Grade

2

実用英語技能検定

主催：財団法人 日本英語検定協会

後援：文部科学省

2 級

2010 年 1 月 24 日 (日) 実施

■ 試験時間

筆記試験 (75分)

リスニングテスト (約25分)

■ 注意事項

1. 試験開始まで、この問題冊子を開いてはいけません。
2. 解答は、解答用紙に直接記入してください (問題冊子にはメモをしてもかまいませんが、後で解答用紙に解答を書き写す時間はありません)。
3. 問題内容に関する質問は一切受けつけません。
4. 不正行為をした場合は、答案は無効となります。
5. 他の受験者に迷惑をかける行為は慎んでください。
6. リスニングテストの際、やむを得ず教室外へ出た場合は、その後教室に戻りテストを受けることはできません。
7. 携帯電話・PHS・電子音などの出る時計・その他試験を妨げる音の出る機器等の電源は必ず切って机の上に置き、絶対に使用しないでください。
8. 多機能付時計は時計としてのみ使用してください。
9. 問題冊子は持ち帰っても結構です。
10. 採点結果等については、一切異議申し立てはできません。

*自分の学校や団体など(準会場)で受験する場合のみ記入してください。

1

次の (1) から (20) までの () に入れるのに最も適切なものを **1, 2, 3, 4** の中から一つ選び、その番号を解答用紙の所定欄にマークしなさい。

- (1) Because Jessica's painting won first prize in the art contest, it is going to be () in the city library next month. Her friends will go there to see it.
1 revised **2** injured **3** extended **4** displayed
- (2) Seth found the roller-coaster ride so () that as soon as it was over, he decided to go on it again.
1 serious **2** thrilling **3** fragile **4** mature
- (3) After Jim watched the report on the news about an earthquake, he started to think about how to prepare for a similar () in his area. He bought food, water, and other supplies.
1 parade **2** disaster **3** reward **4** luxury
- (4) Sophie always wanted to be a famous actress. She worked hard and finally () her goal after she appeared in a Hollywood movie.
1 composed **2** limited **3** postponed **4** achieved
- (5) When Mr. Jenkins retired, the president thanked him for the great () he had made to the company over the years.
1 judgment **2** hesitation **3** confidence **4** contribution
- (6) Recently, some cities have () smoking in public places such as bars and restaurants. People who want to smoke have to go outside.
1 fastened **2** delayed **3** adjusted **4** banned
- (7) Sam would like to read more novels, but when he gets home from work at night, he is too () tired to read. He usually watches TV instead.
1 precisely **2** mentally **3** eagerly **4** silently
- (8) **A** : How would you describe your () of life, James?
B : That's a difficult question, but my basic approach is to do my best in every situation.
1 experiment **2** philosophy
3 discrimination **4** conference
- (9) Marilyn put the flour, sugar, eggs, and other ingredients for the cake in a bowl and () them together. Then she put the mixture in the oven and baked it for 40 minutes.
1 greeted **2** hunted **3** stirred **4** earned
- (10) **A** : I wish I were a pop star. I'd love to be rich and famous.
B : Personally, I have no () to be famous, but I certainly would like to have a lot of money.
1 desire **2** habit **3** fuel **4** task

