

2019-3

Grade Pre-1

実用英語技能検定

主催：公益財団法人 日本英語検定協会

後援：文部科学省

準 1 級

2020 年 1 月 26 日 (日) 実施

■ 試験時間

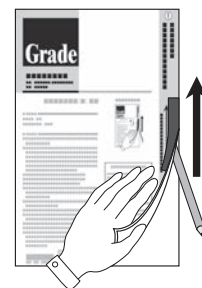

筆記試験 (90分)

リスニングテスト (約30分)

■ 注意事項

1. 合図があるまでシールを破いてはいけません。ミシン目に沿って丁寧に破いてください。問題冊子が破れても交換できません。
2. 試験開始まで、この問題冊子を開いてはいけません。
3. 解答は、HBの黒鉛筆かシャープペンシルを使用して解答用紙（マークシート）に記入してください。筆記①②③・リスニングの解答欄は解答用紙のA面（表面）、筆記④の解答欄は、解答用紙のB面（裏面）にあります。解答用紙以外に記入した解答は、すべて無効となります。問題冊子にはメモをしてもかまいませんが、後で解答用紙に解答を書き写す時間はありません。
4. 問題内容に関する質問は一切受けつけません。
5. 不正行為をした場合は、答案は無効となります。
6. 他の受験者に迷惑をかける行為を禁じます。
7. リスニングテストの準備時間、およびリスニングテスト中に教室外へ出た場合は、その後教室に戻りテストを受けることはできません。
8. 携帯電話などは必ず電源を切ってカバンにしまい、絶対に使用しないでください。
9. 電子機器（ウェアラブル端末を含む）の使用を禁じます。
10. 携帯電話などの着信音・バイブ音、その他試験を妨げる音を発生させた場合は、失格とすることがあります。
11. 試験終了後、問題冊子は持ち帰ってください。
12. 採点結果等については、一切異議申し立てはできません。
13. この試験問題の複製（コピー）を禁じます。また、この試験問題の一部または全部を協会の許可なく他に伝えたり、漏えい（インターネット上に掲載することを含みます）することを禁じます。

1

To complete each item, choose the best word or phrase from among the four choices. Then, on your answer sheet, find the number of the question and mark your answer.

- (1) The coastal town was exposed to the full () of the hurricane, and many buildings were destroyed.
1 fury **2** shrinkage **3** galaxy **4** era
- (2) **A:** Kaylee is so (). She told me that she thinks she's the most beautiful girl in the school.
B: I know. She also thinks she's the smartest.
1 outraged **2** conceited **3** offended **4** defined
- (3) The job candidate claimed she was () in Chinese, but when the interviewer asked her a question in Chinese, she did not understand it.
1 proficient **2** vigorous **3** extensive **4** insistent
- (4) Ed apologized to Kim for breaking her vase, but Kim was not convinced it was an accident. She accused him of breaking it ().
1 expansively **2** abstractly **3** deliberately **4** bashfully
- (5) A week after the election, the city council apologized to the public. An entire box of () had been lost, meaning that many citizens' votes went uncounted.
1 theses **2** ballots **3** clauses **4** rallies
- (6) The company president asked a lawyer to find out if the contract was (). The contract was not profitable, so he was hoping his company could cancel it early.
1 striking **2** preceding **3** binding **4** dripping
- (7) Although the students were given () time to complete their assignment, several were late in handing it in and received a lower grade as a result.
1 ample **2** premature **3** stale **4** resolute
- (8) Treating customers with () is very important. If salespeople are rude or have bad manners, shoppers are unlikely to return to the store.
1 struggle **2** ransom **3** apparel **4** courtesy
- (9) In the morning, the café was quiet, but at lunchtime it became much more (). The waitstaff had to rush back and forth taking and delivering orders.
1 subtle **2** touchy **3** vulgar **4** hectic

