

2015-1

Grade

Pre-1

実用英語技能検定

主催：公益財団法人 日本英語検定協会

後援：文部科学省

準 1 級

2015 年 6 月 7 日(日) 実施

■ 試験時間

筆記試験 (90分)

リスニングテスト (約30分)

■ 注意事項

1. 試験開始まで、この問題冊子を開いてはいけません。
2. 解答は、解答用紙（マークシート）に記入してください。
解答用紙以外に記入した解答は、すべて無効となります。
問題冊子にはメモをしてもかまいませんが、後で解答用紙に解答を書き写す時間はありません。
3. 問題内容に関する質問は一切受けつけません。
4. 不正行為をした場合は、答案は無効となります。
5. 他の受験者に迷惑をかける行為を禁じます。
6. リスニングテストの準備時間、およびリスニングテスト中に教室外へ出た場合は、その後教室に戻りテストを受けることはできません。
7. 携帯電話などは必ず電源を切って机の上に置き、絶対に使用しないでください。
8. 電子機器（ウェアラブル端末を含む）の使用を禁じます。
9. 携帯電話などの着信音・バイブ音、その他試験を妨げる音を発生させた場合は、失格とすることがあります。
10. 試験終了後、問題冊子は持ち帰ってください。
11. 採点結果等については、一切異議申し立てはできません。
12. この試験問題の複製（コピー）を禁じます。また、この試験問題の一部または全部を協会の許可なく他に伝えたり、漏えい（インターネット上に掲載することを含みます）することを禁じます。

1

To complete each item, choose the best word or phrase from among the four choices. Then, on your answer sheet, find the number of the question and mark your answer.

- (1) Although most sharks are (), they rarely attack humans. When they do, it is usually because they have mistaken a person for a marine animal.
1 predators **2** contenders **3** ancestors **4** peasants
- (2) Jan and Dave spent over a year searching for their dream house. Their () finally ended when they found a lovely little cottage in a quiet village.
1 quest **2** legacy **3** exposure **4** potency
- (3) Margaret's grandfather left her an old vase when he died. She had its value () by an antique dealer and was surprised to hear it was worth over \$5,000.
1 inhibited **2** assessed **3** multiplied **4** deflated
- (4) The economist's ideas did not come into () until many years after his death. While he was alive, his work was largely ignored.
1 restriction **2** distress **3** detention **4** prominence
- (5) Due to the heat and high moisture in rainforests, dead plants () very rapidly. Even a fallen tree can almost completely disappear within months.
1 revolt **2** flash **3** decay **4** eject
- (6) Stephanie's job involved mostly () work such as making copies and entering data.
1 parental **2** clerical **3** nutritional **4** radical
- (7) The () told the judge he was innocent and that he had been nowhere near the jewelry store at the time of the robbery.
1 comrade **2** guardian **3** defendant **4** outcast
- (8) **A:** Is this bread supposed to be this hard, George?
B: No. It was left open for a couple of days, so it's gone ().
1 glossy **2** stale **3** frosty **4** blunt
- (9) Peter's speeding ticket was declared () by the judge because the police officer who caught him had put the wrong date on the ticket.
1 void **2** secure **3** liable **4** reputable

- (10) The nation's most popular amusement park hopes to () its position by building the world's biggest roller coaster.
1 esteem **2** condense **3** enroll **4** consolidate
- (11) Betty is having a hard time losing weight. When shopping at the grocery store, she gets an () urge to buy cakes and cookies.
1 insufficient **2** inactive **3** irrelevant **4** irresistible
- (12) For the safety of participants at the economic forum, police put () in the streets to prevent protesters from getting too close to the conference center.
1 reservoirs **2** pavilions **3** barricades **4** valves
- (13) After he skipped the morning's classes, Rupert tried to () a convincing story to explain his absence to his teachers.
1 pronounce **2** distrust **3** aggravate **4** fabricate
- (14) The zookeepers were able to () the escaped tiger back into its cage by placing some meat just inside the cage's entrance.
1 yield **2** clutch **3** lure **4** drip
- (15) The Johnsons are well known for their (). They invite friends over for dinner once a week, and they treat all their guests like family.
1 dullness **2** syndrome **3** hospitality **4** infinity
- (16) In summer, the area has () birdlife. In winter, however, it is so cold that most of the birds fly to warmer regions.
1 inelegant **2** abundant **3** proficient **4** rigid
- (17) When Camilla finished the project after 24 hours of nonstop work, she was overcome by (), so she went straight to bed.
1 fatigue **2** literacy **3** friction **4** ignition
- (18) **A:** What did Bill say when you told him you'd lost his book?
B: Actually, he was very (). He told me not to worry about it.
1 impaired **2** chaotic **3** gracious **4** credible