- (11) Even though Ken is very busy in Tokyo, he tries to () time every month to phone his parents in Hokkaido.
 1 move 2 keep 3 make 4 start
- (12) A : Mom, does my suit look OK? I want to look good for my first day of work.
 B : Well, your suit looks great, but that tie doesn't really () it.
 1 pass by 2 take after 3 go with 4 bring down
- (13) Because of financial difficulties, the company had to lay () 10 percent of its employees in order to save money.
 1 out 2 off 3 around 4 down
- (14) A : Did you hear the news? Jack asked Liz to marry him.
 B : Really? () she looked so happy today!
 1 No wonder 2 Before long 3 By accident 4 In case
- (15) Terrence was sick last Friday, so he could not perform in the school play. Luckily, another student was able to take his () on stage.
 1 word 2 hand 3 place 4 step
- (16) Melbourne is known as a city that is (). Tourism is growing rapidly and many new businesses are opening.
 1 of no use 2 on the move 3 out of stock 4 to the point
- (17) The committee turned () my suggestion for moving to a larger office because they said it would be too expensive.
 1 up 2 out 3 down 4 off
- (18) Since Oliver started reading a book about Mt. Everest, he has talked of nothing () mountain climbing.
 1 but 2 and 3 for 4 as
- (19) Jane got an e-mail from her friend Roger () that he would be in town next month and wanted to get together.
 1 saying 2 being said 3 said 4 be saying
- (20) A : You bought that video game from Brian, right? How much did you give him () it?
 B : I gave him \$20.
 1 by 2 to 3 at 4 for

2

次の英文がそれぞれ完成した文章になるように、その文意にそって (21) から (25) までの 1 から 5 を並べ替えなさい。そして 2 番目と 4 番目にくる最も適切なものを一つずつ選び、その番号を解答用紙の所定欄にマークしなさい。ただし、() の中では文頭にくる語も小文字で示してあります。

(21) Mr. and Mrs. Johnson have a big DVD collection. They have lots of favorite movies, but () the most is *My Funny Summer*.

- | | | |
|--------|-------|---------|
| 1 they | 2 the | 3 watch |
| 4 that | 5 one | |

(22) Last night, F&V Communications had a company party at Moise's Tasty Pizzas. () restaurant, so they were late.

|--------|------------|---------|
| 1 make | 2 couldn't | 3 heard |
| 4 she | 5 herself | |

3

A

次の英文 **A**, **B** を読み, その文意にそって (26) から (33) までの () に入れるのに最も適切なものを **1, 2, 3, 4** の中から一つ選び, その番号を解答用紙の所定欄にマークしなさい。

Counting Calories

Most people know that fast food, such as hamburgers and fried chicken, usually contains a lot of fat and calories, and that if you eat too much of it, you are likely to put on weight. But do people really know which items on restaurant menus are the most fattening? In fact, research has shown that sometimes even experts cannot tell which foods have the most calories. (**26**), some people have been arguing that there should be laws to make restaurants tell customers exactly how many calories are contained in each item they sell.

In 2008, New York became the first city in the United States to pass a law making restaurant chains show customers the calorie content of everything on their menus. Many restaurants had opposed the idea. This was partly because they were worried that customers might stop buying items with many calories in them. Researchers have tried to find out whether this will actually happen, but the evidence is (**27**). Some surveys suggest that customers may choose items with fewer calories, but others indicate that the new law is unlikely to have much long-term effect on people's choices.

Some restaurant chains, however, see the new law as a good (**28**). They have changed their menus to attract more customers and reduce costs. One leading chain of coffee shops, for example, has changed the milk it uses to low-fat milk. This lowers the calorie content of its drinks and costs less, leading to higher profits. Another well-known fast-food chain has reduced the size of its items and gotten rid of ones that contain a lot of calories. As a result, it has cut its costs and at the same time attracted new customers with its healthier menu. In fact, the chain has decided to start showing the number of calories in its products even in cities where restaurants are not (**29**) to.

- | | | | | |
|------|-----------------------|------------------------|--------------------|-----------------------|
| (26) | 1 For instance | 2 In particular | 3 Therefore | 4 Nevertheless |

| (28) | 1 mixture | 2 theory | 3 discovery | 4 opportunity |
| (29) | 1 required | 2 employed | 3 failing | 4 waiting |

Practice for the Future

How would you like to visit the planet Mars for two weeks? Although that is not yet possible, people can now experience what such a trip would be like by staying at the Mars Desert Research Station (MDRS) in Utah in the United States. The MDRS was built by the Mars Society, an organization founded in 1998 to (30) the idea of human beings traveling to Mars. Since 2002, the Mars Society has been running programs at the MDRS in which people from around the world take part. The aim is to help people prepare for actual trips to Mars in the future.

