一次試験
筆記

1 次の (1) から (20) までの () に入れるのに最も適切なものを 1, 2, 3, 4 の中から一つ選び、その番号を解答用紙の所定欄にマークしなさい。

- (1) Mr. Stevens was so busy the week before his vacation that he didn't have time to () his suitcase until the morning of his departure.
1 judge 2 pack 3 defend 4 focus
- (2) A: The baseball stadium in Radler City is really big. Do you know how many people it can hold?
B: I read in the newspaper that it has a () of 50,000 people.
1 capacity 2 mission 3 rhythm 4 symbol
- (3) Homeowners usually cut the grass in their yards more often in spring than in summer. This is because grass grows more () in spring.
1 privately 2 sincerely 3 rapidly 4 skillfully
- (4) The () to this math problem is on the next page, but don't look at it until you have tried to find the answer for yourself.
1 objection 2 edition 3 solution 4 relation
- (5) I tried my best to () my father to let me go camping with my friends this weekend, but he said I have to stay home and study for my exams.
1 persuade 2 upset 3 interrupt 4 assist
- (6) A: My birthday is February 6th.
B: What a ()! That's my birthday, too.
1 promise 2 technique 3 guarantee 4 coincidence

- (7) A: All of the bags are ready, Dad.
B: Great. Then let's () everything into the car and go. I can't wait to get to Miami.
1 publish 2 load 3 scratch 4 freeze
- (8) It was () that Dave was too sick to work, so his boss let him go home early.
1 fortunate 2 extreme 3 apparent 4 informal
- (9) A: Sarah, why was Tom so late for the barbecue?
B: There was a (). He thought the barbecue was at my house. When he got there, my mom told him it was at the park.
1 proposal 2 championship
3 revolution 4 misunderstanding
- (10) After hours and hours of negotiations, the bank robbers finally () to the police.
1 surrendered 2 dedicated 3 confirmed 4 conflicted
- (11) Charles and Sue () on everything. If he likes something, she usually hates it.
1 connect 2 disagree 3 conclude 4 depend
- (12) Mr. White was 91 years old when he (). Many of the people from the local community attended his funeral.
1 passed away 2 turned away 3 stood in 4 checked in
- (13) A: Jenny, do you want to go to the concert on Sunday?
B: I don't know, Carl. I have a big science test on Monday, so let me think it ().
1 over 2 often 3 under 4 upon

- (14) Jane used to take her father for (). But after he had a mild heart attack, she realized how important he was to her.
1 instance 2 certain 3 fun 4 granted
- (15) A special dinner was held () of the president, who was visiting the city to make a speech.
1 on top 2 on patrol 3 in honor 4 in place
- (16) A: Did you talk about the new advertising campaign at the meeting today?
B: Yes, but there wasn't enough time to discuss it in (). We're going to work on the details at a special meeting next week.
1 memory 2 trouble 3 cash 4 depth
- (17) Chad works at a hotel. He carries bags and () guests to their rooms.
1 opens 2 makes 3 lends 4 shows
- (18) The night before the graduation ceremony, Emma's excitement was () that she could not get to sleep.
1 if 2 such 3 unless 4 since
- (19) At halftime, the soccer coach told his players to concentrate and work together as a team () the second half of the game.
1 above 2 during 3 inside 4 around
- (20) Jim isn't very nice. Though he doesn't like () at, he always laughs at other people.
1 has laughed 2 to laugh 3 being laughed 4 laughing

2

次の英文がそれぞれ完成した文章になるように、その文意にそって (21) から (25) までの 1 から 5 を並べ替えなさい。そして 2 番目と 4 番目にくる最も適切なものを一つずつ選び、その番号を解答用紙の所定欄にマークしなさい。

- (21) A: Our boss wants us to finish this report by Monday. Can you work on the weekend?
B: I would be happy to, () to take a day off next week.
1 able 2 provided 3 am
4 that 5 I
- (22) When Linda came home from work on Friday, () the lights in the living room were on. But then she remembered that her daughter was visiting for a few days.
1 strange 2 it 3 she
4 that 5 thought
- (23) A: Tim, () on the sofa and watch TV. Why don't you go outside and get some exercise?
B: I'll go for a walk as soon as this movie is over, Dad.
1 do 2 you 3 sit
4 all 5 is
- (24) A: Professor Ericson, how should we prepare for our presentations next month?
B: Well, you'll () ideas with facts, so I suggest you go to the library and look for information about your topic.
1 need 2 up 3 to
4 your 5 back
- (25) When Kathy went to the hospital for the first time, she (). After she was done writing, she gave them to the nurse and waited to see the doctor.
1 given 2 out 3 forms to
4 fill 5 was