- (19) Protesters gathered in front of Parliament after the government's secret plans to build more nuclear power plants were () to the press.
1 ruined 2 leaked 3 subscribed 4 endorsed
- (20) Sharing a house with people is fine as long as everyone is () and understanding of one another's habits.
1 considerate 2 immodest 3 rotten 4 fictitious
- (21) The principal reminded the students that they are expected to () to the school rules, which include the wearing of uniforms.
1 conform 2 propel 3 lobby 4 deflect
- (22) The police chief has promised to () the escaped prisoner no matter how long it takes. "We will catch him," he said.
1 wipe up 2 track down 3 wander off 4 stir in
- (23) Although Michelle did not need a new vacuum cleaner, she was () buying one by the convincing salesman.
1 talked into 2 handed off 3 taken over 4 driven off
- (24) A: Where are you () to, Sam?
B: To the library, Dad. I'll be back in about two hours.
1 backing up 2 watching over
3 setting up 4 heading off
- (25) A: It's so hot. I could really () an ice-cold soda.
B: I'll see what we have in the refrigerator.
1 hold back 2 cut down 3 clear out 4 go for

Read each passage and choose the best word or phrase from among the four choices for each blank. Then, on your answer sheet, find the number of the question and mark your answer.

Thai Elephants

Elephants have traditionally been used as working animals in Thailand, especially for the logging industry in the northern part of the country. In 1989, however, logging was banned because of concerns about deforestation, leaving the animals and their owners without work. Meanwhile, the tourism industry has (26). Desperate to make money, many elephant owners now offer sightseers the chance to ride their animals or watch them perform tricks. It is estimated that over 2,000 elephants in Thailand are involved in such work today.

Working elephants are considered “domesticated” in Thailand. Truly domesticated species, such as dogs and horses, have been specially bred so that they inherit characteristics that make them calmer, and therefore easier for humans to control. Elephants, on the other hand, (27). Working elephants in Thailand are no different genetically from wild elephants. They are tamed using a method known as “the crush,” in which young animals are locked in a small space, starved, and beaten until they obey human commands.

Sangduen Chailert is an activist who runs an elephant rescue and rehabilitation center in northern Thailand. She believes the method currently used by trainers in Thailand to tame the animals (28). “I do not believe elephants need to taste pain to learn how to listen,” says Chailert, who points out that the harsh practice can make elephants aggressive and dangerous. Her gentle training methods have won her fame throughout the world. Though her facility can assist only a small number of elephants, her work has raised global awareness of the issue.

|------|----------------------------------|-------------------------------------|
| (26) | 1 presented an alternative | 2 asked the government for help |
| | 3 stopped benefiting the economy | 4 resisted making changes |
| (27) | 1 are considered easier to train | 2 have never been bred in this way |
| | 3 are found in fewer places | 4 have developed a major advantage |
| (28) | 1 should be widely adopted | 2 is important for the local people |
| | 3 may have the opposite effect | 4 is unpleasant but necessary |

Dam Removal

Of the approximately 85,000 dams in the United States today, only about half are still used to supply water for agriculture or to generate electricity. As these dams continue to affect the environment by blocking the movement of fish and preventing them from breeding, a policy of removing the dams has become common. Several decades ago, though, (29). Only recently has the negative impact of dams come to be seen as greater than their economic benefits. This shift in opinion has led authorities to approve an increasing number of dam removal projects.

