## *Part-time Pets*

For many people, the idea of renting a pet dog for the day—in the same way that one might rent a car—seems wrong. This is because, unlike a car, a dog is a living creature with feelings. ( 26 ), in recent years, businesses around the world have started to offer such dog-rental services. Moreover, the owners of these businesses say the services they provide are not cruel at all. In fact, they argue, renting a dog can be kinder than selling it.

One such businessperson is Marlena Cervantes, the owner of a successful company located in California. Cervantes says that her service is especially ( 27 ) for people who frequently have to take business trips. Under her system, two or three different people share one of the company's dogs. When one of these people reserves the dog for a day, it is delivered to the customer's home. In the evening, the dog is picked up and taken back to the company. Cervantes says that because the dog is able to get to know the customers well, it does not feel stress when it visits them.

Danny Tam has also started a dog-rental service at his pet shop in Hong Kong. Tam says that his system has ( 28 ) for dogs as well as people. Many of his customers rent dogs to find out if they will be good pets or if they will get along with the other pets that the customer already owns. Although most of his customers end up buying the dogs, some do ( 29 ) them. Tam points out that if they could not do this, then they might stop taking care of the dogs or even abandon them in the streets. In this sense, he says, renting dogs is surely a better system than just selling them to people who might later change their minds about keeping them.

## *Power Balance*

Electricity is a very useful form of energy, but it has certain problems. One is that electrical energy cannot be easily stored for later use. This means that power companies must produce the right amount of electricity just when it is ( **30** ). If they produce too much, the energy is wasted and the extra supply can damage the electric-power system. If they produce too little, people find it difficult to carry on with their daily lives.

To ( **31** ) such results, power companies employ experts to predict exactly how much electricity should be produced at any time. These experts mainly rely on earlier records and information such as weather reports. Recently, however, another factor has been attracting attention: the influence of TV programs. When a very popular program is shown—such as a sporting event involving a national team—a large part of the population will watch it. While they are watching the event, the demand for electricity goes down. When there is a break in the program, however, the opposite happens. In Britain, for example, people all over the country go to the kitchen, turn on the electric kettle, and make themselves a cup of tea.

These sudden ( **32** ) in demand are known as “TV pickups,” and because of them, power companies now pay careful attention to what programs will be on TV. Recently, in fact, power companies asked the British Broadcasting Corporation (BBC) to change its plans. The BBC had planned a special day of programs on the environment, and part of the idea was to have people turn off their electricity for two minutes during one of the programs. However, when the power companies heard about this, they complained that they could not predict how much electricity to make, because nobody knew how many people would participate in the event. Eventually, the BBC agreed to ( **33** ) its plan.

From: Susan Tully <s-tully@lilyhotelreservations.com>  
 To: Peter Sheldon <p-sheldon@interbiosystems.com>  
 Date: June 12, 2009  
 Subject: Your company's training seminar

Dear Mr. Sheldon,

Thank you for your e-mail about using the Lily Hotel for your company's sales training seminar in August. There is a conference hall available on the date you asked for, August 8. The hall can hold 60 people and is equipped with a projector and a large screen.

In your e-mail, you requested accommodations for 40 seminar participants in single rooms for the night of August 7. Unfortunately, we only have 32 single rooms free on that night. However, there are some twin rooms available. May I recommend that the remaining eight people share those rooms? Since this is a large booking, we will provide a 15-percent discount off our normal rates for accommodations.

You mentioned that you planned to hold the training seminar from 10 a.m. to 4 p.m., with a one-hour break for lunch. If you would like everyone at the seminar to eat together, we can serve a buffet lunch in the conference hall. Or the people attending your seminar may prefer to eat at one of the hotel's restaurants. Further information about our restaurants and other services is available on the hotel's website. Please contact me by e-mail or by phone at 555-7842 so that I can confirm the details of your reservation.

Best regards,

Susan Tully

Event Manager, Lily Hotel

(34) Why did Mr. Sheldon write to Susan Tully?

- 1 He is planning to buy a projector and a screen.
- 2 He has to make a change to his reservation.
- 3 He would like to hold a seminar at her hotel.
- 4 He wants someone to make a presentation.

(35) What does Susan Tully say about accommodations for seminar participants?