3 次の英文 [A], [B] を読み、その文意にそって (26) から (33) までの ()
に入れるのに最も適切なものを 1, 2, 3, 4 の中から一つ選び、その番号を解答
用紙の所定欄にマークしなさい。

[A]

Saving the Cork

For hundreds of years, wine producers have used cork stoppers in wine bottles. These stoppers are made from the thick bark* of the cork oak, a tree that grows in the hot, dry regions of the Mediterranean. Recently, however, more and more wine producers have started to (26) their cork stoppers. This is because cork stoppers have certain disadvantages. Not only do they sometimes break, but they can also damage the taste of the wine. To avoid these problems, many wine producers use plastic stoppers.

Now, though, an environmental organization called the World Wildlife Fund (WWF) is asking the wine industry not to abandon the stoppers it has used for so long. The WWF believes that the cork industry is necessary for (27) the forests in the areas where cork oaks grow. One reason for this is that cork oaks do not catch fire very easily, so they help prevent the spread of forest fires. In Portugal, the world's largest producer of cork stoppers, many farmers have given up growing cork oaks in recent years. Some have switched to faster growing trees that can provide the raw material for the paper industry. The new trees burn much more easily than cork oaks, and this has led to a huge increase in forest fires. In the hot summer of 2003, for example, nearly 10 percent of the country's forests were (28).

The WWF is working with local organizations to restore the forests. As part of their plan, they are planting cork oaks in certain areas to help stop fires from spreading. However, if wine producers do not buy cork stoppers, local farmers cannot make money from these trees. In that case, they will have no choice but to plant trees that are more (29). For this reason, the WWF is appealing to wine producers to continue to buy these environmentally friendly products.

*bark: 木の皮, 樹皮

(26) 1 replace
3 defend

2 prefer

[B]

Yellow Cab Blues

New York City's yellow taxis are well known throughout the world. However, the city's residents do not always have a positive view of the service they provide. In fact, customers made so many complaints about the taxis that in 1995, the New York City government's Taxi and Limousine Commission (TLC) announced that taxi drivers had to speak politely to passengers and to keep their taxis clean. Then, in 2007, the TLC introduced new rules for taxis. According to these rules, drivers must allow customers to pay with a credit card. (**30**), all taxis must have Global Positioning System (GPS) video screens. These allow passengers to follow the route they are taking and also record how many trips the drivers have made.

Some taxi drivers have strongly resisted the new rules because they are so expensive to follow. They say that the recent high price of gasoline means they already have to work 10 or 12 hours a day just to make enough money to live. The new rules, however, will reduce their (**31**) even further. When customers pay by credit card, for example, the driver must give 5 percent of the fare to the credit-card company. Meanwhile, the new GPS screens cost as much as \$3,000 to install.

Nevertheless, although the drivers went on strike twice in protest, the city introduced its new rules. Unfortunately, according to customers, many drivers are simply (**32**) the rules. This has now led the TLC to start what it calls "Operation Secret Rider." In this operation, 100 TLC agents pretend to be customers. If they find drivers breaking any of the rules, they charge them a fine of up to \$350. If the drivers continue to break the rules, they can have their licenses taken away. The TLC is confident that this will finally put an end to the (**33**) image of the yellow cabs.

(30) 1 Therefore
3 Rather

2 Moreover
4 Otherwise

4 convenient

4 次の英文 [A], [B], [C] の内容に関して, (34) から (45) までの質問に対して最も適切なもの, または文を完成させるのに最も適切なものを 1, 2, 3, 4 の中から一つ選び, その番号を解答用紙の所定欄にマークしなさい。

[A]

From: Rosa Reynolds <r-reynolds@rosasfashions.com>
To: Chris Bond <bond@hamiltonshoestore.com>
Date: January 25, 2009
Subject: Ms. Gina Tate's application

Dear Mr. Bond,

This e-mail is a recommendation for Gina Tate, who applied for the position of sales manager at your shoe store. I have known Gina since she started working as a sales assistant at my clothing store here in Chicago in 2005. Next month, she will leave Rosa's Fashions because she is moving to Boston for family reasons. She is an excellent salesperson, and I will be sorry to see her go.