- (10) The scientist () himself among his peers through his outstanding achievements. He had received many awards and published a number of books.
 1 committed 2 enacted
 3 distinguished 4 provoked
- (11) The rebels created () when they defeated the government. The country remained out of control until democratic leadership returned several years later.
 1 inaction 2 botany 3 anarchy 4 texture
- (12) The doctor told her patient he would need a () painkiller after his surgery. "I don't usually recommend such strong medication," she said, "but you'll be in a lot of pain."
 1 vain 2 witty 3 mutual 4 potent
- (13) The police () the warehouse because they thought it was being used by criminals to store illegal drugs.
 1 remodeled 2 raided 3 doomed 4 knitted
- (14) Janelle was able to () long-distance running three months after injuring her knee. She was happy that she was able to train again.
 1 clutch 2 violate 3 wield 4 resume
- (15) The conference hall () with excitement as the famous biologist rose to speak. Everyone knew she would announce a major discovery, but no one knew what it was.
 1 buzzed 2 endorsed 3 tapped 4 slammed
- (16) In the divorce case, the judge awarded () of the children to the mother but ruled that the father could visit them twice a month.
 1 custody 2 procedure 3 finale 4 bait
- (17) Some people are very (). They are much more interested in owning things than they are in their spiritual well-being.
 1 endearing 2 materialistic 3 invisible 4 boundless
- (18) Some of the () English used in fourteenth-century texts would not be understandable to native English speakers today.
 1 archaic 2 scenic 3 sinister 4 muddy

- (19) Shortly after the king died, his eldest daughter was () queen, and a crowning ceremony was held for her.
1 restrained **2** crouched **3** proclaimed **4** enveloped
- (20) *A:* Did Greg apologize to the teacher for cheating on the test?
B: Yes, but he doesn't seem very (). I heard him laughing about it later with his friends.
1 tragic **2** plentiful **3** remorseful **4** revolting
- (21) In recent years, the university has seen a large decrease in (). To make up for having fewer students, tuition had to be raised.
1 splendor **2** infrastructure **3** adoration **4** enrollment
- (22) William had so many e-mails to respond to in the morning that it was lunchtime before he could () preparing for the presentation he had to give that evening.
1 get down to **2** send out for **3** walk off with **4** grow out of
- (23) *A:* Do you think the economy will recover next year, Professor Grey?
B: Well, I'm a little worried. Fewer people are buying houses, and that usually () a worse economy in the future.
1 points to **2** acts out **3** heads off **4** misses out
- (24) The organizers had been planning the cultural event for months, so they were very glad when it () perfectly. There were no problems at all.
1 backed up **2** ran down **3** came off **4** hung on
- (25) Paulo used to spend a lot of time trying to () others' expectations of him, but now he simply focuses on the things that make him happy.
1 die out **2** kick off **3** get in on **4** live up to

Read each passage and choose the best word or phrase from among the four choices for each blank. Then, on your answer sheet, find the number of the question and mark your answer.

Tiger Shark Meals

Tiger sharks, the fourth-largest type of shark on the planet, are known to consume not only fish, turtles, and mammals such as seals but also an extremely wide variety of other sea creatures. Even man-made objects that end up in the sea, such as rubber tires and car license plates, are routinely on the menu for these large predators. (26), they seem to deserve their nickname, the “garbage cans of the sea.”

Ecologist Marcus Drymon of Mississippi State University recently discovered that the diet of tiger sharks (27). The animals are known to make meals of seabirds, such as gulls or pelicans, so when a tiger shark that Drymon caught during a routine tracking program happened to vomit some feathers onto his boat, he was not particularly shocked. However, analysis revealed the feathers belonged to a so-called backyard bird. These are birds that live on land and are often seen in people’s gardens, such as sparrows and wrens. Analysis of the stomach contents of more tiger sharks confirmed that backyard birds were in fact regularly meeting this fate.

The cause of this phenomenon likely lies in the backyard birds’ habit of migrating. Migrating birds are often knocked into the sea by storms. Unaccustomed to the water, they are usually unable to return to the air once their feathers become soaked. This explains how the sharks (28). Drymon suspects tiger sharks purposely give birth in areas that migrating birds fly over. The fallen animals provide an easy meal for the baby sharks, who are not yet able to hunt prey that is more difficult to catch.

- | | | |
|------|---|---|
| (26) | 1 In short
3 Alternatively | 2 In spite of this
4 Furthermore |
| (27) | 1 could mean trouble for humans
2 contains an unexpected addition
3 is less varied than previously thought
4 leads them to swim in dangerous areas | |
| (28) | 1 were able to travel so far
2 select individual birds
3 gained access to these animals
4 could survive in such rough conditions | |

Home Advantage

Home advantage is a well-documented phenomenon in certain sports, such as baseball and soccer, where teams are statistically more likely to win when playing at home than when playing away games. One proposed explanation for this is the (29). However, author David Runciman notes that if this were true, there would have been a much bigger reduction in home advantage over the past century than there has been, since luxuries such as first-class flights, fancy hotels, and accompaniment by therapists for athletes playing away from home have become standard.