In 2009, the U.S. Forest Service decided to remove the Hemlock Dam on Trout Creek in Washington State so the declining fish population could recover. (30), however. The dam was blocking large quantities of mud and sand, which had built up over the years. Simply removing the dam would likely have caused this to be carried downstream, killing the fish and other wildlife there. Authorities spent years deciding on a solution. Finally, pipes were installed to carry the creek's water along a different route, bypassing the dam. As the water level behind the dam fell, trucks carried the sand and mud away and the dam was finally removed.

The project appears to have been a success. Many conservationists praise the results, noting that the number of fish in the creek has been increasing. (31), fish populations can vary so much from year to year that it will be a while before scientists can determine if this trend will continue.

-
- | | | |
|------|--|---|
| (29) | 1 such action was more necessary
3 more dams were being removed | 2 this idea was not considered
4 new dams were not being built |
| (30) | 1 There was a potential danger
3 There were few capable workers | 2 The dam was not to blame
4 This was not the only reason |
| (31) | 1 Nevertheless
3 Moreover | 2 In other words
4 For one thing |

Read each passage and choose the best answer from among the four choices for each question. Then, on your answer sheet, find the number of the question and mark your answer.

Whale and Dolphin Watching

Whale and dolphin watching has grown in popularity in recent decades, with the number of people joining such tours each year rising from 4 million in 1991 to 13 million in 2008. This is generally considered a positive development, as the activity is thought to increase appreciation for the animals and encourage support for conservation efforts. Concern is growing among scientists, however, regarding the risks involved. For one thing, the increasing number of tourist boats has made collisions with whales and dolphins more common. What is more, the animals' behavior has been affected. Marine biologist David Lusseau observed minke whales in Faxaflói Bay in Iceland reacting to the boats as they do to killer whales and other dangerous animals: they changed course quickly and swam rapidly away, tiring themselves out in the process.

While Lusseau believes there has been no impact on the population size of minke whales in Faxaflói Bay, he found that the large number of dolphin-watching trips in Doubtful Sound, New Zealand, had caused the local population of bottlenose dolphins to decline from 67 to 56 over an eight-year span. Lusseau says the dolphins' efforts to avoid boats have led to lost feeding opportunities, and that this has had a negative effect on young dolphins' survival rates.

Biologists say authorities should take measures to address the problem, such as identifying areas where whale and dolphin populations are most at risk and making them off-limits to tours. Introducing guidelines, such as a minimum distance between tourist boats and the animals, is also recommended. Additionally, requiring boats to slow down would be effective, as it would give the animals a chance to get away when they feel threatened. Although some guidelines are already in place, they are not strictly enforced in most areas. Unless strict regulations to protect the animals are established and consistently applied, tourists will likely continue to pose a threat.

(32)

What is true of whale and dolphin watching as a tourist activity?

- 1 It may not be as beneficial to the animals as is widely believed.
- 2 Its popularity is forcing the animals to move into dangerous areas.
- 3 Participants often ignore warnings about the danger to themselves.
- 4 Dolphins are at greater risk of being hit by tourist boats than whales are.

(33)

David Lusseau believes that

- 1 the presence of tourist boats has caused the number of minke whales in Faxaflói Bay to fall.
- 2 high levels of tourism in Doubtful Sound have made it harder for bottlenose dolphins there to obtain food.
- 3 minke whales in Faxaflói Bay have a greater fear of tourist boats than they do of killer whales.
- 4 tourism has made it difficult for biologists to do research on bottlenose dolphins in Doubtful Sound.

(34)

What is one recommendation that scientists have made regarding whale and dolphin watching?

- 1 It should be stopped until its effects on the size of whale and dolphin populations are fully understood.
- 2 Tour operators should report their schedules to authorities before entering protected areas.
- 3 Current guidelines should be relaxed because they encourage illegal whale and dolphin watching.
- 4 Boats should be subject to a speed limit in order to allow whales and dolphins time to escape from them.