The location of the MDRS—in the desert—was chosen because it is very similar to the landscape on Mars. One major (31) between Utah and Mars, however, is that Utah is very hot, whereas Mars would actually be very cold. In many other ways, though, visitors to the station live just as they would if they really were on Mars. Every time they go outside, they put on heavy imitation space suits. When they wash or cook, they use the minimum amount of water possible because water would be very scarce on Mars. Even their e-mails are (32). This is because it would take at least 20 minutes for an e-mail to reach Earth from Mars.

One person who recently stayed at the MDRS was Phillip Cunio, a researcher from the Massachusetts Institute of Technology. Cunio went to the station to carry out tests on space equipment that he is developing. He said that he was surprised by how much time he spent doing daily chores. But he said that the experience at the station had been quite (33). In fact, he said that he would not mind moving to Mars permanently in the future.

次の英文 **A**, **B**, **C** の内容に関して, (34) から (45) までの質問に対して最も適切なもの, または文を完成させるのに最も適切なものを **1**, **2**, **3**, **4** の中から一つ選び, その番号を解答用紙の所定欄にマークしなさい。

From: Duncan Hart <d-hart@truewebconsultancy.com>
 To: Karen Turner <karen448@parkfieldanimalrescue.org>
 Date: January 22, 2010
 Subject: Re: Can you help me?

Dear Ms. Turner,

Thank you for your e-mail. My company would be happy to create a new website for Parkfield Animal Rescue. As a web-design company, we must charge for our services. However, after reading about the great work your charity does finding new homes for unwanted pets, my colleagues and I have decided to give you a 25-percent discount off our normal fee.

Your current website contains basic information about Parkfield Animal Rescue. We will design a new website and transfer this information onto it. May I also recommend that we add a photo gallery of the animals at your center? By showing photographs of each animal, you should be able to find new owners for them more easily. We could also add a page to the website where people can donate money to the charity with their credit cards.

I would like to arrange a meeting with you sometime this month. Could you e-mail me to let me know what date would be convenient for you? At the meeting, we can talk about the design of the website, including the colors you would like to use. To give you some ideas for possible designs, I have attached a list of websites that we have made for other clients.

I look forward to hearing from you again.

Sincerely,

Duncan Hart

True Web Consultancy

(34) Duncan Hart says that his company

- 1** charges a little more than most other web-design companies.
- 2** received an e-mail from somebody who had a pet that needed help.
- 3** will offer its services to Ms. Turner's charity at a reduced price.
- 4** has given 25 percent of its profits to Parkfield Animal Rescue.

(35) What is one suggestion Duncan Hart makes for the new website?

- 1** A photo gallery would help the center find new owners for its animals.
- 2** Pictures of people who have given money could be shown on it.
- 3** People should be able to buy animals on it with their credit cards.
- 4** It should contain less information than is on the current website.

(36) What does Duncan Hart ask Ms. Turner to tell him in her next e-mail?

- 1** Whether she has met any of his other clients.
- 2** If she received the list of websites he sent her.
- 3** What colors she would like to use in the website.
- 4** When she can meet him to discuss the new website.

Quake Computing

When scientists record earthquakes, they usually use machines called seismometers. These machines are extremely sensitive to movement and can record earthquakes that are happening hundreds of miles away. Unfortunately, they are very expensive. As a result, there are relatively few of them, and in many parts of the world they cannot be found at all. Now, a team of researchers has come up with a new idea for recording earthquakes. Their idea would use technology that is already common in many computers.

Jesse Lawrence, a professor at Stanford University in California, is leading a project called the Quake-Catcher Network. This is a plan to establish a worldwide network of computers connected to the Quake-Catcher central computer. The network makes use of the simple devices called accelerometers that are already installed in many laptop computers. When a laptop is dropped, the accelerometer reacts to the shock by stopping the hard drive. It does this so that the moving parts inside will not break. The Quake-Catcher Network provides software to laptops so that they can send a message to the central computer whenever the accelerometer reacts to a movement. A similar accelerometer can be attached to desktop computers, too, allowing them also to be included in the network.