Another potential factor is players' familiarity with their home field. Although sports fields do not differ significantly from one place to another, Runciman points out that being familiar with even minor aspects of one's surroundings can "enhance confidence in the performance of repetitive physical tasks." (30) when a team moves to a new home field. The team's home advantage initially goes away, only to return once the athletes get used to their new surroundings.

The way sports venues are constructed also seems to affect home advantage. In an analysis of over 35,000 Major League baseball games, researchers Richard Zeller and Tim Jurkovic reported that teams playing in a domed stadium at home won 10.5 percent more games than when they were on the road. On the other hand, teams playing in an open-air stadium won 7.2 percent more games at home. The researchers noted that domed stadiums trap noise within the stadium and that the enthusiasm from fans in the crowd helps teams play better and win more games. (31), teams whose home stadiums are domed perform especially well at home.

| | 3 | Surprisingly | 4 | Because of this |

Read each passage and choose the best answer from among the four choices for each question. Then, on your answer sheet, find the number of the question and mark your answer.

Cassina

With its rich, dark color, caffeinated kick, and roasted aroma, cassina, a beverage made from the leaves of a type of holly tree, could easily be mistaken for black tea. Cassina, however, does not come from China, where tea originated, but from the southern coastal areas of North America. Native Americans began drying and roasting cassina leaves over a thousand years ago, and trade in the “black drink,” as cassina was known, stretched across the continent before the arrival of European colonizers. The colonizers, too, adopted the beverage, drinking cassina daily in Florida and other southern colonies.

The potential for competition worried European importers of black tea, however, and they set out to use any means necessary to prevent this. Early European observers had reported seeing Native Americans drinking cassina during rituals that involved “purging”—the consumption of substances that cause vomiting. Historians think the substance consumed in the rituals was likely cassina mixed with other herbs, or perhaps not cassina at all, as cassina on its own does not make people throw up when consumed in typical quantities. Still, when first classifying the plant, scientists gave it the Latin name *Ilex vomitoria*, or “holly that causes vomiting.” Some historians suspect tea companies encouraged scientists—perhaps by means of a bribe—to make the beverage sound particularly unappealing.

As a result, in the 1700s, when cassina was marketed in Europe as an alternative to expensive black tea, tea importers quickly spread word of how the plant supposedly caused vomiting. The campaign was successful, as cassina failed to gain popularity and was largely forgotten. In recent years, however, chefs and consumers in the southern United States have rediscovered it as part of the growing movement to consume sustainable items obtained from local sources. An added attraction is that the plant is strong and resistant to drought. Advocates are hoping cassina can overcome its unfortunate scientific name and history to emerge as a popular alternative to tea and coffee.

(32)

According to the author of the passage, the drinking of cassina was

- 1** begun by native populations who lived along the coasts of the southern part of North America.
- 2** popular in parts of Europe even before North America was colonized by Europeans.
- 3** surprisingly widespread among Native Americans in spite of the plant's Chinese origins.
- 4** introduced to Native Americans by Europeans who sought to profit from trade in the beverage.

(33)

What do we learn about the Latin name for cassina?

- 1** The people responsible for classifying cassina may have benefited from making it sound unpleasant to drink.
- 2** Scientists who observed Native American ceremonies chose the name after confirming that cassina made people sick.
- 3** Cassina was initially classified as being related to black tea and then renamed because of opposition from tea importers.
- 4** The fact that Native Americans used cassina to treat stomach illnesses led scientists to classify it as a medicine.

(34)

According to the author of the passage, what is one reason that modern-day consumers have a new interest in cassina?

- 1** Drinking cassina offers greater health benefits than consuming other kinds of caffeinated beverages.
- 2** Chefs often claim that it goes better with their dishes than beverages such as tea and coffee do.
- 3** Increasing numbers of people want to consume products that are grown in their local area.
- 4** As droughts have caused tea and coffee production to decline, cassina should offer an affordable alternative.

