

2010-2

Grade

2

実用英語技能検定

主催：財団法人 日本英語検定協会

後援：文部科学省

2 級

2010年10月17日(日) 実施

■ 試験時間

筆記試験 (75分)

リスニングテスト (約23分)

■ 注意事項

1. 試験開始まで、この問題冊子を開いてはいけません。
2. 解答は、解答用紙に直接記入してください（問題冊子にはメモをしてもかまいませんが、後で解答用紙に解答を書き写す時間はありません）。
3. 問題内容に関する質問は一切受けつけません。
4. 不正行為をした場合は、答案は無効となります。
5. 他の受験者に迷惑をかける行為は慎んでください。
6. リスニングテストの際、やむを得ず教室外へ出た場合は、その後教室に戻りテストを受けることはできません。
7. 携帯電話・PHS・電子音などの出る時計・その他試験を妨げる音の出る機器等の電源は必ず切って机の上に置き、絶対に使用しないでください。
8. 多機能付時計は時計としてのみ使用してください。
9. 問題冊子は持ち帰っても結構です。
10. 採点結果等については、一切異議申し立てはできません。

*自分の学校や団体など(準会場)で受験する場合のみ記入してください。

1

次の (1) から (20) までの () に入れるのに最も適切なものを 1, 2, 3, 4 の中から一つ選び、その番号を解答用紙の所定欄にマークしなさい。

- (1) Mary got angry at the party because somebody () red wine all over her dress. She had to take it to the dry cleaner's the next day.
1 traced 2 piled 3 spilled 4 waved
- (2) Two months ago, Mark fell off his bicycle and cut his knee. The cut is better now, but it left a () that can still be seen.
1 forecast 2 merit 3 policy 4 scar
- (3) Children should study, but it is important for their health that they also take part in () activities, such as sports.
1 miniature 2 physical 3 thoughtful 4 financial
- (4) Tom wants to buy a motorcycle. However, his parents () to the idea because they think riding a motorcycle is too dangerous.
1 deliver 2 wander 3 object 4 contribute
- (5) Hawaii is a popular () for tourists from around the world. They go there to relax and enjoy the beautiful beaches.
1 character 2 destination 3 souvenir 4 generation
- (6) A : Do you know how the fire at the factory started, Lionel?
B : No, but I heard that the police and the fire department are () the cause now.
1 investigating 2 sponsoring 3 assisting 4 reversing
- (7) A : Erica, I think your tennis is () getting better.
B : Me, too. My serve seems to be improving a little each week.
1 severely 2 gradually 3 initially 4 doubtfully
- (8) Professor Reed enjoys teaching but finds correcting his students' papers a heavy (). It takes many hours each week.
1 mixture 2 legend 3 burden 4 structure
- (9) When the company announced that it would () production of cars at the factory, the workers knew that they would all soon lose their jobs.
1 solve 2 polish 3 cease 4 heal
- (10) The two men formed such a close () while they served together in the army that they continued to meet regularly for the rest of their lives.
1 bond 2 chip 3 trial 4 layer

- (11) **A** : Dad, my teacher said we have to bring a dictionary to class tomorrow, but I can't find mine.
B : Don't worry. You can use mine for the () being. Just make sure you return it when you find yours.
1 side 2 time 3 fact 4 reason
- (12) Everybody on the badminton team () to Sandra because she both plays well and spends a lot of time helping beginners.
1 comes down 2 looks up 3 jumps up 4 stands out
- (13) As is often the () with people who are good at music, Jim is good at math, too.
1 case 2 edge 3 part 4 start
- (14) **A** : I heard that Ann's new boyfriend will be playing in today's rugby match. Do you know what he looks like?
B : Yes. I'll point him () to you when the match starts.
1 in 2 by 3 down 4 out
- (15) Jiro studied in Italy for a year and liked it so much that he decided to stay there (). Now he lives in Rome and works for a company there.
1 for good 2 by accident 3 in return 4 on schedule
- (16) **A** : Andrea, do you often go downtown?
B : No, not often. I () to avoid going there because it's always so crowded.
1 tend 2 deserve 3 refuse 4 appeal
- (17) **A** : If you want to become a skilled guitar player, Zach, you need to practice regularly.
B : I will, Mr. Jones. Today I made a practice schedule, and I plan to () it.
1 fall through 2 major in 3 come across 4 stick to
- (18) Michael's new job involves a lot of traveling. He has to go abroad as often () three times a month.
1 to 2 than 3 if 4 as
- (19) Matthew thought his friends had forgotten his birthday. Little () that they were planning a surprise party for him.
1 he would know 2 was he knowing
3 did he know 4 he has known
- (20) Lance saw an advertisement in the newspaper for a job that interested him, but he was slow in () and was told that the job had already been taken.
1 applied 2 applying 3 to apply 4 apply