Bodies on Display

In 1995, the first *Body Worlds* traveling exhibit was met with shock and fascination by the viewing public. It featured actual human bodies, posed as if frozen in action, with the skin removed to show muscles, bones, and organs preserved in plastic. More *Body Worlds* exhibits followed in subsequent years, drawing nearly 35 million viewers but causing controversy as well. Many people have been offended by what they see as a disrespectful display of human remains. The bodies are given titles, such as “the Baseball Player” and “the Dancer,” and are placed in poses that imitate movements associated with various activities. Some critics argue that this artistic element proves the motive of such exhibits is profit rather than education. Others feel that placing bodies in this artificial context turns them into objects, taking away the qualities that once made them human and ignoring their individual pasts.

Displaying dead bodies is not a new idea. Mummies and other forms of human remains have long been shown in museums. Recently, however, many cultural and ethnic groups have begun protesting these exhibits. The Indigenous Association of Argentina, for example, tried to prevent the exhibition of three mummified Incan children found on Argentina’s Llullaillaco peak, calling it an insult to indigenous peoples. It is believed the children were sacrificed as part of an ancient Incan religious ceremony. According to the president of the association, Rogelio Guanuco, displaying the mummies is wrong because “it turns something spiritual into something commercial.”

The American archaeologist who discovered the mummies, Johan Reinhard, has a different perspective, however. He argues that it is better to keep such remains in museums, where they can be protected from thieves. He views his work as anything but an insult, seeing it instead as a sort of cultural preservation. Indeed, the Incan mummies, which are on display at a museum in Argentina, have revealed much information about the diet, dress, and practices of a culture that had been largely lost to history. Instead of keeping such educational treasures from public view, more institutions have begun adopting policies to ensure they are displayed respectfully. One priority of these institutions is to make sure educational and cultural information is communicated clearly. Many also use signs to prepare visitors for what they will see, and display mummies under soft lighting to create a peaceful, tomblike setting. By taking care not to offend visitors, these institutions hope to avoid the controversies associated with exhibits such as *Body Worlds*.

(35)

Some opponents of *Body Worlds* believe that

- 1 the use of plastic to preserve the bodies is unnatural and therefore not appropriate for human remains.
- 2 the ways the bodies are posed provide hints about their pasts, which could enable viewers to recognize them.
- 3 the money made by the exhibits should be partially shared with the dead people's families.
- 4 the bodies are displayed in a manner that shows little respect for the lives they once lived.

(36)

What do we learn about Johan Reinhard?

- 1 He is proud of having discovered the Llullaillaco mummies but thinks it is wrong to profit from them.
- 2 He supports the transfer of the Llullaillaco mummies to a museum because he believes they are safer there.
- 3 He fears the Llullaillaco mummies were damaged so badly that it will never be possible to display them.
- 4 He is certain that some of the Llullaillaco mummies' possessions were stolen before he discovered the mummies.

(37)

What is one recent policy introduced by some institutions regarding human remains?

- 1 Remains that have been illegally obtained are removed from display and given a proper burial.
- 2 Remains are displayed in ways that attempt to be informative to viewers without upsetting or shocking them.
- 3 The institutions agree to use remains only for research unless permission for other uses is given by family members.
- 4 The institutions display the remains for a certain amount of time and then return them to their places of origin.

Teach for America

In the 1960s, a U.S. Department of Education report revealed a link between low-income students and weak academic performance. Over the next two decades, policies aimed at increasing learning opportunities for such students succeeded in raising the number of high school graduates by 25 percent. Unfortunately, declines in the overall quality of public education and in high school students' academic performance, which had resulted from changes in both college entrance standards and high school graduation requirements, were also observed. In 1983, the National Commission on Excellence in Education warned that this was destroying the "educational foundations of our society" and threatening the nation's future.

Over the following decade, efforts were made to address this problem. The Teach for America (TFA) program, which is administered by a nonprofit organization, has become one of the most well known. Founded on the theory that highly motivated college graduates can make a difference in the classroom, TFA recruits academically successful young people—many from elite institutions—to spend two years teaching in underperforming schools. Since its beginning in 1990, TFA has grown impressively: the program received roughly 57,000 applications for the 2013–2014 academic year and placed more than 10,000 individuals in schools across the United States.