Gina always works hard here at Rosa's Fashions. She pays careful attention to the needs of customers, and she enjoys talking with them about the clothes in the store. As a result of this, she has a good monthly sales record. Also, if customers ever complain about items they have bought, she deals with them in a polite and professional manner.

Although Gina has never been a sales manager before, I am sure she would quickly get used to her new responsibilities. Since my store is quite small, I do not employ a sales manager. Occasionally, however, I have asked Gina to work on tasks that a sales manager would normally do, such as training new employees and creating monthly sales reports. Based on the efficient way that Gina has carried out these tasks, I am confident she would be an excellent sales manager at your store.

Regards,
Rosa Reynolds

(34) Why is Rosa Reynolds writing to Mr. Bond?

- 1 To recommend one of her employees for a job at his store.
- 2 To get more information about a position he advertised.
- 3 To ask about opening a new clothing store in Boston.
- 4 To inform him that Gina Tate is moving to Chicago.

(35) Rosa Reynolds says that Gina Tate has a good sales record because of

- 1 the fact that she wears clothing from the store.
- 2 the time that she spends learning about clothes and fashion.
- 3 the careful attention that she pays to advice from her co-workers.
- 4 the way that she treats customers who come to the store.

(36) According to Rosa Reynolds, Gina Tate

- 1 often helps the sales manager at Rosa's Fashions.
- 2 has recently taken a management-training course.
- 3 has some experience with the work done by a sales manager.
- 4 is responsible for finding new employees to work at the store.

[B]

Building the Great Pyramid

Egypt's Great Pyramid of Giza was built for the pharaoh Khufu about 4,500 years ago. At least 2 million stones, some of them weighing as much as 80 tons, were used in its construction. Standing at 146 meters, the pyramid was the tallest building in the world for nearly 4,000 years. Although modern experts have learned much about this huge structure, one obvious question has not yet been answered. How did the ancient Egyptians manage to lift such heavy stones so high in the air?

One common theory is that they used wooden cranes. According to this theory, as the pyramid was built, cranes were placed at various levels on it and used to move the stones into position. Ancient Egyptian paintings do show wooden machines like cranes, but there are two problems with this theory. The first is that Egypt did not have enough forests to supply the wood that would have been necessary to build so many cranes, and importing the wood from abroad would have been too expensive. The second is that the stones near the top of the pyramid would have been too small for the cranes to stand on.

Now, French architect Jean-Pierre Houdin has proposed a new theory. Houdin and his team spent 5,000 hours using computer software to create 3-D models of the pyramid. Eventually, he concluded that the stones must have been pulled up a gentle slope inside the pyramid itself. He believes that this slope still exists, but that it has never been noticed because it is completely separate from the hallways and rooms that have already been discovered.

Houdin is so confident about his theory that he has applied to the Egyptian authorities for permission to conduct a survey of the pyramid. He plans to use advanced technology that will allow him to scan the structure without harming it. If he gets permission and his survey shows that there is a slope inside the pyramid, then the mystery of how the ancient Egyptians built this enormous landmark will have finally been explained.

(37) Modern experts on the Great Pyramid

- 1 believe it is not as tall as people once thought.
- 2 believe it was built over a period of 4,000 years.
- 3 are still unable to explain how it was constructed.
- 4 are not sure why the pharaoh Khufu wanted it made.

(38) What is one problem with the wooden-cranes theory?

- 1 The stones were too large to lift with wooden cranes.
- 2 There is no evidence that the Egyptians could make cranes.
- 3 Most wood used for cranes was being sold to foreign countries.
- 4 Cranes could not have been placed near the top of the pyramid.

(39) Jean-Pierre Houdin believes that

- 1 the builders began by making 3-D models of the pyramid.
- 2 the Egyptians moved the stones up a slope inside the pyramid.
- 3 the wooden-cranes theory should be tested on another pyramid.
- 4 the mystery will be explained by measuring rooms in the pyramid.

(40) What does Houdin hope to do?

- 1 Prove his theory in a way that will not damage the structure.
- 2 Build a crane on top of the pyramid to conduct his survey.
- 3 Use his computer software to make plans for a new pyramid.
- 4 Get permission to take stones back to France to study them.

A Multilingual Web

Although the Internet allows us to gather information from all over the world, it is still not truly global. It is true that over 1 billion people now use the Internet, but there are still 5 billion people around the world without access to it. Many factors, such as poverty and government control, are responsible for this situation. However, language also plays a part. This is because domain names — the addresses of the websites people want to visit — must use the Roman alphabet.

