Good Job

Nowadays, when you visit a successful company, you expect to see stylish, modern offices. Such companies often spend a lot of money on advertising and on creating a good public image. Their goals are to both impress customers and (**21**). In fact, people who are looking for a job are much more likely to apply to a famous and successful company.

A recent trend in the United Kingdom, however, is for people to consider other things when choosing a company they want to work for. Russell Govan, who works in human resources, has been interviewing job applicants for 25 years. In the last few years, Govan says, he has (**22**). These days, he says, more and more young people prefer a pleasant atmosphere with friendly and supportive co-workers to high pay at a successful company. Basically, they are looking for companies that will give them the happiest working experience and the most satisfaction.

Innocent Drinks, a fruit drink company in London, is one company that is trying to create such a fun and relaxed image. For example, it has set up an informal working environment where employees are able to chat and joke with their co-workers, so employees say they enjoy working there. (**23**), the owners say that this enjoyable environment leads to better ideas, such as cute pictures on their products' labels and a fun website written in informal English. Customers, too, are attracted to the company by its casual style. With all these benefits, it is likely that more companies will follow this trend.

Mystery in the Sky

If you look up at the sky on a clear summer night, you might be lucky enough to see a special type of cloud glowing in the darkness. These clouds are strange and rare events called noctilucent clouds (NLCs). NLCs are different from the clouds we see every day. Most clouds form near the earth's surface—usually within 10 kilometers of the ground. (**24**), NLCs are formed around 80 kilometers away, in a section of the sky called the mesosphere. NLCs are also colorful—generally bright blue, but sometimes red, yellow, or white.

Scientists believe that, like normal clouds, NLCs are made of tiny ice crystals. However, in the mesosphere, it is usually (**25**). In order for ice crystals to form and create clouds, there must be water and dust for that water to stick to. NLCs are only able to form in the summer, when winds carry water up to the mesosphere from lower levels of the atmosphere.

NLCs have only appeared in recent times. In fact, the first NLCs were recorded in 1885, two years after a volcano erupted in Krakatoa, Indonesia. Scientists believe that the volcano released huge amounts of dust into the mesosphere, which allowed NLCs to form. Although this may explain why NLCs were seen after the eruption, it does not explain the NLCs that occur today. Some scientists now believe that NLCs are (**26**). For one thing, NLCs did not start to appear until the modern age, when carbon dioxide and other gases began to increase. For another, they are becoming more frequent and widespread as temperatures rise.

To: Michael Smith <msmith22@gmail.com>
Date: January 27
Subject: Your recent purchase

Dear Mr. Smith,
Thank you for your recent order of *The Oldest Day* by Rachel Woodrow. We at Maze Online Books would like you to take a few minutes to write a review of the book online. In return, we're offering \$2 off your next book order from our website. Simply log in to your Maze account, view "recent purchases," and click on the "review" link to the right of the book you purchased.
Please understand that we're asking for a review of the content of the book, not of our services. If you had a problem with delivery or payment, please send a message to our customer service center at customer-service@mazebooks.com. Once your book review is complete, we will e-mail you a coupon code. The coupon can be used for book purchases, including e-books. However, it cannot be used to purchase other goods on our website.
Also, from next month, Maze will be lowering the price of our book-of-the-month service to only \$10 per month. Each month, you can choose one of five different books which are recommended based on the books that you like. It's a great way to get introduced to new authors. If you're interested, you can sign up today and get 10 percent off your first month by using this code: READ12.
Sincerely,
The Maze Online Books Team

- (27) Maze Online Books has e-mailed Mr. Smith
- 1 to confirm his order of *The Oldest Day*.
 - 2 to ask him to review a book that he bought.
 - 3 because he needs help logging in to his account.
 - 4 because he was unhappy with his recent purchase.
- (28) What should Mr. Smith do if his book was damaged during delivery?
- 1 Exchange it for other goods on the store's website.
 - 2 Write about it in his review of the book.
 - 3 Tell Maze and get a coupon code.
 - 4 Send an e-mail to the customer service center.
- (29) What is true about Maze's book-of-the-month service?
- 1 It will become cheaper next month.
 - 2 Customers receive five books each month.
 - 3 Maze chooses the book of the month randomly.
 - 4 Mr. Smith can get 10 percent off for the whole year.