With their weaker students and challenging working conditions, public schools in poor areas have trouble attracting skilled, committed teachers. This is no small problem; education specialist Richard Kahlenberg points out that "a growing body of research indicates that teacher expertise is one of the most important factors in determining student achievement." Teaching is not a well-paid career in the United States, however, and top-achieving college graduates tend to want to enter other professions. By placing high achievers—who are, it should be noted, not trained as professional teachers—in struggling classrooms, TFA hopes to level the educational playing field.

Whether it is achieving this goal is another story. While teacher impact is difficult to measure because of the many variables involved, at least five studies have examined the effectiveness of TFA instructors. It was found that, particularly in the lower elementary grades, the students of TFA instructors performed no better than students of first-year teachers who had received traditional training in education. The students of TFA instructors were also consistently outperformed by students of experienced teachers. Deborah Appleman, a professor of educational studies at Carleton College in Minnesota, says there is an elitist attitude at TFA, "a belief that the best and the brightest can make a difference in the lives of children who are less fortunate, even when they are not professionally prepared to do so."

Other critics complain that schools with limited funding are hiring TFA recruits rather than career teachers because the former tend to quit before their salaries rise significantly on the pay scale. In recent years, as budget cuts have led to staff reductions and school closings, the TFA presence in schools has continued to grow. Some people question how this trend could possibly lead to expanded educational opportunities, and suggest that the program may even worsen the educational and socioeconomic unfairness it is meant to eliminate.

(38) Why did the National Commission on Excellence in Education release a warning in 1983?

- 1** Efforts to bring more teachers to low-income areas had created a shortage of qualified teachers in high-performing schools.
- 2** Changes in the public education system had resulted in a generally lower level of education for high school students.
- 3** Students from low-income families had not changed their attitudes toward high school education over the previous 20 years.
- 4** The number of high school graduates in the United States had decreased due to changes in the nation's economy.

(39) The Teach for America program is based on the idea that

- 1** having academically successful college graduates teach in school classrooms can lead to improved student performance.
- 2** college graduates with previous experience volunteering in school classrooms are better able to teach high-achieving students.
- 3** putting low-performing children from poor areas in classrooms with wealthier students will motivate them to do well in school.
- 4** educational reform should be led by individuals who have experience working with students from disadvantaged backgrounds.

(40) What does Richard Kahlenberg say about student achievement?

- 1** Students of well-paid teachers are more likely to go on to receive a college education.
- 2** Students in low-income areas should have access to the same equipment and resources that those in wealthy areas have.
- 3** Students show the most progress when they are instructed by skilled individuals who possess a high level of knowledge about education.
- 4** Students in low-income areas are best motivated by teachers with socioeconomic backgrounds similar to their own.

(41) What does Deborah Appleman suggest about the TFA program?

- 1** TFA recruits are only in the classroom for two years, so any improvement they bring to classroom achievement is temporary at best.
- 2** Veteran teachers are experiencing cuts in salary and benefits because of the high number of TFA teachers willing to work for low pay.
- 3** The impact TFA recruits have on communities has been much smaller than it could be because of the program's limited funding.
- 4** The impressive background and intelligence of TFA teachers is not enough to make up for their lack of training and experience.

- Read the e-mail below.
 - Imagine that you are Shion. Write an appropriate response to Mike.
 - Your response should be around 100 words in length.
 - Write your response in the space provided on Side B of your answer sheet.
- Any writing outside the space will not be graded.

E-MAIL

Dear Shion,

I hope you are well.

I read a magazine article about Japan last night. It said that some traditional Japanese arts, such as the tea ceremony and flower arrangement, are becoming popular with young people again. What do you think is the reason for this?

The article also said that more cities and towns in Japan are creating their own mascots. Do you think having these mascots is a good idea?

By the way, a friend of mine is moving from the city to the countryside with his wife and children soon. Do you think it's better for children to grow up in the countryside?