The majority of the world's population uses other systems of writing, and there are many people who are not familiar with the Roman alphabet. As a result, they cannot type or read domain names and therefore cannot visit the websites they want to. Experts say that this has slowed down the development of the Internet in some parts of the world. The group that is responsible for domain names is a U.S.-based organization called the Internet Corporation for Assigned Names and Numbers (ICANN). ICANN has been strongly criticized for not finding a way to write domain names entirely in non-Roman writing systems.

Since 2003, ICANN has allowed “combination” domain names that include characters from other writing systems. However, the final part of the name — for example “.com” or “.org” — must still be typed in Roman letters. At the 2005 World Summit on the Information Society, critics of ICANN said that this was not enough. They emphasized the need to develop software that would allow people to write the whole domain name in their own writing system. This would make it easier for everyone to have access to the Internet.

The technology for creating such names has actually existed since the late 1990s. However, because ICANN has been slow to take action, some countries have begun to use this technology to develop their own systems of domain names written entirely in their own characters. Since these domain names are not part of ICANN's system, users of the new systems cannot access the same information that most Internet users can. In 2007, ICANN finally began testing domain names written in Arabic, Persian, Russian, Hindi, Greek, Korean, Hebrew, Japanese, Tamil, and two forms of Chinese. This is an important first step in making the Internet accessible to the billions of people currently left out.

(41) The use of the Roman alphabet in domain names

- 1 has changed the way some people use their computers.
- 2 is one reason why billions of people cannot use the Internet.
- 3 has ended poverty and government control in some countries.
- 4 is helping to create an Internet that everybody finds easy to use.

(42) According to experts,

- 1 the Internet has not grown as quickly as it might have in some places.
- 2 computer users are responsible for controlling their own domain names.
- 3 people should learn to use the Roman alphabet as soon as possible.
- 4 some websites should be allowed more than one domain name.

(43) What did some critics of the Internet Corporation for Assigned Names and Numbers say in 2005?

- 1 It paid no attention to other countries' advice before making decisions.
- 2 An American organization should not be in charge of domain names.
- 3 Each country should be allowed to develop its own writing system.
- 4 Its "combination" domain-name system was not good enough.

(44) Technology that has existed since the late 1990s has allowed

- 1 ICANN to test the accuracy of the information on the Internet.
- 2 ICANN to end the shortage of domain names in the Roman alphabet.
- 3 some countries to create domain names completely in their own characters.
- 4 some Internet users to develop websites without domain names.

(45) Which of the following statements is true?

- 1 ICANN now has branches in many countries around the world.
- 2 ICANN has already started testing non-Roman-alphabet domain names.
- 3 The majority of the world's population uses the same writing system.
- 4 Some governments plan to ban the use of the Internet.

リスニング

2 級リスニングテストについて

- 1 このリスニングテストには、第 1 部と第 2 部があります。

★英文はすべて一度しか読まれません。

第 1 部：対話を聞き、その質問に対して最も適切なものを 1, 2, 3, 4 の中から一つ選びなさい。

第 2 部：英文を聞き、その質問に対して最も適切なものを 1, 2, 3, 4 の中から一つ選びなさい。

- 2 No. 30 のあと、10 秒すると試験終了の合図がありますので、筆記用具を置いてください。

第 1 部 CD 2 1～16

No. 1

- 1 Cook something new for dinner.
- 2 Buy mushrooms at the supermarket.
- 3 Taste different kinds of mushrooms.
- 4 Check that the mushrooms are safe.

No. 2

- 1 She lost her map.
- 2 She is too tired to walk any farther.
- 3 She cannot find her friend's house.
- 4 She does not like her neighbors.

No. 3

- 1 It is no longer open.
- 2 Its owner is unfriendly.
- 3 She used to work there.
- 4 She will go there next month.

No. 4

- 1 To ask when to plant his seeds.
- 2 To make sure he bought enough seeds.
- 3 To find out about the weather this year.
- 4 To order more pumpkins.

No. 5

- 1 She decided to go hiking instead.
- 2 She went there last year.
- 3 She missed her flight.
- 4 She got injured.

- | | |
|---------------|--|
| No. 6 | <p>1 She had salad for lunch.</p> <p>2 She does not eat meat.</p> <p>3 She wants to work in the sales section.</p> <p>4 She has never been to Dave's Grill.</p> |
| No. 7 | <p>1 Let her into the store.</p> <p>2 Recommend a good puzzle.</p> <p>3 Take her to another store.</p> <p>4 Wrap a gift for her.</p> |