The Hebridean Ark Tree Project

On the Outer Hebrides, a group of islands near the Scottish mainland, an ambitious tree-planting project has started. Called the Hebridean Ark Tree Project, it aims to return the islands to their ancient state of thick forest cover. Getting trees to grow on the islands is a challenge, however. The climate is harsh, with low average temperatures and strong winds that spray the land with saltwater, which harms trees if it is absorbed through their roots. In addition, much of the ground consists of peat, a nutrient-poor mixture of organic materials. Peat forms when low temperatures, water, and a lack of oxygen result in organic matter, such as dead plants, failing to decay completely. Furthermore, animals, such as deer and sheep, will almost certainly feed on young trees. To deal with the peat problem, instead of growing trees on top of the peat, the project will grow them on the edges. Keeping animals away is less straightforward, however, as fencing may be impractical, and reducing their numbers would cause controversy.

Despite the various challenges, those involved in the project believe it can succeed. Evidence shows that forests on the islands grew well thousands of years ago. Although the climate has cooled since then, it was primarily human activity that led to the current situation. Firstly, Viking invaders who arrived from nearby Scandinavia around AD 800 cut down trees to make sure the native people could not use wood for boat building. After settling on the islands, the invaders cleared even more trees for raising animals and growing crops. After a battle on the island of Lewis in 1098, the Vikings introduced a slash-and-burn policy that severely damaged local tree populations. Once the forests on the Outer Hebrides were gone, peat growth began to take over.

A major issue facing the project is selecting which trees to plant. The focus is on native trees, such as aspen and birch, but the origin of the seeds is critical. Project supporter David Mackay recalls a previous reforestation plan on the Shetland Islands, where environmental conditions resemble those on the Outer Hebrides. That plan initially used young trees brought over from the Scottish mainland, but eventually, seeds and trees from the nearby Faroe Islands had to be introduced. Mackay notes that the genetic makeup of trees from the mainland does not enable them to deal with harsh island conditions. For the Hebridean Ark Tree Project, seeds are being taken from trees that currently remain on the Outer Hebrides and grown into some 100,000 young tree saplings before being transferred back to the islands.

(35)

What is true of environmental conditions on the Outer Hebrides?

- 1** Rising temperatures have made it difficult for plant and animal populations to grow significantly.
- 2** The high salt content in the soil has destroyed large areas of peat deposits, preventing the growth of plants.
- 3** The failure of organic matter to decay fully has resulted in the ground lacking nutrients.
- 4** Strong winds blow trees down too quickly for them to develop in numbers large enough for a forest to form.

(36)

One of the main causes of tree loss on the Outer Hebrides in the past was that

- 1** native people allowed their animals to eat young trees in an attempt to make living conditions difficult for the Vikings.
- 2** the Vikings destroyed forested areas because they wanted to utilize the land for agricultural purposes.
- 3** native people attempted to escape the Vikings by cutting down large areas of forest to build boats for themselves.
- 4** the Vikings' heavy use of peat in certain activities led forested areas to eventually be taken over by peat growth.

(37)

According to David Mackay, what should the Hebridean Ark Tree Project learn from previous efforts?

- 1** Only a few types of seeds should be planted on the Outer Hebrides, as many species can damage the local environment.
- 2** Locals should lead the project, as experts from the mainland are not familiar with growing patterns on the Outer Hebrides.
- 3** Older trees should be used instead of young ones since they can better withstand the environmental threats on the Outer Hebrides.
- 4** The seeds of trees taken from the Outer Hebrides or from similarly harsh environments are the most likely to grow successfully.

A Closer Look at Vitamin Supplements

In 1970, American chemist Linus Pauling published the book *Vitamin C and the Common Cold*, which promoted the idea of taking vitamin supplements to prevent and treat disease. Pauling believed high doses of vitamin C could cure the common cold. Though scientific evidence to support his claim was entirely lacking, people believed it owing to the fact that he was widely respected as a scientist. Pauling had published over a thousand scientific papers and books about chemical bonds, molecular biology, and the structure of proteins, and in 1954 he had been awarded the Nobel Prize in Chemistry. Not surprisingly, then, when he claimed that vitamin C could prevent and treat colds, people listened, and vitamin C sales soared. Over time, his claim grew to include other vitamins and supplements, and he even stated that large doses could cure everything from the flu to cancer and HIV.

