboards and are often difficult for people to read and understand. However, the new devices are quite (**31**). Each one has a sensor that is attached to the electric meter and a separate handheld screen to display information about how much energy is being used and how much it costs. People can see this information on the screen wherever they are in the house. Even more importantly, they can immediately see how much energy they save each time they switch off a light or a TV that no one is watching.

The government believes that even people who are not concerned about the (**32**) will want to save money. The devices would help them manage their use of energy as efficiently as possible. Because the energy used in British homes is responsible for about a third of the greenhouse gases released by the country, the government thinks that reducing this use could play a significant role in (**33**) global warming.

(30) 1 persuading
3 employing

From: Tim Newey <newey392@vestaimports.com>
To: Sarah Holdsworth <s-holdsworth@raddlesdepartmentstore.com>
Date: January 25, 2008
Subject: Starlight tennis rackets

Dear Ms. Holdsworth,

I was given your name and e-mail address by your assistant Rebecca Jones when I called your store this morning. I represent a company that sells sporting goods to sporting-goods stores and department stores such as yours. Ms. Jones indicated that our new Starlight tennis rackets might be a suitable product for Raddle's Department Store and that, as chief buyer, you were the best person to contact.

Although the Starlight brand is not widely known here in the United States, it is very popular in Asia. The rackets are manufactured in China, and we have just started selling them in the United States. They have light frames made from aluminum, and they come in a variety of colors. But the main selling point is that no other rackets of similar quality are available so cheaply. We are offering them at \$18 each, but we would accept an even lower price for a large order. We feel confident that they will sell in your store very quickly.

I have attached a file with pictures of the rackets and some technical information. If possible, I would like to visit your store next Thursday to show you some samples and answer any questions you have. Please let me know what time is most convenient for you.

Yours sincerely,

Tim Newey

Sales Manager, Vesta Imports

- (34) This morning, Rebecca Jones told Tim Newey that
- 1 her store might want to buy one of his company's products.
 - 2 Ms. Holdsworth works for a company that makes tennis rackets.
 - 3 Raddle's Department Store already sells Starlight tennis rackets.
 - 4 he should contact the chief buyer of a sporting-goods store.
- (35) What is one thing Tim Newey says about Starlight tennis rackets?
- 1 They are the only racket available in so many colors.
 - 2 Their low price will make them popular with customers.
 - 3 His company will start manufacturing them in the United States.
 - 4 The main reason people buy them is that they have light frames.
- (36) What does Tim Newey say he wants to do?
- 1 Take some pictures of the rackets.
 - 2 Send some samples to the store by Thursday.
 - 3 Make an appointment to see Ms. Holdsworth.
 - 4 Answer questions about the rackets by e-mail.

[B]

Too Much Salt

Salt not only improves the taste of food but is necessary for the human body. But in June 2006, the American Medical Association (AMA) — the largest doctors' group in the United States — requested that the U.S. government begin to limit the amount of salt that food companies are allowed to add to their products. Salt has traditionally been regarded as a safe ingredient, but the AMA wants the Food and Drug Administration — the government organization that decides what can be used in foods — to consider it as a substance that needs to be controlled.

Behind the AMA's request lies the fact that U.S. citizens typically consume more than twice the recommended amount of salt each day. Since eating too much salt has been connected to high blood pressure, doctors have become increasingly concerned about how to reduce the amount of salt in the diet of the average American. Research has shown that more than 75 percent of this salt comes from processed food and restaurant meals. In fact, just one dish in a restaurant can contain more salt than the recommended amount for one whole day.

The food industry strongly opposes the AMA's recommendation. One reason, of course, is the huge size of the salt market in the United States — \$340 million a year. But there are other reasons. As the food industry points out, the amount of salt each product contains is clearly printed on the package. Moreover, food companies have introduced a number of low-salt versions of popular foods. Unfortunately, the public does not seem to like them well enough to buy them very often. Industry representatives say that what is needed is more education about the dangers of salt, rather than more rules.

One answer would be the development of a substance that tastes the same as salt but does not have the same negative effects on people's health. In fact, companies have been trying to develop such a substance for some time, but so far they have not been successful. Salt remains the cheapest and tastiest way both to preserve food and to improve its flavor. As long as this is the case, it will continue to be difficult to get people to eat less of it.