I look forward to hearing from you.

Mike

MEMO

Listening Test

There are three parts to this listening test.

Part 1	Dialogues: 1 question each	Multiple-choice
Part 2	Passages: 2 questions each	Multiple-choice
Part 3	Real-Life: 1 question each	Multiple-choice

※ Listen carefully to the instructions.

Part 1

- No. 1**
- 1** Treat her daughter at home.
 - 2** Get an earlier appointment.
 - 3** Call a different clinic.
 - 4** Come back in the afternoon.
- No. 2**
- 1** Sell her car on the Internet.
 - 2** Talk to her family before buying a car.
 - 3** Take her children car shopping.
 - 4** Buy a car with enough space.
- No. 3**
- 1** Karen spilled coffee on his desk.
 - 2** Karen will have to redo the work.
 - 3** Karen did not meet the project deadline.
 - 4** Karen complained about her grade.
- No. 4**
- 1** She has made a doctor's appointment.
 - 2** She has been to the clinic.
 - 3** She is feeling a little better.
 - 4** She needs more medication.

- No. 5**
- 1** Be less protective of her son.
 - 2** Pay more attention to her son.
 - 3** Find safer activities for her son.
 - 4** Be more confident as a parent.
- No. 6**
- 1** Contact the computer shop.
 - 2** Return the printer.
 - 3** Call the card company.
 - 4** Try and find her receipt.
- No. 7**
- 1** She does not pay attention to clients.
 - 2** She does not speak up in staff meetings.
 - 3** She is failing to meet her sales targets.
 - 4** She is missing too many meetings.
- No. 8**
- 1** To raise money for a local organization.
 - 2** To encourage physical fitness.
 - 3** To provide an activity for children.
 - 4** To celebrate the opening of a park.

- No. 9**
- 1** Her father wants her to choose another career.
 - 2** She lost the application form.
 - 3** Her father did not correct her writing.
 - 4** Many people will apply to the school.
- No. 10**
- 1** She does not want to give their things to charity.
 - 2** She does not want to have another yard sale.
 - 3** She wants to change the moving date.
 - 4** She wants to advertise in the newspaper.
- No. 11**
- 1** They have all moved north of town.
 - 2** They offer the cheapest goods.
 - 3** They provide high-quality customer service.
 - 4** They do not sell the same range of items.
- No. 12**
- 1** The class is not challenging enough.
 - 2** The professor is too busy to help them.
 - 3** The study guide is not helpful.
 - 4** The book is difficult to understand.

Listening Test

Part 2

- (A) No. 13**
- 1** Fruit juice is healthier than dark chocolate.
 - 2** Dark chocolate can protect people's health.
 - 3** Heart disease is declining in the United States.
 - 4** Antioxidants have dangerous side effects.

- No. 14**
- 1** It may help keep people slim.
 - 2** It has fewer calories than once thought.
 - 3** It should be eaten after exercise.
 - 4** It is better for women than it is for men.

-
- (B) No. 15**
- 1** Their fish are not popular in Europe.
 - 2** They are located in caves.
 - 3** Their pumps pollute the desert's ecosystem.
 - 4** They use water that comes from underground.

- No. 16**
- 1** The water they use costs too much money.
 - 2** The water they use should be used for drinking.
 - 3** The water they use will not last for very long.
 - 4** The water they use contains harmful chemicals.

- (C)** **No. 17** **1** They allow power companies to adjust their rates.
2 They send data directly to consumers.
3 They are not made in the United States.
4 They prevent power outages from occurring.

- No. 18** **1** Power companies make too much money.
2 Their personal information may not be safe.
3 Smart-meter data is inaccurate.
4 Smart meters are likely to break down.
-

- (D)** **No. 19** **1** Water drops fall at different speeds.
2 Water drops break up in midair.
3 Water-drop size is affected by temperature.
4 Water-drop size is surprisingly consistent.

- No. 20** **1** By preventing the loss of soil.
2 By predicting rainfall more accurately.
3 By making chemical spraying more effective.
4 By creating new chemicals.