Research had already found evidence linking diets high in fruits and vegetables with greater longevity and lower rates of cancer, heart failure, and other age-related diseases. It was also known that fruits and vegetables are high in substances such as beta carotene, folic acid, and vitamins A, C, and E, which are called antioxidants. Antioxidants prevent and repair cell damage caused by free radicals, which are formed naturally by the body as part of its normal function but also come from external sources, such as environmental pollution. When there are more free radicals than antioxidants in the body, an imbalance called oxidative stress occurs, which can lead to cancer and other diseases. Pauling had the idea that, since antioxidants can lessen the damage caused by free radicals, increasing antioxidant levels with supplements could prevent illness.

However, in the years since Pauling's claim about vitamin C was published, numerous studies have shown that vitamin C cannot cure the common cold. In fact, most studies evaluating similar supplements have not supported their use. Notably, studies showed that long-term smokers who took beta carotene and vitamin A or E supplements actually had an increased likelihood of developing lung cancer or heart disease compared with those who did not. Vitamin E was found to increase the risk of heart failure, and men who took multivitamins were more likely to develop prostate cancer. This contradiction has been called the "antioxidant paradox."

What could the reason for this paradox be? Although taking high doses of vitamins can increase antioxidant levels, it must also be remembered that a low or moderate level of free radicals serves a beneficial purpose in defending the body from illness. When the body releases free radicals as part of its immune response, they target and destroy bacteria, viruses, and damaged cells—including cancerous and precancerous ones. Taking large doses of antioxidants may interrupt this natural defensive action and allow disease to grow stronger. This does not mean, however, that supplements are entirely without value. Vitamin supplements, for example, are effective in treating diseases associated with malnutrition, such as scurvy, which results from people not getting enough vitamin C. However, our usage of supplements to address illnesses caused by bacteria and viruses clearly needs a closer look.

(38)

What do we learn about Linus Pauling in the first paragraph?

- 1 Although he was mistaken about the effect of vitamin C on colds, his research led to treatments for other diseases.
- 2 His discovery about vitamins was only possible because he was familiar with various branches of science.
- 3 His claim about vitamin C contradicted past conclusions he had made about chemical bonds and the structure of proteins.
- 4 The fame he had achieved as a scientist led people to accept his idea in spite of a lack of evidence to support it.

(39)

What did Pauling believe about antioxidants?

- 1 They could limit the harm done by free radicals made by the body, but they had little effect on free radicals that came from external sources.
- 2 Other researchers' claims that they were made naturally by the body in quantities sufficient to improve health could not be proved.
- 3 Large amounts of them were needed to avoid the cell damage and disease that result from the presence of too many free radicals in the body.
- 4 Obtaining them from food sources such as fruits and vegetables could actually have a negative effect on a person's health.

(40)

Research into antioxidants that has been done since Pauling's time has shown that

- 1 consuming them as supplements does not offer the illness-fighting benefits claimed by Pauling, and can even be harmful to one's health.
- 2 consuming higher doses of them as supplements is more effective for preventing disease than taking small doses.
- 3 the problem Pauling was attempting to solve with his research was not actually a real one.
- 4 smokers should consume beta carotene supplements along with vitamin A and E supplements to reduce the risk of certain diseases.

(41)

According to the author of the passage, how do free radicals function within the body?

- 1 They can increase antioxidants' effectiveness in improving the health of people who are not receiving enough nutrition.
- 2 They are released after a person consumes certain vitamins to ensure that those vitamins go where they are needed in the body.
- 3 They play an important role in the immune system because they seek out and eliminate threats to healthy cells.
- 4 They are similar to viruses and bacteria in that they can actually be made stronger by the presence of antioxidants.

4

English Composition

- Write an essay on the given TOPIC.
- Use TWO of the POINTS below to support your answer.
- Structure: introduction, main body, and conclusion
- Suggested length: 120–150 words
- Write your essay in the space provided on Side B of your answer sheet.
Any writing outside the space will not be graded.

TOPIC

Do companies need to improve the way they treat their workers?

POINTS

- *Health*
- *Male-female equality*
- *Salaries*
- *Work-life balance*

MEMO

Listening Test

There are three parts to this listening test.

Part 1	Dialogues: 1 question each	Multiple-choice
Part 2	Passages: 2 questions each	Multiple-choice
Part 3	Real-Life: 1 question each	Multiple-choice

※ Listen carefully to the instructions.