- 1 People who share a room could stay for free.
- 2 Some of the people would have to sleep in twin rooms.
- 3 Eight people would have to go to another hotel.
- 4 She would offer a discount if more people were staying.

(36) Susan Tully says that the Lily Hotel

- 1 accepts buffet reservations on its website.
- 2 has a restaurant that is open from 10 a.m. to 4 p.m.
- 3 sends guests information about places to eat.
- 4 can provide a lunch in the conference hall.

## Alfred Russel Wallace

The British scientist Charles Darwin (1809–1882) is famous throughout the world for his theory of evolution. In fact, many people regard this theory as the most important scientific discovery ever made. Many people do not know, however, that he was not the only person to come up with this theory. In fact, another British scientist named Alfred Russel Wallace (1823–1913) developed exactly the same idea independently of Darwin.

Although they were both scientists, Darwin and Wallace came from very different backgrounds. Darwin was from a wealthy family and studied at Cambridge University, while Wallace's family was poor. For this reason, Wallace had to leave school when he was 17 years old. While working as a teacher, he became interested in the study of nature. In 1848, he went to South America to study the animals and plants there. Later, he explored the jungles of Malaysia and Indonesia. It was while he was there that he thought of his idea.

At the time, there were other scientists who believed that animal species had changed over time. The problem was explaining how these changes had happened. Wallace was interested in the fact that each part of the world had different species that matched the environments they lived in. One day, he realized that this was because only the animals that matched their environments survived, while the others died out. In 1858, Wallace sent his ideas to Darwin, whom he had met a few years before. Darwin was shocked to find that Wallace had come up with the same theory as he had.

Darwin had first thought of his theory of evolution 20 years earlier, but he had delayed making it public because he knew that many people would find it difficult to accept. He used this time to gather as much evidence as possible for his theory. In fact, when his and Wallace's ideas were first announced together to a group of scholars in London, few people paid attention to them. It was only in 1859, when Darwin published *The Origin of Species*, that the theory of evolution became famous. Some scholars think that Wallace should also be seen as a discoverer of evolution. Others, however, say that it was only because Darwin provided so much evidence for the theory that scientists eventually came to believe that it was true.

(37)

Alfred Russel Wallace was a scientist who

- 1 thought of the same theory of evolution as Darwin.
- 2 helped Darwin to test some of his ideas about nature.
- 3 became more famous than Darwin in the 19th century.
- 4 introduced Darwin's discovery to people around the world.

(38)

Wallace left school when he was 17 years old because he

- 1 wanted to study nature in South America.
- 2 was offered a job working for Darwin.
- 3 could not afford to stay there any longer.
- 4 did not believe Darwin's theory of evolution.

(39)

What is one thing Wallace realized while he was exploring jungles?

- 1 Darwin's original theory had to be completely changed.
- 2 Animals died out when they did not fit their environments.
- 3 It would take him many years to prove that Darwin was right.
- 4 Some species travel long distances to find a suitable environment.

(40)

Before publishing his theory of evolution, Darwin

- 1 realized that many other people had the same ideas.
- 2 sent his notes to Wallace to have them checked.
- 3 waited to learn more about Wallace's theories.
- 4 spent years collecting evidence to support it.

## *The Great Pacific Garbage Patch*

Charles Moore's hobby is sailing in ocean races. In 1997, after taking part in a race in Hawaii, he decided to visit an area in the northern Pacific Ocean known as the "horse latitudes." Sailors rarely go to this area because it has almost no wind, making it difficult to sail through. When Moore got there, he was shocked to find that for miles the water was full of small pieces of plastic. He had discovered what people now call the Great Pacific Garbage Patch.

In fact, scientists had predicted the existence of such an area of garbage years earlier. The water in the northern Pacific flows in a huge circle, but in the center of the circle, there is an area where it hardly moves. As ocean currents move around this center, they collect garbage from the west coast of North America and the eastern coasts of Asia and slowly carry it to the center. Something thrown into the sea near San Francisco, for example, will reach the center in about five years.