2

次の英文がそれぞれ完成した文章になるように、その文意にそって (21) から (25) までの 1 から 5 を並べ替えなさい。そして 2 番目と 4 番目にくる最も適切なものを一つずつ選び、その番号を解答用紙の所定欄にマークしなさい。

(21) A : Honey, let's buy a bigger TV. Our TV is so small.

B : But you know () with my salary, Vicky. New TVs are so expensive these days.

- | | | |

| 1 seemed | 2 to | 3 lost |
| 4 have | 5 he | |

3

A

次の英文 **A**, **B** を読み, その文意にそって (26) から (33) までの () に入れるのに最も適切なものを **1, 2, 3, 4** の中から一つ選び, その番号を解答用紙の所定欄にマークしなさい。

Lights Out

When we hear the word “pollution,” we generally think of the damage to the environment caused by chemicals and other substances. Recently, however, another type of pollution has begun to attract attention—light pollution. This refers to any negative effect of artificial light on the environment. According to experts, artificial light is doing damage both to (**26**) and to human beings.

The first people to become aware of light pollution were scientists who study the stars. They noticed that it was becoming more and more difficult to see stars at night because of all the light given off by cities. Light pollution, though, does not only make it harder for us to see the stars. It also harms our health by interrupting sleep and sometimes even interfering with the body’s ability to produce the chemicals needed to stay healthy. It also affects wildlife, causing animals to become (**27**). For example, artificial lights can make it difficult for baby turtles to find the ocean after they are born, and as a result, many of them die.

In response to these problems, an international movement is now trying to (**28**) the effects of artificial light. An organization called the International Dark-Sky Association is leading the way by encouraging the protection of areas of the sky from light pollution. The organization is also trying to persuade governments to use public lighting more efficiently. At present, much of the light we produce is not actually needed. Creating less light would not only lead to less light pollution, but it would also help the environment in other ways. In the United States, for example, it is estimated that 2 million barrels of oil are used every day for the production of (**29**) light. Stopping this waste of fuel would both save money and lessen the amount of greenhouse gases being released into the air.

Water for N.Y.C.

New York City, with its skyscrapers and other tall buildings, has often been regarded as the world's first modern city. There is one thing about New York's buildings, however, that is surprisingly (**30**). This is the way in which they are supplied with water. Every building over six stories high in New York, including the most up-to-date skyscrapers, has a tower with a wooden tank on top filled with water. What is more, the design of these water towers has hardly changed over the last 100 years.

The water towers were first used in the 19th century. New York's underground water system was built in the 1840s, when most buildings were only one or two stories high. Before long, though, the population of the city began to expand rapidly. Since land was (**31**), people needed to construct taller buildings. Unfortunately, the water system did not have enough pressure to supply water to the upper floors of these buildings. Builders tried to increase the water pressure, but this led to burst pipes. As a result, the city passed a law requiring every building more than six stories high to have a water tower.

Water towers work by using the power of (**32**). The wooden tank on top of the tower is filled with water by a pump, and the water then flows down through pipes to each part of the building that needs it. When the water in the tank drops below a certain level, the pump automatically refills the tank. The water for everyday use is taken from the top part of the tank. The water lower down is connected to different pipes so that it can be used in case of a fire. New Yorkers say these water towers have many (**33**). They are energy efficient, and because the water is often moving, it does not freeze in the winter. Above all, New Yorkers say, the wooden tanks keep their water tasting fresh and delicious.

次の英文 **A**, **B**, **C** の内容に関して, (34) から (45) までの質問に対して最も適切なもの, または文を完成させるのに最も適切なものを **1**, **2**, **3**, **4** の中から一つ選び, その番号を解答用紙の所定欄にマークしなさい。

From: Tina Stevens <tinastevens@palmsart.com>
 To: Henry Austin <h-austin@southfield.edu>
 Date: October 15, 2010
 Subject: Palms Watercolor Contest

Dear Professor Austin,

Thank you for agreeing to be one of the judges at the annual Palms Watercolor Contest next month. Your experience teaching watercolor painting at Southfield University makes you the ideal person for the job. The other judges will be Ann Wendle, who owns the Palms Art Gallery, and Katherine Henderson. Katherine won first prize in the contest three years ago and has gone on to work as a designer for a large advertising company.