Part 1

- No. 1**
- 1** Visit her family in the summer.
 - 2** Change her vacation time.
 - 3** Take an extra week off.
 - 4** Reschedule her parents' visit.
- No. 2**
- 1** The team's results were unsatisfactory.
 - 2** He refused to listen to the owners' advice.
 - 3** The players did not like him.
 - 4** He demanded too much money.
- No. 3**
- 1** His daughter has decided to quit college.
 - 2** His daughter cannot find a job in finance.
 - 3** His daughter wants to change her career path.
 - 4** His daughter cannot afford to attend college.
- No. 4**
- 1** It had an environmental message.
 - 2** The pictures were very beautiful.
 - 3** It was not well attended.
 - 4** She was unable to meet the photographer.

- No. 5**
- 1** Have the house painted.
 - 2** Get a new roof.
 - 3** Wait until they save more money.
 - 4** Replace the living room carpets.
- No. 6**
- 1** She will be away on vacation.
 - 2** She has arranged to meet other people.
 - 3** He will be on a business trip.
 - 4** He has not returned her calls.
- No. 7**
- 1** She does not pay attention to clients.
 - 2** She does not speak up in staff meetings.
 - 3** She is failing to meet her sales targets.
 - 4** She is missing too many meetings.
- No. 8**
- 1** That they do more research before deciding.
 - 2** That he move to Leicester on his own.
 - 3** That the woman find a new position locally.
 - 4** That they move closer to his family.

Listening Test

- No. 9**
- 1** The number of people who attended was low.
 - 2** She felt uncomfortable talking to people.
 - 3** It should have been held on another date.
 - 4** She wishes the man had gone with her.
- No. 10**
- 1** Reserve a hotel room today.
 - 2** Check some sightseeing websites.
 - 3** Request some time off.
 - 4** Postpone the trip for now.
- No. 11**
- 1** The living room is too small for them.
 - 2** The man's mother will not like them.
 - 3** They would not look good in the bedroom.
 - 4** They will be too heavy to hang on the wall.
- No. 12**
- 1** Keep his things in the same place.
 - 2** Stop leaving valuables in the kitchen.
 - 3** Help her look for the things she lost.
 - 4** Hang his suits in the closet.

Part 2

(A) **No. 13**

- 1** Smoke caused the paper bags to rise.
- 2** Paper was better than cloth for making aircraft.
- 3** Their balloon could never carry people.
- 4** Their balloon might catch fire.

No. 14

- 1** The pilots showed that ballooning was cheap.
- 2** It was quicker than previous English Channel flights.
- 3** It helped improve English-French relations.
- 4** It had never been done before.

(B) **No. 15**

- 1** Boats and planes are causing pollution.
- 2** Garbage sites are becoming full.
- 3** Local wildlife is attracted to garbage.
- 4** There is a shortage of natural resources.

No. 16

- 1** They are receiving complaints from citizens.
- 2** Recycling laws are too strict.
- 3** Shipping prices for supplies have risen.
- 4** They will lose a source of funding.

Listening Test

(C) **No. 17**

- 1** It increased their vocabulary.
- 2** It improved their reading speed.
- 3** It increased their ability to spell new words.
- 4** It improved their school attendance.

No. 18

- 1** Encouraging students to read science fiction in class.
- 2** Asking students to take notes when reading.
- 3** Focusing more on spelling than reading.
- 4** Reading aloud to teach subjects other than English.

(D) **No. 19**

- 1** He was more familiar with the territory.
- 2** He was able to trick the US government.
- 3** He learned about the US soldiers' attack plans.
- 4** He got other tribes to help him fight.

No. 20

- 1** The US government returned land to the Sioux.
- 2** The US government broke the peace treaty.
- 3** Red Cloud's tribe began mining for gold.
- 4** Red Cloud defeated the US soldiers again.

- (E)** **No. 21** **1** To find a way to make horses run faster.
 2 To answer a question about how horses run.
 3 To advertise a horse show.
 4 To provide public entertainment.
- No. 22** **1** He hired people to take photos.
 2 He increased the shutter speed of his cameras.
 3 He used wires to make cameras take photos.
 4 He drew images based on photos.
-
- (F)** **No. 23** **1** They traded with other cultures.
 2 They attacked enemies in the deep jungle.
 3 They could not feed their population.
 4 They used advanced farming methods.
- No. 24** **1** They were protected by the jungle.
 2 They have been badly damaged in wars.
 3 They were copied from another civilization.
 4 They are still used by modern farmers.