The key to the project, according to Lawrence, is to have as many computers as possible report a motion at the same time. If just one computer sends a message, it probably only means that someone has bumped into it accidentally. If, however, a large number of computers all send a message at the same time, it is likely that something is happening in that area. “If it is an earthquake,” says Lawrence, “we could potentially send out signals to those who need them.”

Quake-Catcher will also allow researchers to compare the data on movements to the physical damage done in each area. This will help them learn more about the effects of various types of earthquakes. Although the number of computers connected worldwide at present is still small, Quake-Catcher successfully recorded an earthquake in Los Angeles in July 2008. If more computers join the network, it may one day help warn people of earthquakes in time for them to escape to a safe place.

(37) One problem with seismometers is that

- 1** they can work only in certain parts of the world.
- 2** they are extremely difficult to move around.
- 3** many countries cannot afford to own them.
- 4** many researchers find them too complicated.

(38) The usual purpose of an accelerometer is

- 1** to increase the speed at which computers operate.
- 2** to help protect a computer when it is dropped.
- 3** to count the number of connections on a network.
- 4** to send information from one seismometer to another.

(39) Why is it important to have many computers connected to the Quake-Catcher Network?

- 1** It makes it easier to tell whether movements are actually caused by earthquakes.
- 2** Not all of the computers in the network are able to record sudden movements.
- 3** Software can be sent over the network to prevent damage to the computers.
- 4** Different types of accelerometers react to different types of earthquakes.

(40) What is true about Jesse Lawrence's project?

- 1** It is helping people protect their computers from damage.
- 2** It is helping people measure the size of the network.
- 3** It has already saved many lives in Los Angeles.
- 4** It has already recorded one earthquake.

Trees from the Sky

The importance of forests to the environment has become clearer and clearer over time. Not only do they provide a home for many animals, but they also protect the soil and prevent flooding. Even more importantly, they absorb the carbon dioxide that is one of the major causes of global warming. Yet despite their importance, more and more forests are being cut down each year, either for wood or to provide land for farming.

One obvious solution to the loss of forests is to plant new trees to replace those that are being lost. Doing this by hand, however, is expensive and takes a lot of time. Moreover, transporting the seeds of trees to areas that need replanting can be very difficult. As a result, traditional methods cannot replace all the trees that are being lost each year. One way to avoid these problems has recently been attracting attention—using airplanes to replant the forests.

In fact, this is not a new idea. In the 1940s, airplanes were used to spread seeds over mountains in the United States. Unfortunately, as much as 75 percent of the seeds were wasted. Some of them were eaten by animals, while others were blown away by the wind to areas where they could not grow. In the 1990s, U.S. scientist Moshe Alamaro came up with a way of overcoming these difficulties. He designed a special container that could hold a young tree along with some water and soil in which it could grow.

When Alamaro's containers are dropped from an airplane, they land with enough speed to become buried in the earth. The container then slowly breaks down into the soil so that the tree's roots can grow. The advantages of this system are that the trees are more likely to grow and that many thousands of them can be dropped in a short time. Now, some companies are taking up this idea. They believe that this method of planting trees will both help the environment and provide a source of wood that people can use in the future.

(41)

What is one reason there are fewer forests every year?

- 1 Carbon dioxide in the atmosphere is killing trees.
- 2 Trees in many forests are being damaged by animals.
- 3 The soil trees need is being washed away by floods.
- 4 People are turning forest land into farms.

(42)

One reason why efforts to replant forests have not been successful is that

- 1 trees are being cut down faster than new ones can be planted.
- 2 in some forests it has become too hot for most trees to grow.
- 3 tree seeds have become too expensive to use in many areas.
- 4 the seeds of many tree species are no longer available to buy.

(43)

What was tried in the United States in the 1940s?