You can find details about the contest on the Palms Art Gallery website. Although there are no cash prizes, the winners will get good publicity here in Southfield. The overall winner will be invited to hold a two-week exhibition at the Palms Art Gallery. The contestants who finish second and third will have an article about their paintings published in the *Southfield Art Review* magazine, allowing more Southfield residents to learn about their artwork.

The judging will take place at the gallery from 7 to 9 p.m. on November 16. The awards ceremony will be four days later, on November 20. Based on previous contests, we predict that there will be about 100 entries, so you will only have a short time during the judging session to consider each painting and reach a decision. Naturally, we ask you not to tell anyone the results before the ceremony.

Sincerely,

Tina Stevens
 Events Coordinator
 Palms Art Gallery

(34) At the Palms Watercolor Contest next month, Professor Austin

- 1** will be working with Katherine Henderson.
- 2** will be asked to display some of his own artwork.
- 3** will judge some artwork produced by Ann Wendle.
- 4** will make a speech about teaching art history.

(35) What will the contestants who finish second and third gain from the contest?

- 1** Their artwork will be published on a magazine's website.
- 2** Their artwork will become better known in the local area.
- 3** They will receive some money from the Palms Art Gallery.
- 4** They will be able to hold an exhibition at Southfield University.

(36) Tina Stevens wants Professor Austin to

- 1** inform her of his decision before November 16.
- 2** spend four days deciding who should win the contest.
- 3** predict how many people will come to the awards ceremony.
- 4** keep the names of the winners a secret until November 20.

The Gift of Sight

One common cause of eyesight problems is cataracts, a disease that affects the lens of the eye. When people suffer from cataracts, the lens becomes clouded, making it difficult to see clearly. In severe cases, eyesight can be lost completely. Cataracts are caused by changes in the liquid inside the lens, and are relatively common as people become older. Nowadays, fortunately, most cataracts can be cured by a simple operation in which the lens is removed and replaced with an artificial one.

It is not only human beings, however, who suffer from cataracts. Many animals, both wild and domestic, can also get them. Recently, a small German company, called S&V Technologies, has developed special equipment for treating animal cataracts. One device it has developed is a portable machine for removing diseased lenses. This allows a veterinarian who has to treat an animal with cataracts to visit the animal rather than having it brought to a hospital. The company has also developed special plastic lenses for animals' eyes. These can be made in any size, from tiny ones for cats to large ones for animals such as elephants.

The company has been surprised by the strong demand for its products. Recently, for example, the Animal Health Trust, a British charity that helps animals, sent two veterinarians to China to treat a group of bears with eye problems. The veterinarians later said that without the new portable equipment, it would have been impossible to cure these bears. In another case, an aquarium in California used the equipment to help a sea lion that had trouble performing tricks for audiences because of cataracts. After the operation, the animal was able to perform perfectly again.

Although the equipment is expensive, there are many people who want to use it. In fact, according to S&V Technologies, the main problem now is that there are still so few veterinarians who know how to treat animal cataracts with its equipment. For this reason, the company has started training veterinarians how to use its products. Many people have applied to learn, which is good news both for the company and for animals around the world suffering from cataracts.

(37) Today, people who suffer from cataracts

- 1** need to change their contact lenses every day.
- 2** can usually have the problem fixed by surgery.
- 3** are able to treat the illness with a new medicine.
- 4** often find their eyesight improves as they get older.

(38) What is one way that S&V Technologies has helped animals with cataracts?

- 1** By donating machines for treating cataracts to many countries around the world.
- 2** By developing equipment that lets veterinarians treat animals without leaving their hospitals.
- 3** By inventing a special lens that changes size after it is put in the animal's eye.
- 4** By creating artificial lenses that can be used by a variety of different animals.

(39) Equipment from S&V Technologies

- 1** has made it possible to help animals that previously could not be cured.
- 2** is being produced in China by a charity called the Animal Health Trust.
- 3** allowed a group of sea lions in California to be set free in the ocean.
- 4** can be used to help certain kinds of animals learn new tricks.

(40) What is the biggest difficulty that S&V Technologies has discovered?

- 1** It is difficult for veterinarians to decide which animals to treat first.
- 2** Its equipment is too expensive for most veterinarians to buy.
- 3** There are not enough veterinarians who can use its products.
- 4** Few veterinarians have shown interest in its training program.