- (E)** **No. 21** **1** Their natural habitat was badly damaged.
 2 There was conflict with other tortoise species.
 3 Humans brought a virus to the island.
 4 Goats consumed the tortoises' eggs.
- No. 22** **1** Introduce new tortoise species to the Galápagos Islands.
 2 Encourage hunters to kill invasive animals.
 3 Ban people from visiting certain areas.
 4 Teach people about the dangers of invasive animals.
-

- (F)** **No. 23** **1** Observing the suspect's gestures.
 2 Measuring the suspect's eye contact.
 3 Focusing on the content of the suspect's responses.
 4 Keeping the suspect in a bright room.
- No. 24** **1** Understanding the suspect's communication style.
 2 Getting the suspect to write down some questions.
 3 Having the suspect describe the crime in detail.
 4 Asking the suspect to draw some pictures.

Listening Test

Part 3

(G) No. 25 **Situation:** You teach private guitar lessons. You are fully booked Saturday afternoon and Sunday morning. A student leaves the following voice mail on Thursday.

Question: What should you do?

- 1** Cancel the lesson for this week.
- 2** Reschedule the lesson for Friday evening.
- 3** Reschedule the lesson for Saturday morning.
- 4** Reschedule the lesson for Sunday afternoon.

(H) No. 26 **Situation:** Last year, you worked at a U.S. university. You are now back in Japan and want your final paycheck. A former co-worker leaves the following voice mail.

Question: What should you do?

- 1** Send the university a signed letter.
- 2** Have the paycheck paid into your U.S. bank account.
- 3** Open a new Japanese bank account.
- 4** Ask Kelly to speak to the university again.

- (I) No. 27** **Situation:** Your cell phone is not working, and you want a new one. You contact your service provider and hear the following message.
- Question:** What should you do?
- 1** Press 1.
 - 2** Press 2.
 - 3** Press 3.
 - 4** Press 4.
-

- (J) No. 28** **Situation:** You want to buy a bicycle for a cycling holiday. You will be cycling long distances by road and taking heavy camping gear. A salesperson gives you the following options.
- Question:** Which bicycle should you buy?
- 1** The CR-Team.
 - 2** The Blue Venus.
 - 3** The SL-8.
 - 4** The ZT-11.
-

- (K) No. 29** **Situation:** You are a university student. You are at a graduation thesis meeting. You have a B average and want to do a creative writing project.
- Question:** What should you do first?
- 1** Talk to your academic adviser.
 - 2** Write a research paper outline.
 - 3** Hand in your proposal to the committee.
 - 4** Consult with a doctoral student.

一次個人成績表に合否結果を記載して、**6月29日までに送付**します（合格の場合は、一次個人成績表の右上部分が二次受験票になります）。未着の場合は6月30日以降に英検サービスセンター03(3266)8311（平日10:00～17:00）までお問い合わせください（お問い合わせの際には受験番号もお知らせください）。

◆団体申込みの場合

一次試験の結果は、**6月29日までに申込責任者あてに送付**します（個人あてには送付しません）。

3) 合否および得点の通知について

合格者には「合格」、不合格者には合格ラインに近い順より「不合格A」「不合格B」の2段階で合否結果を通知します。また、合格点、解答状況、大問別得点、および「語い・熟語」「読解」「作文」「リスニング」の各分野別得点も表示されます。なお、各分野は下記の大問により測定されます。

*「語い・熟語」—大問[1] *「読解」—大問[2]・[3] *「作文」—大問[4] *「リスニング」—Part1～3

■二次試験について（一次試験合格者のみ）■

1) 試験日 2015年7月5日(日)

2) 受験地（希望の受験地を選べます）

下記の二次試験受験地番号表をみて、希望の受験地番号を解答用紙の所定欄に記入・マークしてください。

3) 受験会場と集合時刻（協会が指定します）

二次受験票（一次個人成績表の右上部分）で通知します。これを切り離してお持ちください。ダブル受験（準1級と1級または準1級と2級）で一次試験をどちらの級も合格した方は、午前に準1級、午後に1級または2級の受験となります。