- 1 Planting seeds in places where trees had never grown before.
- 2 Dropping the seeds of trees over mountain areas from airplanes.
- 3 Using airplanes to check how quickly forests were growing.
- 4 Studying the types of seeds eaten by animals in forests.

(44)

What is one thing Moshe Alamaro's container is designed to do?

- 1 Fly by itself to find new forest areas.
- 2 Provide information to help farmers plant trees.
- 3 Allow the tree inside it to grow in the earth.
- 4 Send out a signal to tell scientists where it is.

(45)

What may be one result of Alamaro's work?

- 1 It may persuade farmers to plant seeds using airplanes.
- 2 It may reduce the demand for wood in the United States.
- 3 It may increase the amount of wood available for human use.
- 4 It may allow trees to live for a longer period of time.

Listening Test

Grade 2

2級リスニングテストについて

①このリスニングテストには、第1部と第2部があります。

★英文はすべて一度しか読まれません。

第1部……対話を聞き、その質問に対して最も適切なものを **1, 2, 3, 4** の中から一つ選びなさい。

第2部……英文を聞き、その質問に対して最も適切なものを **1, 2, 3, 4** の中から一つ選びなさい。

②No. 30のあと、10秒すると試験終了の合図がありますので、筆記用具を置いてください。

 - 3** He sells material to manufacturers.
 - 4** He finds people to work in stores.
- No. 28**
- 1** Study at a college in Canada.
 - 2** Stay in Hiroshima by herself.
 - 3** Move to a house in Nagoya.
 - 4** Start living with her father.
- No. 29**
- 1** Food and drinks will be served.
 - 2** A second movie will be shown.
 - 3** An actress will make a speech.
 - 4** The director will answer questions.
- No. 30**
- 1** He went to the wrong office.
 - 2** He had an argument with a co-worker.
 - 3** He arrived late for an interview.
 - 4** He got lost on his way home.

■一次試験の結果について■

1) 結果通知方法

◆協会の指定した公開会場（本会場）で受験した場合
一次試験の結果は、2月15日まではがきで通知します（合格の場合は、そののがきが二次受験票となります）。のがきが未着の場合は2月16日以降に英検サービスセンター 03(3266)8311（10時～17時）までお問い合わせください（お問い合わせの際には受験番号もお知らせください）。

◆自分の学校や団体など（準会場）で受験した場合

一次試験の結果は2月15日までに申込責任者（学校の先生または団体の担当者の方）あてに通知します（個人あてには通知しません）。

2) 合否および得点の通知について

合格者には「合格」、不合格者には合格ラインに近い順より「不合格A」「不合格B」「不合格C」の3段階で合否結果を通知します。また、「合格点」と「語い・熟語・文法」「読解」「リスニング」「作文」の各分野別得点および正解も表示されます。なお、各分野は下記の大問により測定されます。

- *「語い・熟語・文法」————大問 [1]
- *「読解（空所補充）」————大問 [3]
- *「読解（内容把握）」————大問 [4]
- *「リスニング（会話文）」————第1部
- *「リスニング（一般文）」————第2部
- *「作文」————大問 [2]

■二次試験について（一次試験合格者のみ）■

1) 試験日 2010年2月21日（日）

2) 受験地（希望の受験地を選べます）

右記の二次試験受験地番号表をみて、希望の受験地番号を解答用紙（準会場で受験している場合は志願票）の所定欄に記入してください。

3) 受験会場と集合時刻（協会が指定します）

後日協会からお送りする二次受験票（合格通知）で通知します。ただしダブル受験（2級と準1級または2級と準2級）で一次試験をどちらの級も合格した方は、午前に準1級・準2級、午後に2級の受験となります。

二次試験当日は特に以下の点にご注意ください

* 集合時間厳守

集合時間は厳守してください。遅刻した場合は、原則として受験を認めることはできません。

* 携帯電話等使用禁止

試験会場内での携帯電話等の使用を一切禁止します。携帯電話等を使用した場合は、理由のいかんにかかわらず、失格になります。

■二次試験受験地番号表■（2009-3）