Desert Power

As the problem of global warming gets worse, governments around the world are looking for ways to cut the amount of carbon dioxide being produced. Now, a group of 20 German companies has come up with a plan to use the Sahara Desert in North Africa to provide clean electricity to Europe. According to Gerhard Knies of the Desertec Foundation, which is running the project, “Within six hours, deserts receive more energy from the sun than humankind consumes within a year.” The companies hope to use this energy to create electricity in a way that will not harm the environment.

When people think of solar energy, they usually think of solar panels, which convert sunlight directly into electricity. The Desertec plan is different. The foundation plans to build a line of solar power stations in the desert. Solar power stations work by using the strong desert sunlight to turn water into steam. This steam then turns turbines to create electricity. Solar power stations are not new, and four stations like the ones Desertec plans to build have been producing electricity in the desert in California for the last two decades. Desertec, however, plans to build many more solar power stations and send the electricity produced from the Sahara Desert to Europe through power lines.

According to Desertec, solar power stations have many good points compared with solar panels. They are able to produce electricity in much larger quantities, and they are also able to store the sun’s heat, allowing electricity to be produced at night as well as during the day. Moreover, the power stations are much cheaper to build relative to the amount of electricity they produce. Desertec says that its project could provide 15 percent of Europe’s electricity by 2050.

Not everybody supports the new plan. Some say that it would be better to concentrate on producing solar panels for houses in Europe. Others say that the power stations will need too much water. Desertec, however, says that water would be brought from the ocean, and that electricity would be used to remove the salt from this water. Some of this water could then be used by local farmers for growing crops. In this way, the people in the countries where the stations are built would also profit from the plan.

(41)

The Desertec Foundation aims to

- 1** encourage a group of 20 German companies to clean up the Sahara Desert.
- 2** make use of carbon dioxide found in North Africa to produce clean energy.
- 3** use the desert sun to provide energy without damaging the environment.
- 4** find a way to lessen the total amount of electricity that people consume each year.

(42)

How will Desertec's solar power stations create electricity?

- 1** By using solar panels to make electricity from sunlight.
- 2** By heating water to make steam that will turn turbines.
- 3** By sending hot water from the Sahara Desert to Europe.
- 4** By connecting Africa's power system with the one in California.

(43)

What is one difference between solar panels and solar power stations?

- 1** Solar panels can heat larger quantities of water.
- 2** Solar panels are able to produce much more energy.
- 3** Solar power stations are more common in Europe.
- 4** Solar power stations continue to work after dark.

(44)

According to Desertec,

- 1** the cost of solar panels is too high for many people in Europe.
- 2** the project will help local people by providing water for crops.
- 3** the power stations will require large amounts of salt to work properly.
- 4** the countries where the power stations are built will get free electricity.

(45)

Which of the following statements about Desertec's plan is true?

- 1** The power stations will be similar to ones operating in California.
- 2** Electricity from the power stations will be used to heat water at night.
- 3** The power stations will provide most of Europe's electricity by 2050.
- 4** Some people say that the power stations should be built in Europe.

Listening Test

Grade 2

2級リスニングテストについて

①このリスニングテストには、第1部と第2部があります。

★英文はすべて一度しか読まれません。

第1部……対話を聞き、その質問に対して最も適切なものを **1, 2, 3, 4** の中から一つ選びなさい。

第2部……英文を聞き、その質問に対して最も適切なものを **1, 2, 3, 4** の中から一つ選びなさい。

②No. 30のあと、10秒すると試験終了の合図がありますので、筆記用具を置いてください。

第1部

- | | |
|--------------|--|
| <i>No. 1</i> | 1 He went to the shopping mall.
2 Their car has broken down.
3 They should not go out this afternoon.
4 He cannot fix their stereo. |
| <i>No. 2</i> | 1 They do not live downtown anymore.
2 They have not met since college.
3 They will marry each other.
4 They both work at software companies. |
| <i>No. 3</i> | 1 The woman said her bill was incorrect.
2 The woman has lost her wallet.
3 The woman wants to pay with a credit card.
4 The woman is complaining about the food. |
| <i>No. 4</i> | 1 Buy an interesting book.
2 Turn off the TV.
3 Watch a different program.
4 Go to another room. |
| <i>No. 5</i> | 1 He will start a new job.
2 He will visit Montreal.
3 He will live with his parents.
4 He will call his father later. |
| <i>No. 6</i> | 1 It may snow heavily.
2 It may be too late to plant her garden.
3 The man's garden party may be canceled.
4 Her plants may freeze. |