A New Type of Chocolate

Chocolate is one of the most popular foods in the world, and more and more of it is consumed every year. Recent research has shown that chocolate can have good effects on people's health. However, chocolate also contains ingredients, such as fat and sugar, which can be harmful. This means that eating a lot of chocolate is not good for you. Recently, though, a team of scientists at the University of Warwick in the United Kingdom has come up with a way to replace fat in chocolate without affecting the taste.

The reason that traditional chocolate has so much fat in it is that the fat is needed to keep all the ingredients combined together. Chocolate usually consists of cocoa powder, cocoa butter, fat from milk, sugar, and water. These ingredients separate easily. Therefore, extra fat is added to keep all these different ingredients together. The fat also creates the smooth feeling of chocolate. The team of scientists, though, has found a new and much healthier way to keep the ingredients of chocolate together.

In this method, first, fruit juice, which is healthier than fat, is converted into tiny bubbles. These are then mixed with the other ingredients in order to hold them all together. According to the leader of the team, Stefan Bon, it is possible to replace up to 50 percent of the fat with fruit juice in this way. The method can be used with dark, milk, or white chocolate, and the fruit juice maintains the feeling of chocolate in the mouth. So far, the team has been able to use cranberry, orange, and apple juice.

Of course, fruit-flavored chocolate has been available for some time. This time, though, the aim is not to improve the flavor of the chocolate but to make it healthier. More recently, the scientists have found that it is possible to replace the fruit juice with water and vitamin C in order to maintain a purely chocolate flavor. Even with the new method, chocolate will continue to have fat and sugar, so people should be careful not to eat too much. The new method, however, will make it much healthier than before.

(30)

The chocolate developed by a team of scientists at the University of Warwick

- 1** has become the most popular type of chocolate in the world.
- 2** has more sugar but less fat than most types of chocolate.
- 3** tastes good but is healthier to eat than traditional chocolate.
- 4** helps people who dislike the flavor of traditional chocolate.

(31)

Why is extra fat added to traditional chocolate?

- 1** To add a harder feeling to some types of chocolate.
- 2** To improve the taste of the milk used in chocolate.
- 3** To reduce the amount of sugar that is necessary.
- 4** To prevent the various ingredients from separating.

(32)

What has the team of scientists discovered?

- 1** A type of fruit juice that can be added to chocolate to improve its taste.
- 2** A way to make chocolate that maintains the sweet flavor of fruit juice.
- 3** Up to half of the fat in chocolate can be replaced with fruit juice.
- 4** Fruit juice can be added to traditional chocolate to make it harder.

(33)

The team of scientists has found that

- 1** adding vitamin C to chocolate can make it even healthier than adding fruit juice alone.
- 2** water and vitamin C can be used to make chocolate healthier without changing the taste.
- 3** the combination of fat and sugar in chocolate is the main reason that people enjoy eating it.
- 4** chocolate that tastes like fruit is naturally healthier than other types of chocolate.

Female Pioneers

Since the computer's invention, many of the people famous for working in computer science have been men. Even now, only about 25 percent of people working in computer-related fields in the United States are women. However, some of the first computer programmers were a group of American women who worked at the University of Pennsylvania in the 1940s. They made a huge contribution to the development of modern computers, but for many years their work was largely forgotten.

During World War II, many American men were fighting overseas. As a result, women were needed for jobs that were traditionally done by men. For example, in 1942, the U.S. Army hired a group of women who had studied math in university. The U.S. Army needed to understand where and how its rockets and bombs moved, so the army asked the women to do the calculations. At first, the women worked with desk calculators. Each calculation took one woman about 20 hours to complete.