- (37) The U.S. government has been
- 1 warned that sales of salt are rapidly decreasing.
 - 2 advised to double the number of products containing salt.
 - 3 told to create a new association to improve the taste of salt.
 - 4 asked to make a new rule concerning the use of salt.
- (38) What is the American Medical Association worried about?
- 1 The change in the amount of processed food used in restaurants.
 - 2 The average amount of salt wasted in the United States each day.
 - 3 The 75-percent increase in people with high blood pressure.
 - 4 The bad effect of salt on the health of Americans.
- (39) What is one reason the food industry opposes the AMA's recommendation?
- 1 The cost of salt is likely to increase in the near future.
 - 2 Food products already provide clear information to customers.
 - 3 Research shows that the public is against stricter controls.
 - 4 Low-salt products are starting to become popular.
- (40) The AMA will find it difficult to change people's eating habits
- 1 until a healthy replacement for salt is found.
 - 2 because companies are making salt even tastier.
 - 3 until more people begin eating preserved foods.
 - 4 because people do not believe what doctors say.

[C]

Sharing the Profits

Developing a new drug can cost millions of dollars. Even after a drug has been developed, thorough tests must be conducted before it can be sold to the public. This means that drug companies need to develop drugs that will eventually make enough money to cover their costs. Therefore, they spend most of their money developing drugs that can be sold to people who can afford them. Unfortunately, diseases that mainly affect people in poor countries tend to be ignored.

Now, an American woman named Victoria Hale has come up with an idea for making new drugs for people in poorer parts of the world. Hale, a former scientist, knew that companies often stop developing a drug if they think that it will not make a profit. She asked companies to give her their abandoned research and unused drugs for free. Then she organized a group of scientists to develop them into safe and effective medicines for use in poor countries. In 2000, Hale founded a nonprofit company called the Institute for OneWorld Health (iOWH) to carry out this work.

Her company is expecting to achieve its first success with a drug to cure the disease known as black fever. Every year, this disease affects more than 100,000 people in rural areas of India. Hale received a drug called paromomycin, which a company had started developing but had not finished testing. Together with other scientists, she tested the drug, which turned out to cure 94 percent of patients. Now, she plans to sell the drug in India at a very low cost. She hopes that the Indian government will buy the drug and provide it to people in need for free.

Hale says one reason that big drug companies cooperate with her is that her company does not compete with them. Although the iOWH is located in the United States, its markets are in poor countries. Moreover, big drug companies have found that they can actually benefit by cooperating with the iOWH. By making donations, they can reduce the amount of tax they pay and at the same time improve their public image. Thanks to Hale's idea, more of the world's medical knowledge is at last being put to good use.

- (41) When developing new drugs, what do drug companies do?
- 1 Test the drugs mainly on their own employees.
 - 2 Search for new diseases in other parts of the world.
 - 3 Ask other companies to give them money for research.
 - 4 Focus on illnesses that affect people who can pay for treatment.

- (42) Victoria Hale's idea was to
- 1 get companies to donate work on drugs they decided not to sell.
 - 2 contact scientists who work in poor countries for advice.
 - 3 use an existing drug to fight a newly discovered disease.
 - 4 ask companies to lend her their research laboratories.

- (43) Hale and the Institute for OneWorld Health have
- 1 tested paromomycin by providing it for free to people abroad.
 - 2 asked a drug company to continue developing paromomycin.
 - 3 proved paromomycin is effective against black fever.
 - 4 sold paromomycin to the Indian government.

- (44) What is one reason drug companies cooperate with the iOWH?
- 1 They need help finding drugstores to sell their newest drugs.
 - 2 They hope to reach markets in countries outside the United States.
 - 3 They want the public to have a better impression of them.
 - 4 They believe they will get ideas for new drugs.

- (45) Which of the following statements is true?
- 1 Hale once worked for a major drug company in India.
 - 2 The iOWH expects to make a large profit from its drugs.
 - 3 Many big drug companies are thinking about copying Hale's idea.
 - 4 The company that first developed paromomycin did not fully test it.

リスニング

2級リスニングテストについて

- 1 このリスニングテストには、第1部と第2部があります。
 ★英文はすべて一度しか読まれません。
 第1部：対話を聞き、その質問に対して最も適切なものを1, 2, 3, 4の中から一つ選びなさい。
 第2部：英文を聞き、その質問に対して最も適切なものを1, 2, 3, 4の中から一つ選びなさい。
- 2 No. 30のあと、10秒すると試験終了の合図がありますので、筆記用具を置いてください。