Listening Test

Part 3

(G) No. 25

Situation: You are beginning your first year studying at a university abroad. You have a Y2 visa. You are interested in working part-time and attend an orientation.

Question: Who should you speak to?

- 1** Gunther Heinz in room 205.
- 2** Maria Rivera in room 201.
- 3** Anita Kern in room 301.
- 4** Jill Chen in room 207.

(H) No. 26

Situation: You have checked in to take Freedom Airlines Flight 214 to Singapore. You will then take a Europa Airlines flight. You hear the following announcement.

Question: Where should you go after collecting your baggage?

- 1** Counter C.
- 2** Counter G.
- 3** Counter E.
- 4** Counter A.

(I) No. 27 *Situation:* Your boss asked you to order 100 individual cupcakes or cookies, each showing your company's logo, for a conference that begins in two days. A bakery leaves you the following voice mail.

Question: What should you do?

- 1 Order from the other local bakery.
- 2 Order the regular cupcakes.
- 3 Order the large-sized cakes.
- 4 Order the fancy cookies.

(J) No. 28 *Situation:* You start a new job in three days and have to wear a gray suit with no patterns. Your budget is \$200. A store clerk tells you the following.

Question: Which suit should you choose?

- 1 The Romano.
- 2 The Franklin.
- 3 The Gladstone.
- 4 The Vostel.

(K) No. 29 *Situation:* You are on vacation with your elderly parents, who have trouble walking. They want to take a boat trip to see some nature. You call a tour company.

Question: Which cruise should you take?

- 1 The daytime downriver cruise.
- 2 The nighttime downriver cruise.
- 3 The shorter upriver cruise.
- 4 The extended upriver cruise.

■一次試験の結果について■

1) 英検ウェブサイトでの解答速報 (<http://www.eiken.or.jp>) 1月27日 13:00以降

2) 結果通知方法

◆個人申込みの場合

一次個人成績表に可否結果を記載して、2月18日までに送付します（合格の場合は、一次個人成績表の右上部分が二次受験票になります）。未着の場合は2月18日以降に英検サービスセンター03(3266)8311（平日9:30～17:00）までお問い合わせください（お問い合わせの際には個人番号もお知らせください）。

◆団体申込みの場合

一次個人成績表は2月18日までに申込責任者あてに送付します（個人あてには送付しません）。

2月19日までに二次受験票を受け取っていない場合は、申込責任者へお問い合わせください。

■二次試験について（一次試験合格者のみ）■ ※試験日程は必ずご自身で事前にご確認ください。

1) 試験日 A日程：2月23日（日） B日程：3月1日（日）

- ・二次試験の受験日は、A日程・B日程のうち、申込方法・希望受験地等に基づき協会が指定します。試験日・受験会場・集合時間は二次受験票（一次個人成績表の右上部分）で通知します。これを切り離して受験会場にお持ちください。
- ・いかなる場合も二次受験票で指定された試験日・受験会場・集合時間での受験となり、変更はできません。
- ・日程区分については、英検ウェブサイトの【二次試験のA／B日程の区分けについて】をご確認ください。
- ・ダブル受験（隣接した2つの級を一緒に受験）の場合、それぞれの級について二次受験票に記載の日程での受験となり、級により異なる日程での受験となる場合があります。
- ・年齢は申込時に申請した生年月日に基づいて算出します（一次試験の答案に異なる生年月日を記入されても反映されません）。
- ・申込情報に不備がある場合、協会が指定した日時での受験となり、【二次試験のA／B日程の区分けについて】のとおり日程とならない場合があります。
- ・一部特別会場（海外・離島等）、障がい者特別措置にて二次試験を受験する場合についてはA日程とします。

2) 受験地（希望の受験地を選べます）

- ・下記の二次試験受験地番号表をみて、希望の受験地番号を解答用紙（準会場で受験している場合は志願票）の所定欄に記入・マークしてください。

■二次試験受験地番号表■ ※横浜・東京・大阪は下記、島部・海外は右記参照 ※受験地は周辺エリアを含む