To reduce the time it took to complete these calculations, the army developed a special computer in 1943. It was called ENIAC, and it was designed by engineers at the University of Pennsylvania. The computer was big enough to fill a whole room and had to be programmed before each calculation. Six women were chosen to develop a way to program the computer. Their names were Kathleen Antonelli, Jean Bartik, Betty Holberton, Marlyn Meltzer, Frances Spence, and Ruth Teitelbaum. Although it could sometimes take a long time to program the computer for a calculation, once the computer was programmed, it only took 30 seconds to complete each calculation.

Although the women created one of the first computer programs, few people remembered them. Then, in 1986, a young female student at Harvard University, Kathryn Kleiman, was researching women in computer science. She came across a photo of the six women working with ENIAC. She began to research the women's contribution and eventually made a documentary about them. Finally, the women were recognized for the big role they had played in the development of modern computing. Kleiman believes that remembering these women is important because it will encourage more women to take up careers in computer science.

(34)

What is true about computer programming?

- 1** Most people had forgotten that some of the first computer programmers were female.
- 2** A majority of people who study to become computer programmers are women.
- 3** Male computer programmers have trouble finding jobs in the modern economy.
- 4** Most of the men working in computer programming studied at the University of Pennsylvania.

(35)

What happened during World War II?

- 1** Women began doing jobs which had mostly been done by men before the men went to war.
- 2** Men who had studied math in college often found it difficult to find a place to work.
- 3** The U.S. Army calculated the time it took to build rockets and bombs.
- 4** The U.S. Army hired a group of women to fight along with men overseas.

(36)

ENIAC was

- 1** a special program where women could learn how to develop new computers.
- 2** a device that could quickly do calculations that took humans a long time to complete.
- 3** an event held by the U.S. Army to increase the security of their computers.
- 4** a type of device that was used by computers to increase the speed of their calculations.

(37)

What did Kathryn Kleiman do?

- 1** She created a group to support women who want to become computer programmers.
- 2** She made a documentary about a group of women who helped develop modern computer programming.
- 3** She became the first woman to get a degree in computer programming at Harvard University.
- 4** She developed a new way to use computer programming to create movies.

(38)

Which of the following statements is true?

- 1** Women calculated the movements of rockets and bombs for the U.S. Army during World War II.
- 2** Kathryn Kleiman began teaching computer science at Harvard University in 1986.
- 3** The first computer was so large that it took two days for a group of women to repair.
- 4** About 75 percent of young American women have said that they will study computer science.

一次個人成績表に可否結果を記載して、2月19日までに送付します（合格の場合は、一次個人成績表の右上部分が二次受験票になります）。未着の場合は2月19日以降に英検サービスセンター03(3266)8311（平日9:30～17:00）までお問い合わせください（お問い合わせの際には個人番号もお知らせください）。

◆団体申込の場合

一次個人成績表は2月19日までに申込責任者あてに送付します（個人あてには送付しません）。

■二次試験について（一次試験合格者のみ）■

1) 試験日 A日程：2月24日(日) B日程：3月3日(日)

- 二次試験の受験日は、A日程・B日程のうち、申込方法・希望受験地等に基づき協会が指定します。試験日・受験会場・集合時間は二次受験票（一次個人成績表の右上部分）で通知します。これを切り離して受験会場にお持ちください。
- いかなる場合も二次受験票で指定された試験日・受験会場・集合時間での受験となり、変更はできません。
- 日程区分については、英検ウェブサイトの【二次試験のA／B日程の区分けについて】をご確認ください。
- ダブル受験（隣接した2つの級を一緒に受験）の場合、それぞれの級について二次受験票に記載の日程での受験となり、級により異なる日程での受験となる場合があります。
- 年齢は申込時に申請した生年月日に基づいて算出します（一次試験の答案に異なる生年月日を記入されても反映されません）。
- 申込情報に不備がある場合、協会が指定した日時での受験となり、【二次試験のA／B日程の区分けについて】のとおり日程とならない場合があります。
- 一部特別会場（海外・離島等）、障がい者特別措置にて二次試験を受験する場合についてはA日程とします。

2) 受験地（希望の受験地を選べます）

- 下記の二次試験受験地番号表をみて、希望の受験地番号を解答用紙（準会場で受験している場合は志願票）の所定欄に記入・マークしてください。