- No. 7**
- 1** To ask for help with her homework.
 - 2** To find out someone's phone number.
 - 3** To find out about a restaurant.
 - 4** To ask for a job on campus.
- No. 8**
- 1** Borrow a guidebook for his wife.
 - 2** Take pictures of autumn leaves.
 - 3** Camp in the forest.
 - 4** Go hiking near his hotel.
- No. 9**
- 1** She hates traffic jams.
 - 2** She needs to save money.
 - 3** She wants to get more exercise.
 - 4** She can never find a parking place.
- No. 10**
- 1** He found a mistake on his receipt.
 - 2** He cannot get a refund.
 - 3** He did not know how to play his game.
 - 4** He plans to bring his son to the store.
- No. 11**
- 1** It may never be finished.
 - 2** His father takes it on vacations.
 - 3** He is helping to build it.
 - 4** It is too big for his garage.
- No. 12**
- 1** She can keep it.
 - 2** She should be careful with it.
 - 3** She should try to fix it.
 - 4** She must give it to her co-worker.
- No. 13**
- 1** Whether they have takeout food.
 - 2** What kind of tofu they use.
 - 3** What kind of dishes they serve.
 - 4** Whether he can change his reservation.
- No. 14**
- 1** Go shopping for a shirt.
 - 2** Teach the boy how to sew.
 - 3** Take a sewing class.
 - 4** Make a new shirt.
- No. 15**
- 1** Try a fruit she saw in a magazine.
 - 2** Buy a coconut to eat.
 - 3** Grow papayas in her garden.
 - 4** Take some photos for a magazine.

Listening Test

第2部

- No. 16**
- 1** Open a café.
 - 2** Quit her part-time job.
 - 3** Visit her husband's office.
 - 4** Work on Saturdays.
- No. 17**
- 1** He is afraid of flying.
 - 2** He failed a class at school.
 - 3** He cannot afford a plane ticket.
 - 4** He has no time for a vacation.
- No. 18**
- 1** Write about the environment.
 - 2** Get a job at a newspaper.
 - 3** Join a volunteer group.
 - 4** Take her family to the park.
- No. 19**
- 1** Sharon Newman dropped her credit card.
 - 2** Sharon Newman forgot to pay for something.
 - 3** Sharon Newman left her cosmetics on a counter.
 - 4** Sharon Newman picked up the wrong bag.
- No. 20**
- 1** To raise money to buy books.
 - 2** To communicate with book-club members.
 - 3** To help students write good reports.
 - 4** To recommend interesting clubs.
- No. 21**
- 1** He joined a group for protecting animals.
 - 2** He traveled around the United Kingdom.
 - 3** He became a politician.
 - 4** He made a law to protect animals.
- No. 22**
- 1** She got a job at the new shopping mall.
 - 2** She interviewed local businesspeople.
 - 3** She read books in the college library.
 - 4** She asked her classmates their opinions.

- No. 23**
- 1** He will earn money in the evenings.
 - 2** He will get money from his parents.
 - 3** He will borrow money from a bank.
 - 4** He will use money from his savings.
- No. 24**
- 1** See notes for the class.
 - 2** Buy their textbooks.
 - 3** Discuss topics from class.
 - 4** Send messages to classmates.
- No. 25**
- 1** They can work without electricity.
 - 2** They can send simple signals.
 - 3** They are still popular today.
 - 4** They are faster than telephones.
- No. 26**
- 1** She became a lawyer.
 - 2** She designed a new building.
 - 3** She joined a construction company.
 - 4** She started a business with her classmates.
- No. 27**
- 1** To make more people ride bicycles.
 - 2** To stop cars from using some roads.
 - 3** To get people to drive more safely.
 - 4** To let the police know about accidents.
- No. 28**
- 1** Look for new kinds of sportswear.
 - 2** Meet with his manager every day.
 - 3** Find a hotel for a business trip.
 - 4** Plan a party for his company.
- No. 29**
- 1** Record a new album.
 - 2** Sell music CDs in the lobby.
 - 3** Leave Brentville immediately.
 - 4** Sign T-shirts for fans.
- No. 30**
- 1** Its water is very clean.
 - 2** It is the largest lake in the United States.
 - 3** Several rivers run into it.
 - 4** It is near the ocean.