In the past, most of this garbage was made of natural materials that easily broke down and became part of the environment. Over the last 70 years, however, more and more plastic has ended up in the ocean. Plastic is useful because it is very strong, but for the same reason, it remains in the ocean for years. Recently, for example, a piece of plastic found in a seabird's stomach turned out to be from an airplane shot down during World War II. The huge area of plastic garbage discovered by Moore has actually been growing for decades.

What is the solution? Some people say that governments should try to remove the plastic from the ocean. Moore, however, thinks that this would be very difficult. He argues that the most important thing to do now is to stop more plastic from getting into the ocean. One way to do this would be to recycle more of the plastic we use. Another would be to be more careful when throwing plastic away. Moore warns that we must take action before the problem becomes too big to solve.

(41)

In 1997, Charles Moore

- 1 was surprised to find an area with no wind.
- 2 took part in a race through the horse latitudes.
- 3 crashed into some garbage during an ocean race in Hawaii.
- 4 found an area of the Pacific Ocean with a lot of plastic in it.

(42)

Currents in the northern Pacific Ocean

- 1 flow around a central area that moves very little.
- 2 carry garbage from North America to the eastern coasts of Asia.
- 3 move more slowly as they reach the areas near the coasts.
- 4 keep garbage from being carried out into the ocean.

(43)

What has changed over the last 70 years?

- 1 Scientists have started using airplanes to find garbage.
- 2 Seabirds have started to leave more plastic in the environment.
- 3 More garbage that cannot break down easily has gone into the ocean.
- 4 The growth in the number of ships has led to more pollution.

(44)

What is one thing Moore says about the garbage problem?

- 1 Taking the plastic out of the ocean would be hard.
- 2 The ocean is becoming too dangerous to travel on.
- 3 Governments should reduce the production of plastic.
- 4 The solution is to find a material to use instead of plastic.

(45)

Which of the following statements is true?

- 1 Moore got lost on his way to an ocean race in Hawaii.
- 2 The problem of garbage in the Pacific Ocean is getting worse.
- 3 Sailors avoid the horse latitudes because of the amount of plastic there.
- 4 Garbage from Asia is not usually carried by ocean currents.

## ■一次試験の結果について■

### 1) 結果通知方法

◆協会の指定した公開会場（本会場）で受験した場合  
一次試験の結果は、7月6日まではがきで通知します（合格の場合は、そののがきが二次受験票となります）。のがきが未着の場合は7月7日以降に英検サービスセンター 03(3266)8311（10時～17時）までお問い合わせください（お問い合わせの際には受験番号もお知らせください）。

### ◆自分の学校や団体など（準会場）で受験した場合

一次試験の結果は7月6日までに申込責任者（学校の先生または団体の担当者の方）あてに通知します（個人あてには通知しません）。

### 2) 合否および得点の通知について

合格者には「合格」、不合格者には合格ラインに近い順より「不合格A」「不合格B」「不合格C」の3段階で合否結果を通知します。また、「合格点」と「語い・熟語・文法」「読解」「リスニング」「作文」の各分野別得点および正解も表示されます。なお、各分野は下記の大問により測定されます。

- \*「語い・熟語・文法」————大問 [1]
- \*「読解（空所補充）」————大問 [3]
- \*「読解（内容把握）」————大問 [4]
- \*「リスニング（会話文）」————第1部
- \*「リスニング（一般文）」————第2部
- \*「作文」————大問 [2]

## ■二次試験について（一次試験合格者のみ）■

### 1) 試験日 2009年7月12日（日）

### 2) 受験地（希望の受験地を選べます）

右記の二次試験受験地番号表をみて、希望の受験地番号を解答用紙（準会場で受験している場合は志願票）の所定欄に記入してください。

### 3) 受験会場と集合時刻（協会が指定します）

後日協会からお送りする二次受験票（合格通知）で通知します。ただしダブル受験（2級と準1級または2級と準2級）で一次試験をどちらの級も合格した方は、午前に準1級・準2級、午後に2級の受験となります。

二次試験当日は特に以下の点にご注意ください

#### \* 集合時間厳守

集合時間は厳守してください。遅刻した場合は、原則として受験を認めることはできません。

#### \* 携帯電話等使用禁止

試験会場内での携帯電話等の使用を一切禁止します。携帯電話等を使用した場合は、理由のいかんにかかわらず、失格になります。
